|---|-----|
| Preface. | ix |
| Chapter 1. GENERAL OPTIMALITY | |
| 1.1. Φ -subgradients and Φ -supergradients | 1 |
| 1.2. Duality | 16 |
| 1.3. Optimization problems with constraints | 21 |
| 1.4. Φ -convex sets | 23 |
| 1.5. Φ -convexity in linear spaces | 28 |
| 1.6. Φ -separation | 37 |
| 1.7. Constraints of multifunction type | 40 |
| 1.8. Polarity and duality | 50 |
| Chapter 2. OPTIMIZATION IN METRIC SPACES | |
| 2.1. Φ -convex functions in topological and metric spaces | 56 |
| 2.2. Ekeland Variational Principle and existence of Φ_ε -subgradients | 61 |
| 2.3. Well-conditioned functions | 67 |
| 2.4. Duality in metric spaces | 76 |
| 2.5. Local minima | 97 |
| 2.6. Local subgradients, supergradients and gradients | 110 |
| 2.7. Optimization with constraints. Outer and inner approximations in metric spaces | 130 |
| 2.8. Fréchet differentiability of real-valued functions | 135 |
| 2.9. Φ -subgradients, Φ -supergradients and Φ -gradients of superpositions | 141 |
| 2.10. On differentiability in normed spaces | 150 |
| Chapter 3. MULTIFUNCTIONS AND MARGINAL FUNCTIONS IN METRIC SPACES | |
| 3.1. Lower semicontinuity of marginal functions | 171 |
| 3.2. Local optimization problems. | 184 |
| 3.3. Exact penalties | 197 |
| 3.4. Almost lower semi-continuous multifunctions | 206 |
| 3.5. Behaviour of minimal sets as multifunctions | 212 |
| 3.6. Behaviour of Φ -subdifferentials as a multifunction | 223 |
| Chapter 4. WELL-POSEDNESS AND WEAK WELL-POSEDNESS IN BANACH SPACES | |
| 4.1. Convexity with respect to linear continuous functionals. | 231 |
| 4.2. Well-posed problems for linear functionals on convex sets | 240 |
| 4.3. Streams with bounded bases | 248 |

| | |
|---|-----|
| 4.4. Weakly well-posed problems | 254 |
| 4.5. Well-posedness and weak well-posedness and the drop property for unbounded sets | 261 |
| 4.6. Uniformly well-posed problems | 273 |
| 4.7. Uniformly weakly well-posed problems | 287 |

Chapter 5. DUALITY IN BANACH AND HILBERT SPACES. REGULARIZATION

| | |
|---|-----|
| 5.1. Fenchel conjugate functions in Banach spaces | 294 |
| 5.2. Quadratic regularization in Hilbert spaces | 296 |
| 5.3. The density of the points of differentiability of convex functions | 305 |

Chapter 6. NECESSARY CONDITIONS FOR OPTIMALITY AND LOCAL OPTIMALITY IN NORMED SPACES.

| | |
|---|-----|
| 6.1. Inner and outer conical approximation in normed spaces | 313 |
| 6.2. Upper and lower limits of multifunctions in topological spaces. | 336 |
| 6.3. Dubovitzkii-Milyutin theorem in locally convex spaces | 341 |
| 6.4. Dolecki approximations | 364 |
| 6.5. Necessary conditions of the first order for local optimality | 374 |

Chapter 7. POLYNOMIALS. NECESSARY AND SUFFICIENT CONDITIONS OF OPTIMALITY OF HIGHER ORDER

| | |
|---|-----|
| 7.1. Polynomials. Higher order necessary and sufficient conditions of optimality without constraints | 390 |
| 7.2. Higher order necessary and sufficient conditions of optimality with constraints. | 396 |
| 7.3. Method of reduction of constraints | 403 |

Chapter 8. NONDIFFERENTIABLE OPTIMIZATION

| | |
|--|-----|
| 8.1. DC-functions and the approximation of the first order by DC-functions. 412 | |
| 8.2. Construction of universal derivative | 432 |
| 8.3. Quasidifferentiable functions | 441 |
| 8.4. Point derivatives and critical points | 448 |
| 8.5. Regular points and the locally open range of quasidifferentiable functions | 455 |
| 8.6. Higher order derivatives for quasidifferentiable functions | 458 |
| 8.7. Optimality conditions in quasidifferentiable optimization | 464 |

Chapter 9. NUMERICAL ASPECTS

| | |
|--|-----|
| 9.1. The Φ -bundle method | 469 |
| 9.2. The subgradient method | 475 |
| 9.3. The Karush-Kuhn-Tucker system | 483 |
| 9.4. The nonlinear complementarity problem. | 486 |

| | |
|---|-----|
| 9.5. The continuous set covering problem. | 491 |
| Chapter 10. VECTOR OPTIMIZATION | |
| 10.1. Pareto minima and maxima | 497 |
| 10.2. Necessary conditions of optimality | 512 |
| 10.3. Sufficient conditions for local Pareto points | 517 |
| 10.4. Duality theory in vector lattices | 522 |
| 10.5. Duality theory with Pareto sets | 529 |
| 10.6. Ξ -subdifferentiability in normed spaces | 539 |
| 10.7. Lower semi-continuity of marginal functions | 543 |
| Bibliography | 551 |
| Subject index | 571 |
| Author index | 577 |
| List of symbols | 581 |
