I. FLOW SIMULATION WITH MASSIVELY PARALLEL SYSTEMS	1
J.Argyris, H.Friz, F.Off: Domain Composition and Operator Splitting for Parallel Finite Element Computations of Viscous Real Gas Flow	3
J.Argyris, H.-U.Schlageter: Visualisation of Analysis Data with Reference to CFD	18
G.Bader, E.Gehrke: Solution of Flame Sheet Models on Transputer Systems	31
A.Bode, M.Lenke, S.Wagner, Th.Michl: Implicit Euler Solver on Alliant FX/2800 and Intel iPSC/860 Multiprocessors	41
J.Burmeister: Time-Parallel Multi-Grid Methods	56
O.Dorok, G.Lube, U.Risch, F.Schieweck, L.Tobiska: Finite Element Discretizations of the Navier-Stokes Equations	67
F.Durst, M.Perić, M.Schäfer, E.Schreck: Parallelization of Efficient Numerical Methods for Flows in Complex Geometries	79
P.-W.Gräber, Th.Müller: The Use of Vector Computers and Transputer Networks in the Simulation of Migration Processes in the Soil and Ground Water Zone	93
M.Griebel, W.Huber, C.Zenger: A Fast Poisson Solver for Turbulence Simulation on Parallel Computers Using Sparse Grids	101
W.Juling, K.Kremer: The Massively Parallel Computer System of the DFG Priority Research Programme "Flow Simulation on Supercomputers" ..	114
F.Lohmeyer, O.Vornberger: CFD with Parallel FEM on Transputer Networks	124
M.Meinke, E.Ortner: Implementation of Explicit Navier-Stokes Solvers on Massively Parallel Systems	138
S.Pokorny, M.Faden, K.Engel: Development of a Simulation System for 3-Dimensional Unsteady Turbomachinery Flow	152
II. TRANSITION AND TURBULENCE	167
C.Härtel, L.Kleiser: Large-Eddy Simulation of Transitional and Turbulent Wall-Bounded Flows	169
M.Manhart, H.Wengle: Eigenmode Decomposition of the Turbulent Velocity and Vorticity Fields Above a Square Rib	186
F.Unger, R.Friedrich: Numerical Simulation of Fully Developed Turbulent Pipe Flow	201

	Page
III. GENERAL SOLUTION TECHNIQUES AND APPLICATIONS	217
D.Bohn, R.Emunds, Z.Sucharski: Numerical Simulation of the Influence of the Unsteady Influx on the Three-Dimensional, Viscous Flow Through Turbomachines	219
W.Borchers: A Fourier Spectral Method for Incompressible Viscous Flows Past Obstacles	233
M.Breuer: Numerical Simulation of Incompressible Flows by the Method of Artificial Compressibility	249
F.Durst, Ž.Lilek, M.Perić: Development and Application of an Efficient Solution Method for Flows in Complex Geometries	264
J.Fischer, E.H.Hirschel: Adaptive Navier-Stokes Calculations Using a Combination of an Implicit Finite-Volume Method with a Hierarchically Ordered Grid Structure	279
D.Hänel, R.Vilsmeier: Computations of Flow on Adaptive Unstructured Grids	295
D.Nellessen, J.Ballmann: Numerical Simulation of Flutter Using the Euler Equations	308
H.Reichert, G.Wittum: Solving the Navier-Stokes Equations on Unstructured Grids	321
W.Rick, H.Greza, W.Koschel: FCT-Solution and Adapted Unstructured Meshes for Compressible High Speed Flow Computations	334
D.Rues, G.Brenner, U.Prinz: Numerical Simulation of Chemically Reacting Hypersonic Flows	349
I.Teipel, A.Wiedermann, W.Evers: Simulation of Flow Fields in High-Loaded Centrifugal Compressors	364
J.Wiesbaum, H.Holthoff, E.Laurien, W.Rönsch: Experiences with the Taylor-Galerkin Finite-Element Method for Hypersonic Aerothermodynamics on Supercomputers	379
L.Xue, Th.Rung, F.Thiele: Simulation of Unsteady Viscous Three-Dimensional Flow Fields Using a Two Stream Function Formulation	393
