

# CONTENTS

CHAPTER 1	INTRODUCTION AND SUMMARY	1
	1.1 Introduction	1
	1.2 Summary of the following chapters	3
	1.3 Advices to the reader	6
CHAPTER 2	MATHEMATICAL PROGRAMMING AND DUALITY THEORY	9
	2.1 Introduction	9
	2.2 Mathematical programming problems	9
	2.3 Conjugate duality	11
	References	19
CHAPTER 3	STOCHASTIC LINEAR PROGRAMMING MODELS	21
	3.1 Introduction	21
	3.2 Chance constraints, recourse actions and utility functions	24
	3.3 Multistage stochastic linear programming models and their relation to stochastic dynamic programming	39
	References	44
CHAPTER 4	SOME LINEAR PROGRAMS IN PROBABILITIES AND THEIR DUALS	49
	4.1 Introduction	49
	4.2 Dual linear programs	51
	4.3 Linear programming in probabilities	58
	4.4 Moment problems	66
	4.5 The marginal problem	80
	4.6 The stochastic programming problem	86
	4.7 Conclusions	107
	References	108

CHAPTER 5	ON INTEGRATED CHANCE CONSTRAINTS	113
5.1	Introduction	113
5.2	Single integrated chance constraints	115
5.3	Joint integrated chance constraints	134
5.4	Integrated chance constraints and recourse models	135
5.5	Conclusions	137
	References	138
CHAPTER 6	ON THE BEHAVIOUR OF THE OPTIMAL VALUE OPERATOR OF DYNAMIC PROGRAMMING	139
6.1	Introduction	139
6.2	The main theorem	143
6.3	Proof of the main theorem	148
6.4	Markovian inventory control models	153
	References	163
CHAPTER 7	ROBUSTNESS AGAINST DEPENDENCE IN PERT	165
7.1	Introduction	165
7.2	The marginal problem and its dual	167
7.3	Critical activities in a project network	175
7.4	A minimax approach to project planning	181
7.4.1	Introduction	181
7.4.2	The inner problem, its dual and its reduced dual	185
7.4.3	The dual of the reduced dual problem	194
7.4.4	The optimal solutions of the inner problem	201
7.4.5	The outer problem	208
7.4.6	Worst-case marginals	211
7.4.7	Numerical calculations	212
	References	215
CHAPTER 8	A DUAL OF A DYNAMIC INVENTORY CONTROL MODEL: THE DETERMINISTIC AND THE STOCHASTIC CASE	219
8.1	Introduction	219
8.2	Deterministic demands	221
8.2.1	Formulation of the problem	222
8.2.2	The dynamic programming recursion	223
8.2.3	The differentiable form of the dynamic programming recursion	225

8.2.4 The linear program and its dual	226
8.2.5 A dual dynamic programming method	234
8.2.6 A conjugate dual dynamic programming method	237
8.3 Stochastic demands	243
8.3.1 Formulation of the problem	244
8.3.2 Some notations and remarks on conditional expectations	246
8.3.3 The dynamic programming recursion	251
8.3.4 The linear program and its dual	259
8.3.5 The differentiable form of the dynamic programming recursion	266
8.3.6 A dual dynamic programming method	280
8.3.7 A conjugate dual dynamic programming method	282
8.4 Economic interpretations	284
References	289
