

CONTENTS

Foreword 9

Preface 11

- 1 Computation of Transonic Gas Flow Past Plane Turbine Cascades** by *A.Yu. Dokolin, I.L. Osipov, and A.V. Shipilin* 19
- References 33
- 2 Optimizing the Shape of Supersonic Parts of Three-dimensional Nozzles** by *V.M. Borisov* 35
- 2.0 Introduction 35
- 2.1 Characteristic Properties of Gas-dynamics Equations. Direct Optimization Techniques 36
- 2.2 Structure of Closing Characteristic Wave Surface. Inverse Methods of Optimization 43
- 2.3 General Method for Optimizing the Shape of Supersonic Parts of Three-dimensional Nozzles 51
- References 65
- 3 Three-dimensional Method of Characteristics for Computing Steady Supersonic Flows** by *Yu.V. Kurilenko and I.E. Mikhailov* 67
- References 80
- 4 On the Nonlinear Stage of Perturbation Growth in Boundary Layer** by *O.S. Ryzhov and I.V. Savenkov* 81
- 4.1 Formulation of the Problem 81
- 4.2 Pseudospectral Method 83
- 4.3 Results of Computations 86
- References 91
- 5 A Method of Solving Three-dimensional Problems of an Incompressible Viscous Flow Past Bodies** by *A.A. Dorodnicyn* 93
- References 102
- 6 Algorithms for Calculating Incompressible Flows with Compact Third-order Approximations** by *A.I. Tolstykh* 103
- 6.1 Algorithms for Vorticity-stream Function Variables 103
- 6.2 Implicit Methods with Pressure Correction for Velocity-pressure Variables 108
- 6.3 Schemes Based on the Artificial Compressibility Method 117
- 6.4 Marching Algorithms 122
- References 128
- 7 Numerical Simulation of Nonuniform Motion of a Body in a Viscous Flow** by *V.V. Rykov* 131
- 7.0 Introduction 131
- 7.1 Numerical Method 132

6 Contents

- 7.2 First-stage Approximation of Equations 133
- 7.3 Formulation of Boundary Conditions 135
- 7.4 Solution of the Poisson Equation 137
- 7.5 Results of Numerical Simulations 138
- References 145

8 **Computation of Radiative Gas Flows in Nozzles** by *A.A. Frolova* 147

- 8.0 Introduction 147
- 8.1 Formulation of the Problem 147
- 8.2 Method of Solution 153
- 8.3 Numerical Results 157
- References 162

9 **Computation of the Interaction of a Laser Radiation Beam with an Aluminium Vessel and Its Vapor** by *V.M. Krivtsov, I.N. Naumova, Yu.D. Shmyglevskii, and V.I. Zubov* 165

- 9.1 Formulation of the Problem 165
- 9.2 Numerical Method 172
- 9.3 Results of Computations 180
- References 188

10 **Application of Moving Regular Grids to Computation of Gasdynamic Flows with Interfaces** by *A.A. Charakhch'yan* 189

- 10.1 Lagrangian Stage. Uniform Cells 191
- 10.2 Recalculation Stage. Uniform Cells 193
- 10.3 Mixed Cells 197
- 10.4 Test Problem 199
- 10.5 Compression of a Gas in Conical Rigid Targets 203
- References 209

11 **Construction of Curvilinear Grids for Computing Flows in Basins** by *S.A. Ivanenko* 211

- 11.1 Formulation of the Problem of a Grid Construction 211
- 11.2 The Winslow and Prokopov Methods 213
- 11.3 Set of Convex Grids 220
- 11.4 Algorithm Guaranteeing the Convexity of All Grid Cells 223
- 11.5 Modification [11.11] of the Algorithm [11.9, 11.10] Not Requiring the Construction of a Convex Grid as an Initial Approximation 226
- 11.6 Results of Computations on Grid Generation 230
- 11.7 Curvilinear Grids in the Method of Finite Elements 233
- 11.8 Simulation of Tides 237
- 11.9 Simulation of the Propagation of Conservative Contamination in a Reservoir 243
- References 250

12 **Simulation of Dynamics and Quality of Water in Bays, Large Lakes, and Reservoirs** by *P.P. Koryavov* 251

- 12.1 Basic Equations of the Three-dimensional Model 251
- 12.2 Basic Equations of the Two-dimensional Model 255
- 12.3 Numerical Simulation of Flows in the Onega Lake 256
- 12.4 Simulation of Tidal Flows in the Onega Bay 258
- 12.5 Flow Simulation in Reservoirs 261
- 12.6 Three-dimensional Model for Computing Flows in Large Lakes 264
- References 270

- 13 Gasdynamic Simulation of the Tunguska Event** by *P.I. Chushkin, V.P. Korobeinikov, and L.V. Shurshalov* 271
- 13.1 The Tunguska Event 271
 - 13.2 Investigation of the Tunguska Event 276
 - 13.3 Gasdynamic Simulation 279
 - 13.4 Flight Stage 281
 - 13.5 Explosion Stage 285
 - 13.6 Characteristics of the Tunguska Cosmic Body 289
 - 13.7 Conclusions 298
References 298
- 14 Simulation of Large-scale Anthropogenic Effects on Climate** by *G.L. Stenchikov* 301
- 14.0 Introduction 301
 - 14.1 Mathematical Description of the Climate System Evolution 303
 - 14.2 Computation of Undisturbed Climate Regimes and Their Sensitivity to Weak Aerosol Pollution of the Atmosphere 314
 - 14.3 Climatic Consequences of Nuclear War 319
 - 14.4 Conclusions 336
References 337
- 15 Stochastic Model of a Boltzmann Gas and Its Numerical Realization** by *V.E. Yanitskii* 339
- 15.0 Introduction 339
 - 15.1 Stochastic Analog of the Boltzmann Equation 341
 - 15.2 Algorithms for Numerical Realization of Particle Collisions in Cells 346
References 355
- 16 Method of Solving the Boltzmann Equation by Integration over Collision Parameters in Piecewise-constant Approximation** by *V.V. Aristov* 357
- 16.0 Introduction 357
 - 16.1 Description of the Numerical Method. Integration over Velocity Space in the Collision Operator 359
 - 16.2 Evaluation of Integrals over Collision Parameters 360
 - 16.3 Approximation of the Right-hand Side of the Equation by Quadratic Form and Properties of the Corresponding Matrices 365
 - 16.4 Simplifications for the Velocity Space with Different Types of Symmetry 367
 - 16.5 Nonuniform Relaxation Problem for the Boltzmann Equation 370
References 374
- 17 Numerical Analysis of the Flow of a Rarefied Gas for the Small Knudsen Numbers** by *V.A. Rykov* 377
- 17.0 Introduction 377
 - 17.1 Numerical Method 378
 - 17.2 Analysis of One-dimensional Gas Flows 383
 - 17.3 Method of Computing Two-dimensional Gas Flows 387
References 394
- Index 396
