
Contents

Preface, vii

1 Analytic Functions 1

- Sec. 1.1 Review of Complex Numbers, 2
- Sec. 1.2 Arcs, Curves, Domains and Regions, 9
- Sec. 1.3 Analytic Functions, 16
- Sec. 1.4 Cauchy–Riemann Equations. Laplace’s Equation and Harmonic Functions, 39
- Sec. 1.5 Elementary Functions, 56

2 Conformal Mapping 80

- Sec. 2.1 Geometrical Aspects of Analytic Functions. Mapping, 81
- Sec. 2.2 Conformal Mapping, 99
- Sec. 2.3 Laplace’s Equation and Conformal Mapping – Boundary Value Problems, 113
- Sec. 2.4 Linear Fractional Transformation, 129
- Sec. 2.5 Mappings Provided by Elementary Functions, 149
- Sec. 2.6 Schwarz–Christoffel Transformation, 164

3 Boundary Value Problems, Potential Theory and Conformal Mapping 186

- Sec. 3.1 Two-Dimensional Boundary Value Problems and Potential Theory, 187
- Sec. 3.2 Standard Solutions of Laplace’s Equation, 191
- Sec. 3.3 Steady-State Temperature Distribution, 219
- Sec. 3.4 Steady Two-Dimensional Fluid Flow, 240
- Sec. 3.5 Two-Dimensional Electrostatics, 273

4 Complex Integration 292

- Sec. 4.1 Contours and Complex Integrals, 293
- Sec. 4.2 The Cauchy–Goursat Theorem, 319
- Sec. 4.3 Antiderivatives and Definite Integrals, 334
- Sec. 4.4 The Cauchy Integral Formula, 342
- Sec. 4.5 The Cauchy Integral Formula for Derivatives, 351
- Sec. 4.6 Some Useful Theorems Deducible from the Cauchy Integral Formulas, 361
- Sec. 4.7 Evaluation of Improper Definite Integrals by Contour Integration, 376
- Sec. 4.8 Fourier and Laplace Transforms and Inversion Integrals, 421
- Sec. 4.9 The Hilbert Transform, 433

5 Taylor and Laurent Series, Residue Theorem and Applications 438

- Sec. 5.1 Sequences, Series and Convergence, 439
- Sec. 5.2 Uniform Convergence, 459

Sec. 5.3 Power Series, 469
Sec. 5.4 Taylor Series, 481
Sec. 5.5 Laurent Series, 496
Sec. 5.6 Classification of Singularities and Zeros, 518
Sec. 5.7 Residues and the Residue Theorem, 526
Sec. 5.8 Applications of the Residue Theorem, 540

Answers to Odd-Numbered Problems, 573

Suggested Reading and Reference List, 616
