

# Contents

<b>1.</b>	<b>General Introduction</b> .....	11
<b>2.</b>	<b>Basic Concepts and Definitions</b> .....	18
2.1.	Notation and Basic Concepts .....	18
2.2.	Point-to-Set Mappings: Definitions and Elementary Properties .....	25
2.3.	Continuous Selection Functions for Lower Semicontinuous Point-to-Set Mappings .....	28
<b>3.</b>	<b>Point-to-Set Mappings with Given Structure</b> .....	35
3.1.	Continuity of Parametric Inequalities with Compactness or Constraint Qualifications .....	35
3.2.	Solution Sets of Special Parametric Systems of Inequalities Satisfying Convexity Conditions .....	43
3.3.	Perturbations of the Right-Hand Sides under Convex Constraints .....	50
3.4.	Solution Sets of Parametric Linear Systems of Inequalities with or without Integer Conditions .....	54
<b>4.</b>	<b>Stability Considerations</b> .....	59
4.1.	Introduction .....	59
4.2.	Relations between Continuity Properties of the Extreme Value Function and the Optimal Set and Constraint Set Mappings .....	60
4.3.	Convex Parametric Problems .....	65
4.4.	Duality and Non-Linear Optimization .....	77
4.5.	Mixed-Integer Quadratic Problems .....	81
<b>5.</b>	<b>Properties of Characteristic Parameter Sets for Special Classes of Optimization Problems</b> .....	91
5.1.	Introduction .....	91
5.2.	Parametric Optimization Problems with Fixed Constraint Sets .....	96
5.3.	Convex Quadratic Optimization Problems with Parameters in the Objective Function and the Right-Hand Sides of the Linear Constraints .....	107
5.4.	Linear Complementarity Problems with Parameters in the Right-Hand Sides of the Constraints .....	119
5.5.	Convex Quadratic Optimization Problems Having Parameters in the Linear Part of the Objective Function and in the Right-Hand Sides of the Constraints .....	130
5.6.	Linear Parametric Optimization Problems with Integer Conditions and Parameters in the Objective Function and in the Right-Hand Sides of the Linear Constraints .....	145
<b>6.</b>	<b>On Procedures for Analysing Parametric Optimization Problems</b> .....	154
6.1.	Introduction .....	154
6.2.	Two Procedures for Solving Parameter-Dependent Linear Complementarity Problems .....	157
6.3.	On the Approximative Calculation of Selection Functions for Non-Linear Parametric Optimization Problems with Differentiability Properties .....	167

---

<b>Appendix</b> .....	187
A.1.    Convex Polyhedral Cones and Associated Polar Cones .....	187
A.2.    Certain Classes of Square Matrices and Their Interrelations .....	189
A.3.    Various Results on the Solution Set of a Linear Complementarity Problem .....	189
A.4.    Convex Quadratic Optimization Problems .....	192
A.5.    Constraint Qualifications and Optimality Conditions for Non-Linear Optimization Problems: Some Results .....	193
<b>Bibliography</b> .....	197
<b>Main Statements in Relation to Stability of Special Classes of Parametric Optimization Problems</b> .....	227
<b>Index</b> .....	228
