
Contents

1	Uncontrolled Systems	1
1.1	The Autonomous Case	1
1.1.1	Definitions and Elementary Properties	1
1.1.2	Localization of Limit Sets with the Aid of Lyapunov Functions	6
1.1.3	Stability Based on Lyapunov's Method	8
1.1.4	Stability of Fixed Points via Linearisation	13
1.1.5	Linear Systems.....	16
1.1.6	Applications	21
1.2	The Non-Autonomous Case	32
1.2.1	Definitions and Elementary Properties	32
1.2.2	Stability Based on Lyapunov's Method	35
1.2.3	Linear Systems.....	38
1.2.4	Application to a Model for the Process of Hemo-Dialysis	43
2	Controlled Systems	47
2.1	The Autonomous Case	47
2.1.1	The Problem of Fixed Point Controllability	47
2.1.2	Null-Controllability of Linear Systems.....	57
2.1.3	A Method for Solving the Problem of Null-Controllability	65
2.1.4	Stabilization of Controlled Systems	70
2.1.5	Applications	73
2.2	The Non-Autonomous Case	80
2.2.1	The Problem of Fixed Point Controllability	80
2.2.2	The General Problem of Controllability	83
2.2.3	Stabilization of Controlled Systems	86
2.2.4	The Problem of Reachability	89
3	Controllability and Optimization	93
3.1	The Control Problem	93
3.2	A Game Theoretical Solution	95

3.2.1	The Cooperative Case	95
3.2.2	The Non-Cooperative Case	99
3.2.3	The Linear Case	103
3.3	Local Controllability	106
3.4	An Emission Reduction Model	107
3.4.1	A Non-Cooperative Treatment	107
3.4.2	A Cooperative Treatment	116
3.4.3	Conditions for the Core to be Non-Empty	118
3.4.4	Further Conditions for the Core to be Non-Empty	122
3.4.5	A Second Cooperative Treatment	128
3.5	A Dynamical Method for Finding a Nash Equilibrium	136
3.5.1	The Goal-Cost-Game	136
3.5.2	Necessary Conditions for a Nash Equilibrium	137
3.5.3	The Method	139
3.6	Evolution Matrix Games	141
3.6.1	Definition of the Game and Evolutionary Stability	141
3.6.2	A Dynamical Method for Finding an Evolutionary Stable State	147
3.7	A General Cooperative n -Person Goal-Cost-Game	151
3.7.1	The Game	151
3.7.2	A Cooperative Treatment	152
3.7.3	Necessary and Sufficient Conditions for a Stable Grand Coalition	153
3.8	A Cooperative Treatment of an n -Person Cost-Game	155
3.8.1	The Game and a First Cooperative Treatment	155
3.8.2	Transformation of the Game into a Cooperative Game	157
3.8.3	Sufficient Conditions for a Stable Grand Coalition	158
3.8.4	Further Cooperative Treatments	160
3.8.5	Pareto Optima as Cooperative Solutions of the Game	162
A	Appendix	167
A.1	The Core of a Cooperative n -Person Game	167
A.2	The Core of a Linear Production Game	173
A.3	Weak Pareto Optima: Necessary and Sufficient Conditions	177
A.4	Duality	179
B	Bibliographical Remarks	181
	References	183
	Index	185
	About the Authors	187
