ACKNOWLEDGEMENTS	ix
------------------	----

INTRODUCTION	xi
--------------	----

SECTION A / BARGAINING MODELS

1. Approaches to the Bargaining Problem Before and After the Theory of Games: A Critical Discussion of Zeuthen's, Hicks', and Nash's Theories	3
2. On the Rationality Postulates Underlying the Theory of Cooperative Games	20
3. A Simplified Bargaining Model for the n -Person Cooperative Game	44

SECTION B / PROPERTIES OF EQUILIBRIUM POINTS

4. Games with Randomly Disturbed Payoffs: A New Rationale for Mixed-Strategy Equilibrium Points	73
5. Oddness of the Number of Equilibrium Points: A New Proof	96

SECTION C / PROBABILISTIC MODELS

6. Games with Incomplete Information Played by "Bayesian" Players. Part I: The Basic Model	115
7. Games with Incomplete Information Played by "Bayesian" Players. Part II: Bayesian Equilibrium Points	139
8. Games with Incomplete Information Played by "Bayesian" Players. Part III: The Basic Probability Distribution of the Game	154
9. Uses of Bayesian Probability Models in Game Theory	171

SECTION D / NONCOOPERATIVE MODELS FOR
COOPERATIVE GAMES

10. An Equilibrium-Point Interpretation of Stable Sets and a Proposed Alternative Definition 187
11. A New General Solution Concept for Both Cooperative and Non-cooperative Games 211

SECTION E / GAME-THEORETICAL ANALYSIS
OF MORAL DECISIONS

12. Rule Utilitarianism, Rights, Obligations and the Theory of Rational Behavior 235
