

CONTENTS

PREFACE	v
0 Preliminaries	1
Part I <i>Stochastic Two-Stage Problems</i>	11
1 Convex Case	14
2 Nonconvex Case	17
3 Stability	20
4 Epi-Convergence	22
5 Saddle Property	25
6 Stochastic Independence	30
7 Special Convex Cases	32
Part II <i>Duality and Stability in Convex Optimization</i> <i>(Extended Results for the Saddle Case)</i>	37
8 Characterization and Properties of Saddle Functions	41
9 Primal and Dual Collections of Programs	46
10 Normal and Stable Programs	54
11 Relation to McLinden's Results	58
12 Application to Convex Programming	62
Part III <i>Barycentric Approximation</i>	67
13 Inequalities and Extremal Probability Measures - Convex Case	71
14 Inequalities and Extremal Probability Measures - Saddle Case	80
15 Examples and Geometric Interpretation	99
16 Iterated Approximation and \times -Simplicial Refinement	106
17 Application to Stochastic Two-Stage Programs	113
18 Convergence of Approximations	116
19 Refinement Strategy	118
20 Iterative Completion	122

Part IV	<i>An Illustrative Survey of Existing Approaches in Stochastic Two-Stage Programming</i>	125
21	Error Bounds for Stochastic Programs with Recourse (due to Kall & Stoyan)	127
22	Approximation Schemes discussed by Birge & Wets	131
23	Sublinear Bounding Technique (due to Birge & Wets)	134
24	Stochastic Quasigradient Techniques (due to Ermoliev)	137
25	Semi-Stochastic Approximation (due to Marti)	139
26	Benders' Decomposition with Importance Sampling (due to Dantzig & Glynn)	141
27	Stochastic Decomposition (due to Higle & Sen)	146
28	Mathematical Programming Techniques	149
29	Scenarios and Policy Aggregation (due to Rockafellar & Wets)	151
Part V	<i>BRAIN - BaRycentric Approximation for INtegrands (Implementation Issues)</i>	159
30	Storing Distributions given through a Finite Set of Parameters	161
31	Evaluation of Initial Extremal Marginal Distributions	163
32	Evaluation of Initial Outer and Inner Approximation	167
33	Data for \times -Simplicial Partition	169
34	Evaluation of Extremal Distributions - Iteration J	174
35	Evaluation of Outer and Inner Approximation - Iteration J	178
36	\times -Simplicial Refinement	179
Part VI	<i>Solving Stochastic Linear Two-Stage Problems (Numerical Results and Computational Experiences)</i>	185
37	Testproblems from Literature	188
38	Randomly Generated Testproblems	199
	BIBLIOGRAPHY	219
