

CONTENTS

PREFACE	xi
<u>CHAPTER I:</u> SOME MATHEMATICAL PROBLEMS OF THE THEORY OF ELASTICITY	1
§1. Some Functional Spaces and Their Properties. Auxiliary Propositions	1
§2. Korn's Inequalities	13
2.1. The First Korn Inequality	13
2.2. The Second Korn Inequality in Lipschitz Domains	14
2.3. The Korn Inequalities for Periodic Functions	21
2.4. The Korn Inequality in Star-Shaped Domains	23
§3. Boundary Value Problems of Linear Elasticity	29
3.1. Some Properties of the Coefficients of the Elasticity System	29
3.2. The Main Boundary Value Problems for the System of Elasticity	32
3.3. The First Boundary Value Problem (The Dirichlet Problem)	33
3.4. The Second Boundary Value Problem (The Neumann Problem)	36
3.5. The Mixed Boundary Value Problem	38
§4. Perforated Domains with a Periodic Structure. Extension Theorems	42
4.1. Some Classes of Perforated Domains	42
4.2. Extension Theorems for Vector Valued Functions in Perforated Domains	45

4.3. The Korn Inequalities in Perforated Domains	51
§5. Estimates for Solutions of Boundary Value Problems of Elasticity in Perforated Domains	55
5.1. The Mixed Boundary Value Problem	55
5.2. Estimates for Solutions of the Neumann Problem in a Perforated Domain	56
§6. Periodic Solutions of Boundary Value Problems for the System of Elasticity	59
6.1. Solutions Periodic in All Variables	59
6.2. Solutions of the Elasticity System Periodic in Some of the Variables	61
6.3. Elasticity Problems with Periodic Boundary Conditions in a Perforated Layer	64
§7. Saint-Venant's Principle for Periodic Solutions of the Elasticity System	67
7.1. Generalized Momenta and Their Properties	67
7.2. Saint-Venant's Principle for Homogeneous Boundary Value Problems	71
7.3. Saint-Venant's Principle for Non-Homogeneous Boundary Value Problems	73
§8. Estimates and Existence Theorems for Solutions of the Elasticity System in Unbounded Domains	84
8.1. Theorems of Phragmen-Lindelöf's Type	84
8.2. Existence of Solutions in Unbounded Domains	87
8.3. Solutions Stabilizing to a Constant Vector at Infinity	93
§9. Strong G -Convergence of Elasticity Operators	98
9.1. Necessary and Sufficient Conditions for the Strong G -Convergence	98
9.2. Estimates for the rate of Convergence of Solutions of the Dirichlet Problem for Strongly G -Convergent Operators	111

CHAPTER II:	
HOMOGENIZATION OF THE SYSTEM OF LINEAR ELASTICITY.	
COMPOSITES AND PERFORATED MATERIALS	119
§1. The Mixed Problem in a Perforated Domain with the Dirichlet Boundary Conditions on the Outer Part of the Boundary and the Neumann Conditions on the Surface of the Cavities	119
1.1. Setting of the Problem. Homogenized Equations	119
1.2. The Main Estimates and Their Applications	123
§2. The Boundary Value Problem with Neumann Conditions in a Perforated Domain	134
2.1. Homogenization of the Neumann Problem in a Domain Ω for a Second Order Elliptic Equation with Rapidly Oscillating Periodic Coefficients	134
2.2. Homogenization of the Neumann Problem for the System of Elasticity in a Perforated Domain. Formulation of the Main Results	140
2.3. Some Auxiliary Propositions	142
2.4. Proof of the Estimate for the Difference between a Solution of the Neumann Problem in a Perforated Domain and a Solution of the Homogenized Problem	149
2.5. Estimates for Energy Integrals and Stress Tensors	157
2.6. Some Generalizations	158
§3. Asymptotic Expansions for Solutions of Boundary Value Problems of Elasticity in a Perforated Layer	163
3.1. Setting of the Problem	163
3.2. Formal Construction of the Asymptotic Expansion	164
3.3. Justification of the Asymptotic Expansion. Estimates for the Remainder	171
§4. Asymptotic Expansions for Solutions of the Dirichlet Problem for the Elasticity System in a Perforated Domain	178
4.1. Setting of the Problem. Auxiliary Results	178

4.2. Justification of the Asymptotic Expansion	185
§5. Asymptotic Expansions for Solutions of the Dirichlet Problem for the Biharmonic Equation. Some Generalizations for the Case of Perforated Domains with a Non-Periodic Structure	191
5.1. Setting of the Problem. Auxiliary Propositions	191
5.2. Justification of the Asymptotic Expansion for Solutions of the Dirichlet Problem for the Biharmonic Equation	197
5.3. Perforated Domains with a Non-Periodic Structure	203
§6. Homogenization of the System of Elasticity with Almost-Periodic Coefficients	206
6.1. Spaces of Almost-Periodic Functions	206
6.2. System of Elasticity with Almost-Periodic Coefficients. Almost-Solutions	209
6.3. Strong G -Convergence of Elasticity Operators with Rapidly Oscillating Almost-Periodic Coefficients	217
§7. Homogenization of Stratified Structures	220
7.1. Formulas for the Coefficients of the Homogenized Equations. Estimates of Solutions	220
7.2. Necessary and Sufficient Conditions for Strong G -Convergence of Operators Describing Stratified Media	230
§8. Estimates for the Rate of G -Convergence of Higher-Order Elliptic Operators	245
8.1. G -Convergence of Higher-Order Elliptic Operators (the n -dimensional case)	245
8.2. G -Convergence of Ordinary Differential Operators	255

CHAPTER III:

SPECTRAL PROBLEMS	263
§1. Some Theorems from Functional Analysis.	
Spectral Problems for Abstract Operators	263
1.1. Approximation of Eigenvalues and Eigenvectors of Self-Adjoint Operators	263
1.2. Estimates for the Difference between Eigenvalues and Eigenvectors of Two Operators Defined in Different Spaces	266
§2. Homogenization of Eigenvalues and Eigenfunctions of Boundary Value Problems for Strongly Non-Homogeneous Elastic Bodies	275
2.1. The Dirichlet Problem for a Strongly G -Convergent Sequence of Operators	275
2.2. The Neumann Problem for Elasticity Operators with Rapidly Oscillating Periodic Coefficients in a Perforated Domain	279
2.3. The Mixed Boundary Value Problem for the System of Elasticity in a Perforated Domain	286
2.4. Free Vibrations of Strongly Non-Homogeneous Stratified Bodies	290
§3. On the Behaviour of Eigenvalues and Eigenfunctions of the Dirichlet Problem for Second Order Elliptic Equations in Perforated Domains	294
3.1. Setting of the Problem. Formal Constructions	294
3.2. Weighted Sobolev Spaces. Weak Solutions of a Second Order Equation with a Non-Negative Characteristic Form	296
3.3. Homogenization of a Second Order Elliptic Equation Degenerate on the Boundary	308
3.4. Homogenization of Eigenvalues and Eigenfunctions of the Dirichlet Problem in a Perforated Domain	313
§4. Third Boundary Value Problem for Second Order Elliptic Equations in Domains with Rapidly Oscillating	

Boundary	317
4.1. Estimates for Solutions	317
4.2. Estimates for Eigenvalues and Eigenfunctions	323
§5. Free Vibrations of Bodies with Concentrated Masses	327
5.1. Setting of the Problem	327
5.2. The case $-\infty < m < 2, n \geq 3$	330
5.3. The case $m > 2, n \geq 3$	333
5.4. The case $m = 2, n \geq 3$	340
§6. On the Behaviour of Eigenvalues of the Dirichlet Problem in Domains with Cavities Whose Concentration is Small	348
§7. Homogenization of Eigenvalues of Ordinary Differential Operators	354
§8. Asymptotic Expansion of Eigenvalues and Eigenfunctions of the Sturm-Liouville Problem for Equations with Rapidly Oscillating Coefficients	356
§9. On the Behaviour of the Eigenvalues and Eigenfunctions of a G -Convergent Sequence of Non-Self-Adjoint Operators	367
