

Contents

Preface vii

Part 1: Discrete Mathematics: Perspectives and Issues

1. Discrete Mathematics: The Math for Our Time 1
John A. Dossey, Illinois State University, Normal, Illinois

2. A Cautionary Note 10
Anthony D. Gardiner, University of Birmingham, Birmingham, United Kingdom

Part 2: Teaching Discrete Mathematics in Grades K–8

3. Strengthening a K–8 Mathematics Program with Discrete Mathematics 18
Claire Zalewski Graham, Framingham State College, Framingham, Massachusetts

4. Graph Chasing across the Curriculum: Paths, Circuits, and Applications 30
Steven C. Althoen, University of Michigan–Flint, Flint, Michigan
Johanna L. Brown, Swartz Creek Middle School, Swartz Creek, Michigan
Robert J. Bumcrot, Hofstra University, Hempstead, New York

5. Primary Experiences in Learning What (As Well as How) to Count 44
Jane F. Schielack, Texas A&M University, College Station, Texas

6. Discrete Mathematics in the Traditional Middle School Curriculum 51
James R. Hersberger, Indiana University–Purdue University at Fort Wayne, Fort Wayne, Indiana
William G. Frederick, Indiana University–Purdue University at Fort Wayne, Fort Wayne, Indiana
Marc L. Lipman, Indiana University–Purdue University at Fort Wayne, Fort Wayne, Indiana

7. The Pigeonhole Principle: A Counting Technique for the Middle Grades 55
Denise A. Spangler, Illinois State University, Normal, Illinois

8. Permutations and Combinations: A Problem-solving Approach for Middle School Students 59
Linda J. DeGuire, California State University, Long Beach, California

Part 3: Teaching Discrete Mathematics in Grades 7–12

9. Discrete Mathematics: An Exciting and Necessary Addition to the Secondary School Curriculum..... 67
Eric W. Hart, Maharishi International University, Fairfield, Iowa
10. The Roles of Finite and Discrete Mathematics in College and High School Mathematics 78
Kenneth P. Bogart, Dartmouth College, Hanover, New Hampshire

Part 4: Topics in Discrete Mathematics: Graph Theory

11. Graph Theory in the High School Curriculum 87
Robert L. Holliday, Lake Forest College, Lake Forest, Illinois
12. Discovering and Applying Euler's Formula..... 96
Donald W. Miller, University of Nebraska–Lincoln, Lincoln, Nebraska

Part 5: Topics in Discrete Mathematics: Matrices

13. Matrices at the Secondary School Level 104
Denisse R. Thompson, University of Chicago, Chicago, Illinois
Sharon L. Senk, University of Chicago, Chicago, Illinois
Steven S. Viktora, Kenwood Academy, Chicago, Illinois
14. A Computer-based Discrete Mathematics Course 117
Arnold E. Perham, Saint Viator High School, Arlington Heights, Illinois
Bernadette H. Perham, Ball State University, Muncie, Indiana

Part 6: Topics in Discrete Mathematics: Counting Methods

15. Using Dominoes to Introduce Combinatorial Reasoning 128
Jerry Johnson, Western Washington University, Bellingham, Washington
16. Combinatorics and Geometry 137
Vincent P. Schielack, Jr., Texas A&M University, College Station, Texas

17. Counting with Generating Functions.....143
Lisa J. Evered, Iona College, New Rochelle, New York
Brian Schroeder, Dominican College, Orangeburg, New York

Part 7: Topics in Discrete Mathematics: Recursion, Iteration, and Induction

18. Incorporating Recursion and Functions in the Secondary School Mathematics Curriculum149
Robert H. Cornell, Milton Academy, Milton, Massachusetts
Edward Siegfried, Milton Academy, Milton, Massachusetts
19. Using Spreadsheets to Introduce Recursion and Difference Equations in High School Mathematics158
Bruce R. Maxim, University of Michigan–Dearborn, Dearborn, Michigan
Roger F. Verhey, University of Michigan–Dearborn, Dearborn, Michigan
20. Recursive Thinking: A Method for Problem Solving.....166
Sandra Burrell, *Mildred Eaton*, *Estelle Feeling*, *Fauzy Ghareeb*, *Estelle LeGrand*,
Darlene Morris, *Gertie Tillerson*, *Robert Williams*, District of Columbia Public
 Schools, District of Columbia
21. Teaching Induction in Discrete Mathematics171
Kay E. Smith, Saint Olaf College, Northfield, Minnesota
22. Making Connections through Iteration178
David N. Bannard, Collegiate Schools, Richmond, Virginia
23. Putting Chaos into the Classroom184
Robert L. Devaney, Boston University, Boston, Massachusetts

Part 8: Topics in Discrete Mathematics: Algorithms

24. Algorithms: You Cannot Do Discrete Mathematics without Them.....195
Stephen B. Maurer, Swarthmore College, Swarthmore, Pennsylvania
Anthony Ralston, State University of New York, Buffalo, New York
25. Anagrams: An Application of Discrete Mathematics207
Angela B. Shiflet, Wofford College, Spartanburg, South Carolina

Part 9: Units, Activities, and Projects in Discrete Mathematics

26. An Introduction to Game Theory.....214
Kevin G. Bartkovich, North Carolina School of Science and Mathematics,
 Durham, North Carolina

| | |
|---|-----|
| 27. A Knapsack Problem, Critical-Path Analysis, and Expression | |
| Trees | 228 |
| <i>Janet H. Caldwell</i> , Glassboro State College, Glassboro, New Jersey | |
| <i>Francis E. Masat</i> , Glassboro State College, Glassboro, New Jersey | |
| 28. Design Your Own City: A Discrete Mathematics Project for High School Students | 235 |
| <i>Carol A. Bouma</i> , The Park School, Brooklandville, Maryland | |
| Index | 246 |
