

Contents

| | | |
|----------|---|------------|
| 1 | Matrix games | 1 |
| 1.1 | Definition of a two-person zero-sum game in normal form | 1 |
| 1.2 | Maximin and minimax strategies | 5 |
| 1.3 | Saddle points | 7 |
| 1.4 | Mixed extension of a game | 11 |
| 1.5 | Convex sets and systems of linear inequalities | 15 |
| 1.6 | Existence of a solution of the matrix game in mixed strategies | 18 |
| 1.7 | Properties of optimal strategies and value of the game | 22 |
| 1.8 | Dominance of strategies | 30 |
| 1.9 | Completely mixed and symmetric games | 35 |
| 1.10 | Iterative methods of solving matrix games | 40 |
| 1.11 | Exercises and problems | 44 |
| 2 | Infinite zero-sum two-person games | 49 |
| 2.1 | Infinite games | 49 |
| 2.2 | ϵ -saddle points, ϵ -optimal strategies | 52 |
| 2.3 | Mixed strategies | 57 |
| 2.4 | Games with continuous payoff functions | 64 |
| 2.5 | Games with a convex payoff function | 70 |
| 2.6 | Simultaneous games of pursuit | 79 |
| 2.7 | One class of games with a discontinuous payoff function | 85 |
| 2.8 | Solution of simultaneous infinite games of search | 88 |
| 2.9 | Games of secondary search | 92 |
| 2.10 | A poker model | 104 |
| 2.11 | Exercises and problems | 121 |
| 3 | Nonzero-sum games | 125 |
| 3.1 | Definition of noncooperative game in normal form | 125 |
| 3.2 | Optimality principles in noncooperative games | 129 |
| 3.3 | Mixed extension of noncooperative game | 136 |
| 3.4 | Existence of Nash equilibrium | 139 |
| 3.5 | Kakutani fixed-point theorem and proof of existence of an equilibrium in n -person games | 142 |
| 3.6 | Refinements of Nash equilibria | 145 |

| | | |
|----------|---|------------|
| 3.7 | Properties of optimal solutions | 149 |
| 3.8 | Symmetric bimatrix games and evolutionary stable strategies | 153 |
| 3.9 | Equilibrium in joint mixed strategies | 157 |
| 3.10 | The bargaining problem | 160 |
| 3.11 | Games in characteristic function form | 167 |
| 3.12 | The core and NM -solution | 174 |
| 3.13 | Shapley value | 182 |
| 3.14 | The potential of the Shapley value | 187 |
| 3.15 | The Shapley value for a minimum cost spanning tree game | 191 |
| 3.16 | Exercises and problems | 193 |
| 4 | Positional games | 199 |
| 4.1 | Multistage games with perfect information | 199 |
| 4.2 | Absolute equilibrium (subgame-perfect) | 204 |
| 4.3 | Fundamental functional equations | 210 |
| 4.4 | Penalty strategies | 212 |
| 4.5 | Hierarchical games | 214 |
| 4.6 | Hierarchical games (Cooperative version) | 216 |
| 4.7 | Multistage games with incomplete information | 223 |
| 4.8 | Behavior strategy | 229 |
| 4.9 | Functional equations for simultaneous multistage games | 234 |
| 4.10 | Cooperative multistage games with complete information | 242 |
| 4.11 | Voting the directorial council | 247 |
| 4.12 | Exercises and problems | 261 |
| 5 | Differential games | 267 |
| 5.1 | Differential zero-sum games with prescribed duration | 267 |
| 5.2 | Multistage perfect-information games with an infinite number of alternatives | 275 |
| 5.3 | Existence of ϵ -equilibria in differential games with prescribed duration | 280 |
| 5.4 | Differential time-optimal games of pursuit | 285 |
| 5.5 | Necessary and sufficient condition for existence of optimal open-loop strategy for Evader | 290 |
| 5.6 | Fundamental equation | 294 |
| 5.7 | Methods of successive approximations for solving differential games of pursuit | 301 |
| 5.8 | Examples of solutions to differential games of pursuit | 304 |
| 5.9 | Games of pursuit with delayed information for Pursuer | 308 |
| 5.10 | Definition of cooperative differential game in the characteristic function form | 314 |
| 5.11 | Principle of dynamic stability (time-consistency) | 317 |
| 5.12 | Integral optimality principles | 326 |
| 5.13 | Differential strongly time consistent optimality principles | 332 |

| | |
|---|------------|
| 5.14 Strongly time consistent optimality principles for the games with discount payoffs | 336 |
| 5.15 Exercises and problems | 338 |
| Bibliography | 345 |
| Index | 351 |
