

# CONTENTS

	<b>INTRODUCTION</b>	1
<b>CHAPTER 1</b>	<b>PHYSICAL FRAMEWORK</b>	3
1	Introductory concepts	3
2	Irreversible thermodynamics	8
3	The equations of magnetofluid dynamics	10
4	The plasma model	12
<b>CHAPTER 2</b>	<b>INTRODUCTORY CONCEPTS FOR WAVE MOTIONS</b>	18
1	The kinematic wave equation and the shock-fitting	19
2	Basic properties of asymptotic expansions	29
3	The perturbation-reduction method	36
<b>CHAPTER 3</b>	<b>RAY METHODS FOR LINEAR WAVES</b>	44
1	Phase and group velocity of a wave train	45
2	Two-timing methods	49
<b>CHAPTER 4</b>	<b>RAY METHODS FOR NONLINEAR HYPERBOLIC WAVES</b>	57
1	Asymptotic waves for quasilinear systems	58
2	Acoustic waves in a gravitational atmosphere	62
<b>CHAPTER 5</b>	<b>RAY METHOD FOR THE PROPAGATION OF DISCONTINUITIES</b>	68
1	General formalism	69
2	The evolution of weak discontinuities	71
3	Characteristic shocks	74
4	Intermediate discontinuities	75
<b>CHAPTER 6</b>	<b>GENERALIZED WAVEFRONT EXPANSION FOR WEAK SHOCKS</b>	78
1	Derivation of the basic equations	79
2	Geometrical interpretation and applications to acoustic shocks in a constant state	83
3	Relationship with weakly nonlinear geometrical optics	85
<b>CHAPTER 7</b>	<b>SMALL TIME ANALYSIS AND SHOCK STABILITY</b>	89
1	One dimensional analysis	90
2	Multidimensional case	94
3	Propagation into a constant state and definition of corrugation stability	97
4	Application to gasdynamics	99

## CONTENTS

<b>CHAPTER 8</b>	<b>RAY METHODS FOR NONLINEAR DISPERSIVE WAVES . . . . .</b>	104
1	Perturbation-reduction methods in several dimensions:	
2	derivation of the generalized Kdv or Burgers equations . .	104
3	Solutions of the generalized KdV equation . . . . .	109
4	Applications to plasmas . . . . .	110
5	Derivation of the generalized KP equation: application to plasmas . . . . .	113
6	Derivation of the generalized nonlinear Schrödinger equation . . . . .	117
7	Derivation of the KP equation for magnetosonic waves . .	123
<b>CHAPTER 9</b>	<b>RAY METHODS FOR NONLINEAR DISSIPATIVE WAVES . . . . .</b>	132
1	The generalized Burgers equation . . . . .	132
2	Acoustic waves in a thermoviscous fluid . . . . .	133
3	Two-dimensional Burgers equation . . . . .	136
4	Collisional plasma . . . . .	137
<b>CHAPTER 10</b>	<b>INTERACTION OF DISPERSIVE WAVES . . . . .</b>	141
1	The tri-resonance condition . . . . .	141
2	Quadratically nonlinear interaction of dispersive waves .	146
3	A long wave equation . . . . .	156
4	Internal waves . . . . .	161
5	Passage through resonance . . . . .	171
<b>CHAPTER 11</b>	<b>INTERACTION OF HYPERBOLIC WAVES . . . . .</b>	180
1	The tri-resonance condition for scale invariant wave motions . . . . .	180
2	Resonant interactions of hyperbolic waves in one space dimension . . . . .	186
3	The tri-resonance condition for hyperbolic waves . . . .	192
4	Resonant interaction of hyperbolic waves in several space dimensions . . . . .	197
5	Gas dynamics . . . . .	200
6	Elasticity . . . . .	214
	<b>Appendix A1 . . . . .</b>	229
	<b>Appendix A2 . . . . .</b>	235
	<b>Appendix A3 . . . . .</b>	236
	<b>Appendix A4 . . . . .</b>	238
	<b>Appendix A5 . . . . .</b>	239
	<b>Appendix A6 . . . . .</b>	241
	<b>Appendix A7 . . . . .</b>	242
	<b>Subject Index . . . . .</b>	245
