Preface		3
I	Explanation and the Aims of Science	
	1. The Logic and Pragmatics of Explanation	7
	2. Psychology vs. Rational Reconstruction	13
	3. Truth	19
	4. The Gamble with Truth	25
II	The Question-Theoretic Approach	
	1. Questions, Presuppositions, and Answers	32
	2. Problems and Knowledge Situations	36
	3. Pragmatic Presuppositions and the Identity of Questions	44
	4. Stress	48
	5. Open Questions and Answers	54
III	Explanation and the Theory of Speech Acts	
	1. Two Interrogative Models	59
	2. Interpretation and Communicative Presumptions	64
	3. Illocutionary Forces and Communicative Intentions	68
	4. The Hermeneutic Pattern of Understanding and the Intended Way	78
IV	Explanatory Failures and Pragmatic Adequacy	
	1. Pragmatic Criticisms Revisited: The Ontology of Explanations	88
	2. Type-Appropriacy, Explanatory Relativism, and Relevance to the Querier's Question	92
	3. Predictive Relevance	101
	4. The Third Dogma of Empiricism	112
	5. Factual Relevance and the No-Luck Principle	120
V	Problemdynamik	
	1. Theories	128
	2. Problem-Solving Effectiveness and Explanatory Power	135
	3. The Structure of Cognitive Problems	142
	4. Analogies, Metaphors, and Heuristic Guidance	147

VI Explanatory Unification
1. Non-Veric Global Values 156
2. Unification as a Function of Theory-Nets 162
3. Value-Conflicts and Cognitive Profiles 168

VII The Global Gamble: Truth as a Distal Aim
1. Non-Veric Values and Truth 176
2. Rationality and Changing Standards of Intelligibility 181
3. Kuhn-Loss, Grünbaum's Challenge, and Auto-determination 187
4. Incommensurability 193
5. Increase in Truthlikeness 198
