

# Contents

INTRODUCTION . . . . .	1
CHAPTER 1 – WATER WAVE THEORY	
1A. The Equations of Fluid Dynamics . . . . .	3
1B. Water Wave Description . . . . .	11
1C. Airy Waves . . . . .	18
1D. Laitone Solitary Waves . . . . .	21
1E. Stokes Waves . . . . .	24
CHAPTER 2 – THE SHALLOW WATER MODEL	
2A. The Shallow Water Equations . . . . .	32
2B. The Finite-Difference Equations . . . . .	38
2C. Applications . . . . .	43
CHAPTER 3 – THE TWO-DIMENSIONAL NAVIER-STOKES MODEL	
3A. The Two-Dimensional Navier-Stokes Equations . . . . .	48
3B. The Finite-Difference Equations . . . . .	50
3C. Application to Tsunami Wave Propagation . . . . .	59
3D. Application to Underwater Barriers . . . . .	71
3E. Applications to Waves from Cavities . . . . .	74
CHAPTER 4 – THE THREE-DIMENSIONAL NAVIER- STOKES MODEL	
4A. The Finite-Difference Equations . . . . .	86
4B. Application to Tsunami Wave Formation . . . . .	104
4C. Future Applications . . . . .	114
4D. Acknowledgments . . . . .	115
APPENDICES	
Appendix A. The <i>WAVE</i> Code . . . . .	118
Appendix B. The <i>SWAN</i> Code . . . . .	127
Appendix C. The <i>ZUNI</i> Code . . . . .	151
AUTHOR INDEX . . . . .	201
SUBJECT INDEX . . . . .	203
