BACKGROUND

1 Introduction	
1.1 Intuitive Background	3
1.2 Abstract Models: Basic Terminology	5
1.3 Skill, Chance, and Strategy	9
1.4 Historical Background	11
1.5 Summary	13
2 One-Person Games	
2.1 Games Against Nature	14
2.2 Certainty	14
2.3 Risk	16
2.4 Utility Theory	18
2.5 Uncertainty	22
2.6 Summary	30
3 Pure Coordination Games and the Minimal Social Situation	
3.1 Strategic Collaboration	31
3.2 Pure Coordination Games	31
3.3 The Minimal Social Situation	37
3.4 Summary	44

THEORY AND EMPIRICAL EVIDENCE

4 Two-Person, Zero-Sum Games	
4.1 Strictly Competitive Games	47
4.2 Extensive and Normal Forms	48
4.3 Games With Saddle-Points	51
4.4 Games Without Saddle-Points	54
4.5 Dominance and Admissibility	61
4.6 Methods for Finding Solutions	63
4.7 Ordinal Payoffs and Incomplete Information	68
4.8 Summary	73

5	Experiments With Strictly Competitive Games	
5.1	Ideas Behind Experimental Games	74
5.2	Review of Research on Non-Saddle-Point Games	76
5.3	Review of Research on Saddle-Point Games	80
5.4	Critique of Experimental Gaming	82
5.5	Experiment I: Abstract and Lifelike Strictly Competitive Games	85
5.6	Summary	92
6	Two-Person, Mixed-Motive Games: Informal Game Theory	
6.1	Mixed-Motive Games	93
6.2	Classification of 2×2 Mixed-Motive Games	94
6.3	Leader	95
6.4	Battle of the Sexes	97
6.5	Chicken	98
6.6	Prisoner's Dilemma	101
6.7	Comparison of the Archetypal 2×2 Games	105
6.8	Metagame Theory	107
6.9	Summary	112
7	Experiments With Prisoner's Dilemma and Related Games	
7.1	The Experimental Gaming Literature	113
7.2	Strategic Structure	114
7.3	Payoffs and Incentives	118
7.4	Circumstances of Play	119
7.5	Responses to Programmed Strategies	123
7.6	Sex Differences	124
7.7	Attribution Effects	126
7.8	Investigations of Ecological Validity	128
7.9	Experiment II: Abstract and Lifelike Prisoner's Dilemma Games	131
7.10	Experiment III: Abstract and Lifelike Chicken Games	136
7.11	Summary	140
8	Multi-Person Games: Social Dilemmas	
8.1	Multi-Person Game Theory	142
8.2	Non-Cooperative Games: Equilibrium Points	144
8.3	Cooperative Games: Characteristic Functions	145
8.4	Harold Pinter's "The Caretaker"	149
8.5	The Shapley Value	151
8.6	The Dollar Auction Game and the Concorde Fallacy	153
8.7	Multi-Person Prisoner's Dilemma	156
8.8	General Theory of Compound Games	163
8.9	Summary	166

9 Experiments with Coalition, Auction, & Social Dilemma Games	
9.1 Multi-Person Experimental Games	168
9.2 Coalition Formation	169
9.3 Auction Games and Psychological Traps	173
9.4 N-Person Prisoner's Dilemma	178
9.5 Experiment IV: Abstract and Lifelike N-Person Prisoner's Dilemmas	184
9.6 Summary	190

APPLICATIONS

10 Sincere Voting and Collective Choice Theory	
10.1 Background	195
10.2 Alternatives, Voters, Preferences	196
10.3 Axioms Concerning Individual Preferences	197
10.4 Voting Procedures	198
10.5 Condorcet's Paradox	201
10.6 Probabilities of Cyclic Majorities	204
10.7 Arrow's Impossibility Theorem	207
10.8 The Borda Effect	210
10.9 Summary	213
11 Strategic Voting	
11.1 Optimal Voting Strategies	214
11.2 Historical Background	215
11.3 Insincere Voting and Equilibrium Points	215
11.4 The Classical Solution: Dominance and Admissibility	219
11.5 Sophisticated Voting	222
11.6 Anticipated Decisions and Multistage Solutions	224
11.7 General Results on Strategic Voting	228
11.8 Is Strategic Voting Unfair?	231
11.9 Empirical Evidence	233
11.10 Summary	234
12 Theory of Evolution: Strategic Aspects	
12.1 Historical Background	235
12.2 Strategic Evolution	235
12.3 Animal Conflicts and Evolutionarily Stable Strategies	238
12.4 An Improved Multi-Person Game Model	243
12.5 Empirical Evidence	250
12.6 Summary	253

13	Moral Philosophy and Practical Problems of Strategy	
13.1	Game Theory and the Conduct of Life	254
13.2	Rationality and Self-Interest	257
13.3	Kant's Categorical Imperative	262
13.4	Rousseau's Social Contract	264
13.5	Evolution and Stability of Moral Principles	266
13.6	Summary	268
	<i>Appendix A: A Simple Proof of the Minimax Theorem</i>	
A.1	Introductory Remarks	273
A.2	Preliminary Formalization	273
A.3	The Minimax Theorem	274
A.4	Proof	275
	<i>References</i>	281
	<i>Index</i>	295
