

# Contents

<b>Introduction</b>		1
<b>1. Using Games and Puzzles in Mathematics Instruction</b>		3
Commercial Games for the Arithmetic Class March 1958	<i>Donovan A. Johnson</i>	5
The Role of Games, Puzzles, and Riddles in Elementary Mathematics November 1963	<i>Dora Dohler</i>	7
Fostering Enthusiasm through Child-created Games February 1970	<i>Sarah R. Golden</i>	10
Mathematics Games in the Classroom March 1974	<i>Donald R. Kerr, Jr.</i>	15
Sparking Interest in the Mathematics Classroom March 1970	<i>Donald L. Bradfield</i>	19
Payoff in Increased Instructional Time and Enrichment Activities December 1972	<i>Robert E. Rea and James French</i>	23
<b>2. Whole Numbers</b>		29
Games for the Early Grades February 1966	<i>Edwina Deans</i>	31
Creative Drill with Pictures April 1973	<i>Richard Crouse and Elizabeth Rinehart</i>	33
Secret Number Sentence February 1969	<i>William L. Swart</i>	36
Making Drill More Interesting February 1974	<i>W. H. Patterson, Jr.</i>	38
Go Shopping! Problem-solving Activities for the Primary Grades with Provisions for Individualization November 1970	<i>Sylvia Orans</i>	41
They All Add Up April 1974	<i>M. Jane Heckman</i>	43
Mastering the Basic Facts with Dice May 1973	<i>Howard Y. Gosman</i>	46
Let's Play Computer March 1974	<i>Elaine V. Bartel</i>	48
Multi-bet December 1973	<i>Arthur K. Miki</i>	50
Arithmetic Games February 1972	<i>Clyde A. Dilley and Walter E. Rucker</i>	52

The Witch's Best Game December 1966	<i>C. Winston Smith, Jr.</i>	54
A Game for Reviewing Basic Facts of Arithmetic November 1972	<i>Edward E. Arnsdorf</i>	56
"Contig": A Game to Practice and Sharpen Skills and Facts in the Four Fundamental Operations May 1972	<i>Frank W. Broadbent</i>	58
Cardematics I—Using Playing Cards as Reinforcers and Motivators in Basic Operations May 1974	<i>Seymour Metzner and Richard M. Sharp</i>	61
Green Chimneys Poker May 1974	<i>T. Ristorcelli</i>	64
Diffy October 1971	<i>Herbert Wills</i>	65
Magic Triangles—Practice in Skills and Thinking October 1974	<i>Donald L. Zalewski</i>	69
Easy Construction of Magic Squares for Classroom Use February 1965	<i>John Cappon, Sr.</i>	73
<b>3. Numeration</b>		79
A Place-Value Game for First Graders—a Teacher-made Device November 1957	<i>Irene R. MacRae</i>	80
Placo—a Number-Place Game May 1968	<i>Robert C. Calvo</i>	82
The Game of Five May 1963	<i>Harold J. Shurlow</i>	84
From Second Base to Third Base November 1973	<i>Michael Alfonso, Richard Balzer, and Paul Hartung</i>	86
A Game Introduction to the Binary Numeration System December 1971	<i>John Niman</i>	89
Tantalizing Ternary December 1968	<i>Ernest R. Ranucci</i>	91
<b>4. Integers</b>		97
Integer "Football" October 1973	<i>Virginia C. Demchik</i>	98
Subtraction of Integers—Discovered through a Game February 1969	<i>Esther Milne</i>	100

Climb the Ladder May 1969	<i>Albert H. Mauthe</i>	102
Play Shuffleboard with Negative Numbers May 1969	<i>Charlotte Frank</i>	105
Disguised Practice for Multiplication and Addition of Directed Numbers May 1969	<i>Esther Milne</i>	108
A Student-constructed Game for Drill with Integers November 1972	<i>Merle Mae Cantlon, Doris Homan, and Barbara Stone</i>	110
Grisly Grids May 1969	<i>William G. Mehl and David W. Mehl</i>	113
Editorial Feedback December 1970	<i>Mary Helen Bean</i>	116
<b>5. Rational Numbers</b>		119
A Game of Fractions October 1966	<i>Charlotte W. Junge</i>	121
Crazy Fractions: An Equivalence Game April 1973	<i>Ernest Carlisle</i>	122
Fracto April 1974	<i>Marie Molinoski</i>	123
The Conversion Game January 1971	<i>Beth Ellen Lazerick</i>	124
“Fradécent”—a game Using Equivalent Fractions, Decimals, and Percents March 1972	<i>Charles Armstrong</i>	126
An Adventure in Division May 1968	<i>Lois Stephens</i>	128
Introduction to Ratio and Proportion February 1969	<i>Roland L. Brousseau, Thomas A. Brown, and Peter J. Johnson</i>	131
Make a Whole—a Game Using Simple Fractions February 1971	<i>Joann Rode</i>	133
A Game with Fraction Numbers January 1970	<i>Richard Thomas Zytkowski</i>	135
<b>6. Number Theory and Patterns</b>		137
Fun Can Be Mathematics November 1969	<i>Audrey Kopp and Robert Hamada</i>	139
Bang, Buzz, Buzz-Bang, and Prime October 1969	<i>Ernest E. Allen</i>	141

Prime: A Drill in the Recognition of Prime and Composite Numbers February 1969	<i>Gregory Holdan</i>	142
The Factor Game November 1973	<i>J. B. Harkin and D. S. Martin</i>	145
Five “Nontrivial” Number Games November 1972	<i>Terrel Trotter, Jr.</i>	148
Magic Squares: Extensions into Mathematics March 1974	<i>Daiyo Sawada</i>	151
“Interest Getters” April 1968	<i>Karl G. Zahn</i>	157
Just for Fun May 1968	<i>J. D. Caldwell</i>	160
<b>7. Geometry and Measurement</b>		161
Don’t Miss the Train February 1973	<i>Corinna Porlier</i>	163
Procedures for Designing Your Own Metric Games for Pupil Involvement May 1974	<i>Cecil R. Trueblood and Michael Szabo</i>	167
Geo-Gin April 1974	<i>Janis A. Berman</i>	172
Paper Folding and Cutting a Set of Tangram Pieces April 1971	<i>Steven S. Dickoff</i>	174
A Game with Shapes April 1969	<i>Daisy Gogan</i>	177
An Example of Informal Geometry: Mirror Cards October 1966	<i>Marion Walter</i>	179
Popsicle Sticks and Flying Polygons October 1970	<i>Charles Lund</i>	184
The Try-Angle Puzzle November 1956	<i>George Janicki</i>	185
A Pythagorean Puzzle January 1972	<i>Gary D. Hall</i>	186
Tic-Tac-Toe—a Mathematical Game for Grades 4 through 9 October 1967	<i>Robert A. Timmons</i>	189
Hide-a-Region— $N \geq 2$ Can Play October 1969	<i>Jean S. Overholser</i>	192
Cartesian Coordinates and Battleship May 1974	<i>William R. Bell</i>	194
Holiday Plot-Dots February 1974	<i>Gary A. Deatsman</i>	195

Stick Puzzle October 1959	<i>Anonymous</i>	197
A Game of Squares November 1956	<i>George Janicki</i>	198
Cross-Figure Puzzle—Measures February 1956	<i>George Janicki</i>	198
<b>8. Reasoning and Logic</b>		199
Rainy-Day Games April 1972	<i>Robert C. Gessel, Carolyn Johnson, Marty Boren, and Charles Smith</i>	201
Nu-Tic-Tac-Toe November 1965	<i>Harry D. Ruderman</i>	203
Computers Teach Math May 1968	<i>Judy Ackerman</i>	205
KALAH—an Ancient Game of Mathematical Skill May 1964	<i>John B. Haggerty</i>	207
A Project for the Low-Budget Mathematics Laboratory: The Game of Kalah December 1974	<i>Randall L. Brill</i>	212
Drill Some Fun into Your Mathematics Class May 1974	<i>Marie Massé</i>	215
Jupiter Horse Race January 1973	<i>Elinor J. Witt</i>	217
A Coin Trick March 1956	<i>Anonymous</i>	219
Paper, Pencil, and Book December 1973	<i>Henry Lulli</i>	219
<b>9. Multipurpose Games and Puzzles</b>		221
Active Games: An Approach to Teaching Mathematical Skills to the Educable Mentally Retarded December 1974	<i>George R. Taylor and Susan T. Watkins</i>	222
More Games for the Early Grades March 1966	<i>Edwina Deans</i>	226
A Deck of Cards, a Bunch of Kids, and Thou February 1969	<i>Peter K. Gurau</i>	229
Arithmetic Card Games December 1968	<i>Martin H. Hunt</i>	231
Arithmetic Football November 1956	<i>Earl A. Karau</i>	234
Television Games Adapted for Use in Junior High Mathematics Classes March 1973	<i>Doris Homan</i>	236

The Concentration Game January 1972	<i>Homer F. Hampton</i>	240
The Match Game March 1972	<i>Larry Holtkamp</i>	243
A Cross-Number Puzzle for St. Patrick's Day March 1957	<i>Margaret F. Willerding</i>	244
Dominoes in the Mathematics Classroom January 1971	<i>Tom E. Massey</i>	245
A Cross-Number Puzzle for Valentine's Day February 1957	<i>Margaret F. Willerding</i>	246
A Cross-Number Puzzle for Junior High School November 1957	<i>Margaret F. Willerding</i>	247
A Cross-Number Puzzle for Intermediate Grades November 1957	<i>Margaret F. Willerding</i>	248
A Cross-Number Puzzle for Primary Grades November 1957	<i>Margaret F. Willerding</i>	249
Mathematicalosterns January 1969	<i>Sally Mathison</i>	250
Editorial Feedback December 1969	<i>Verne G. Jeffers</i>	252
Two Mathematical Games with Dice January 1974	<i>Ronald G. Good</i>	254
Three Games May 1971	<i>Bruce F. Godsave</i>	257
Take a Mathematical Holiday December 1968	<i>Elaine McCalla</i>	260
Classroom Experiences with Recreational Arithmetic April 1956	<i>Ruth H. Nies</i>	262
"Arithmecode" Puzzle February 1968	<i>David F. Winick</i>	266
Arithmetical Brain-Teasers for the Young January 1967	<i>Henry Winthrop</i>	268
"Parallelograms": A Simple Answer to Drill Motivation and Individualized Instruction November 1971	<i>Benny F. Tucker</i>	270
Take a Chance with the Wheel of Fortune November 1970	<i>Barbara Rosser</i>	274
Using Functional Bulletin Boards in Elementary Mathematics October 1972	<i>William E. Schall</i>	276
