Preface ix

0. Preliminary Discussion

0.1. Basic Notation	1
0.2. Pure Exchange Economy	3

1. Introduction to Convex Analysis

1.1. Convex Set	8
1.2. Affine Subspace	10
1.3. Hyperplane	12
1.4. Algebraic Interior, Algebraic Relative Interior	13
1.5. Separation Principle	17
1.6. Extreme Points	21
Appendix	26
Exercises	27

2. Introduction to Continuity of a Correspondence

2.1. Upper and Lower Semicontinuities	32
2.2. Closedness	34
2.3. Maximum Theorem	37
Exercises	38

3. Introduction to Fixed-Point Theorems in \mathbb{R}^n

3.1. Sperner's Lemma, K-K-M Theorem	43
3.2. Fixed-Point Theorems	47
3.3. Fixed-Point Theorem and Separation Principle: Coincidence Theorem	50
Exercises	53

4. Noncooperative Behavior and Equilibrium

4.1. Nash Equilibrium of a Game in Normal Form	56
4.2. Optimality	58
4.3. Social Equilibrium of an Abstract Economy	60
4.4. Competitive Equilibrium of a Pure Exchange Economy	61

4.5.	Fundamental Theorems of Welfare Economics	62
4.6.	Game-Theoretical Interpretation of the Competitive Equilibrium	65
4.7.	Notes	67
	Exercises	74
5. Cooperative Behavior and Stability		
5.1.	Linear Inequalities	78
5.2.	Core of a Side-Payment Game	80
5.3.	K–K–M–S Theorem	82
5.4.	Core of a Non-Side-Payment Game	83
5.5.	Core Allocation of a Pure Exchange Economy	86
5.6.	A Limit Theorem of Cores	89
5.7.	Social Coalitional Equilibrium of a Society	94
5.8.	Optimality of the Nash Equilibrium: Strong Equilibrium	100
5.9.	Notes	102
	Exercises	113
6. Cooperative Behavior and Fairness		
6.1.	Shapley Value of a Side-Payment Game	118
6.2.	Convex Game	120
6.3.	λ -Transfer Value of a Non-Side-Payment Game	122
6.4.	Value Allocation of a Pure Exchange Economy	126
6.5.	A Limit Theorem of Value Allocations of Replica Economies	128
6.6.	Notes	145
	Exercises	148
	<i>References</i>	151
	<i>Author Index</i>	157
	<i>Subject Index</i>	161
