Invited Talk

Towards PetaFlops Computing with IBM Blue Gene	11
<i>Norbert Attig, Friedel Hossfeld</i>	

1. Session: GRID and Parallel Computing

Specifying and Processing Co-Reservations in the Grid	17
<i>Thomas Röblitz</i>	

Grid Virtualization Engine: Providing Virtual Resources for Grid Infrastructure	27
<i>Emeric Kwemou, Lizhe Wang, Jie Tao, Marcel Kunze, David Kramer, Wolfgang Karl</i>	

High Performance Multigrid on Current Large Scale Parallel Computers	37
<i>Tobias Gradl, Ulrich Rüde</i>	

2. Session: Parallel Computing Systems

SDVM ^R : A Scalable Firmware for FPGA-based Multi-Core Systems-on-Chip	49
<i>Andreas Hofmann, Klaus Waldschmidt</i>	

Adaptive Cache Infrastructure: Supporting Dynamic Program Changes following Dynamic Program Behavior	59
<i>Fabian Nowak, Rainer Buchty, Wolfgang Karl</i>	

A Generic Tool Supporting Cache Designs and Optimisation on Shared Memory Systems	69
<i>Martin Schindewolf, Jie Tao, Wolfgang Karl, Marcelo Cintra</i>	

3. Session: Computation in Parallel

Parallel Derivative Computation using ADOL-C _____ 83
Andreas Kowarz, Andrea Walther

How Efficient are Creatures with Time-shuffled Behaviors? _____ 93
Patrick Ediger, Rolf Hoffmann, Mathias Halbach

4. Session: Applications for the Cell Broadband Engine

Hybrid Parallel Sort on the Cell Processor _____ 107
Jörg Keller, Christoph Kessler, Kalle König, Wolfgang Heenes

An Optimized ZGEMM Implementation for the Cell BE _____ 113
Timo Schneider, Torsten Hoefler, Simon Wunderlich, Torsten Mehlan, Wolfgang Rehm

Author Index _____ 125
