Pretace		,
Chapter 1	Introduction and Motivation	
-	Preliminary Remarks	-
	Preview on Noncooperative Games	
	Outline of the Book	12
1.4	Conventions, Notation and Terminology	13
	PART I	
Chapter 2	Noncooperative Finite Games: Two-Person Zero-Sum	19
	Introduction	19
	Matrix Games	20
	Computation of Mixed Equilibrium Strategies	31
	Extensive Forms: Single-Act Games	38
	Extensive Games: Multi-Act Games	48
	Zero-Sum Games with Chance Moves	60
2.7	Two Extensions	64
	2.7.1 Games with repeated decisions	64
	2.7.2 Extensive forms with cycles	66
2.8	Action-Dependent Information Sets	69
	2.8.1 Duels	69
	2.8.2 A searchlight game	70
	Problems	73
2.10	Notes	77
Chapter 3	Noncooperative Finite Games: N-Person Nonzero-Sum	79
3.1	Introduction	79
3.2	Bimatrix Games	80
3.3	N-Person Games In Normal Form	90
3.4	Computation Of Mixed-Strategy Nash Equilibria In Limatrix Game	es 98
3.5	Nash Equilibria of N-Person Games in Extensive Form	100
	3.5.1 Single-act games: Pure strategy Nash equilibria	103
	3.5.2 Single-act games: Nash equilibria in behavioural and mixed	
	strategies	120
	3.5.3 Multi-act games: Pure-strategy Nash equilibria	122

### strategies 129 ### 3.5.5 Other refinements on Nash equilibria 131 ### 3.6 The Stackelberg Equilibrium Solution 135 ### 3.7 Nonzero-Sum Games With Chance Moves 153 ### 3.8 Problems 157 ### 3.9 Notes 163 Chapter 4 Static Noncooperative Infinite Games 167 4.1 Introduction 167 4.2 c Equilibrium Solutions 167 4.3 Continuous-Kernel Games: Reaction Curves, and Existence and Uniqueness Of Nash and Saddle-Point Equilibria 174 4.4 Stackelberg Solution Of Continuous-Kernel Games 185 4.5 Consistent Conjectural Variations Equilibrium 192 4.6 Quadratic Games With Applications In Microeconomics 196 4.7 Problems 216 **PART II** Chapter 5 General Formulation Of Infinite Dynamic Games 221 5.1 Introduction 221 5.2 Discrete-Time Infinite Dynamic Games 222 5.3 Continuous-Time Infinite Dynamic Games 230 5.4 Mixed and Behavioural Strategies In Infinite Dynamic Games 230 5.5 Tools For One-Person Optimisation 233 5.5.1 Dynamic programming for discrete-time systems 242 5.5.2 Dynamic programming for discrete-time systems 243 5.5.3 The minimum principle 248 5.6 Representations Of Strategies Along Trajectories, and Time Consistency Of Optimal Policies 253 5.7 Viscosity Solutions 261 5.8 Problems 267 5.9 Notes 269 Chapter 6 Nash and Saddle-Point Equilibria Of Infinite Dynamic Games 271 6.2.1 Open-Loop Nash equilibria 272 6.2.2 Closed-loop no-memory and feedback Nash equilibria 273 6.2.2 Closed-loop no-memory and feedback Nash equilibria 273 6.2.2 Closed-loop no-memory and feedback Nash equilibria 274 6.2.3 Linear-quadratic games with an infinite number of stages 275 6.3.1 A three-person dynamic game illustrating informational 279 6.3.1 A		3.5.4 Multi-act games: Robavioural and mixed equilibrium	
3.5.5 Other refinements on Nash equilibria 3.6 The Stackelberg Equilibrium Solution 3.7 Nonzero-Sum Games With Chance Moves 3.8 Problems 3.9 Notes 163 3.8 Problems 3.9 Notes 163 3.8 Problems 3.9 Notes 163 3.9 Notes 164 4.1 Introduction 4.2 ε Equilibrium Solutions 4.3 Continuous-Kernel Games: Reaction Curves, and Existence and Uniqueness Of Nash and Saddle-Point Equilibria 4.4 Stackelberg Solution Of Continuous-Kernel Games 4.5 Consistent Conjectural Variations Equilibrium 4.6 Quadratic Games With Applications In Microeconomics 4.7 Problems 4.8 Notes PART II Chapter 5 General Formulation Of Infinite Dynamic Games 5.1 Introduction 4.8 Notes PART II Chapter 5 General Formulation Of Infinite Dynamic Games 5.1 Introduction 5.5 Tools For One-Person Optimisation 5.5 Tools For One-Person Optimisation 5.5.1 Dynamic programming for discrete-time systems 5.5.2 Dynamic programming for discrete-time systems 5.5.3 The minimum principle 5.6 Representations Of Strategies Along Trajectories, and Time Consistency Of Optimal Policies 5.7 Viscosity Solutions 5.8 Problems 5.9 Notes Chapter 6 Nash and Saddle-Point Equilibria Of Infinite Dynamic Games 6.1 Introduction 6.2 Open-Loop Nash equilibria 6.2.1 Open-Loop nash feedback Nash and Saddle-Point Equilibria For Dynamic Games in Discrete Time 6.2.1 Open-Loop nash equilibria 6.2.2 Closed-loop no-memory and feedback Nash equilibria 6.2.3 Linear-quadratic games with an infinite number of stages 6.3 Informational Properties Of Nash Equilibria in Discrete-Time Dynamic Games 6.4 Informational Properties Of Nash Equilibria in Discrete-Time Dynamic Games		3.5.4 Multi-act games: Behavioural and mixed equilibrium	129
3.6 The Stackelberg Equilibrium Solution 135 3.7 Nonzero-Sum Games With Chance Moves 153 3.8 Problems 157 3.9 Notes 163			
3.7 Nonzero-Sum Games With Chance Moves 153 3.8 Problems 157 3.9 Notes 163 157 3.9 Notes 163 163 163 163 163 163 163 163 163 163 163 163 163 163 164 165 167	3 6
