

CONTENTS

List of Contributors	xiii
Preface	xv

Part I: COLLECTION AND DISSEMINATION OF BASIC DATA

1. GLOBAL ENVIRONMENTAL MONITORING	3
Sören Svensson	
1. Introduction	3
2. Monitoring - Basic Considerations	5
3. Environmental Problems	5
4. Environmental Variables Appropriate for Monitoring	7
5. The Design of a Global Environmental Monitoring System	10
6. Operational and Institutional Arrangements	12
DISCUSSION - L. A. Clarenburg	15
2. A SIMPLIFIED STATISTICAL PROCEDURE TO OPTIMIZE THE SITING OF AIR POLLUTION MEASURING STATIONS	21
André Junod	
3. STATISTICAL STUDIES OF URBAN AIR POLLUTION — SULFUR DIOXIDE AND SMOKE	25
Michael Legrand	
1. Introduction	25
2. Collection and Publication of Pollution Data	27
3. Statistical Studies of Pollution Data	32
4. Frequency Distribution Curve	32
5. Conclusion	36

4.	THE DESIGN AND OPERATION OF THE NATIONAL AEROMETRIC DATA BANK	39
	J. W. Overbey II and R. P. Ouellette	
1.	Introduction	39
2.	System Operation	40
3.	Data Editing and Validation	40
4.	Analyses	43
	References	59
	DISCUSSION - D. W. Moody	61

Part II: INDICES, ECONOMIC AND POLICY PERSPECTIVES

5.	TREATING EXTERNAL DISECONOMIES — MARKETS OR TAXES?	65
	David Starrett and Richard Zeckhauser	
1.	Tractable Externality Problems	65
2.	Resistant Externality Problems	70
3.	Conclusion	83
	References	83
6.	ENFORCEMENT MEASURES IN WATER QUALITY CONTROL	85
	Murray Stein	
1.	Introduction	85
2.	Present Enforcement Authorities	86
3.	Administration Legislative Proposals	87
4.	Statistics in Water Quality Control	88
5.	EPA Budget	89
6.	The Economy and the Environment	90
7.	Conclusion	90

7.	PROGRESS IN ENVIRONMENTAL QUALITY	93
	Thomas C. Winter, Jr.	
	0. Summary	93
	1. Introduction: Federal Institutional Arrangements	94
	2. Other Federal Actions	95
	3. Needed Legislation	96
	4. Trends	97
	5. Costs	98
	6. Information Requirements	99
	Reference	101
8.	DEVELOPMENT OF ENVIRONMENTAL INDICES	103
	Robert Pikul	
	0. Summary	103
	1. Indices and Indicators of Environmental Quality	103
	2. Composite Grouping of Indices	106
	3. Example: Air Quality Index	115
	References	121
9.	A STATISTICAL SYSTEM FOR ESTIMATING THE DETERIORATION OF THE HUMAN ENVIRONMENT	123
	R. Huetting	
	1. Environmental Goods: Functions by Component	123
	2. Quantitative, Spatial, and Qualitative Competition of Functions	124
	3. Indicators	127
	4. Shadow Prices of Environmental Functions	128
	References	132

Part III: MATHEMATICAL MODELS

10.	PENALIZATION OF THE ENVIRONMENT DUE TO STENCH: A Study of the Subjective Experience of the Population	135
	L. A. Clarenburg	
0.	Summary	135
1.	Introduction	136
2.	Penalization	136
3.	Mathematical Model	137
4.	Testing of the Model	141
5.	Conclusions	156
6.	Applications	156
	References	160
	DISCUSSION - Gerald van Belle	161
11.	ON THE ESTIMATION OF POLLUTION-CAUSED GROWTH REDUCTION IN FOREST TREES	167
	Rolf Sundberg	
0.	Summary	167
1.	General Introduction	167
2.	The Local Problem	168
3.	The Regional Problem	173
	References	175
12.	A MATHEMATICAL MODEL FOR PARTICULATE DEPOSITION IN THE RESPIRATORY SYSTEM	177
	H. D. Landahl	
0.	Summary	177
1.	Introduction	177
2.	Factors Determining Deposition	178
3.	Calculation of Deposition in the Respiratory Tract	179
4.	Redistribution of the Deposited Particles	183
	References	186
	DISCUSSION - Stanley V. Dawson	189

AUTHOR'S REPLY TO COMMENTS BY STANLEY V. DAWSON -	
H. D. Landahl	191
13. SOME BASIC PROBLEMS OF ESTUARINE WATER QUALITY CONTROL 193	
J. R. West and D. J. A. Williams	
1. Introduction	193
2. The Nature of the Physical Problems	194
3. One-Dimensional Representation of Estuarine Mixing	196
4. Data Acquisition and Analysis	200
5. Conclusions	209
References	211
14. MODELLING CURRENT MOVEMENTS WITHIN BODIES OF WATER 213	
D. Harverson	
1. Introduction	213
2. Outline of Techniques	214
3. Correlation of Wind with Induced Current	214
4. Variations in the Basic Drift	215
5. Sinusoidal Representation of Current	216
6. Spatial Extension of the Data	218
7. Calibration and Use of the Model	219
References	220
<u>Part IV: STATISTICAL STUDIES USING REGRESSION AND RELATED METHODS</u>	
15. DOES AIR POLLUTION SHORTEN LIVES? 223	
Lester B. Lave and Eugene P. Seskin	
1. Introduction	223
2. Method	224
3. Results	225
4. Discussion	234
5. Conclusion	241
References	242
DISCUSSION - William Fairley 245	

16.	THE USE OF MULTIPLE REGRESSION EQUATIONS FOR THE ASSESSMENT AND SHORT-TERM FORECASTING OF URBAN AREA BACKGROUND POLLUTION	249
	M. Benarie, D. Badellon, T. Menard, and A. Nonat	
0.	Summary	249
1.	Introduction	250
2.	The Observed Data	250
3.	Variables Used in the Multiple Regression Equations	251
4.	Multiple Linear Regression Equations	256
5.	Uses of Representation by Multiple Regression Equations	264
	References	273
17.	ANALYSIS OF HEALTH EFFECTS DATA: SOME RESULTS AND PROBLEMS	275
	V. Hasselblad, W. C. Nelson, and G. R. Lowrimore	
1.	Introduction	275
2.	Data Processing	276
3.	Analysis of Repeated Measurements	276
4.	Categorical Dependent Variables	277
5.	Threshold Estimation	277
6.	Other Problems	280
	References	282
18.	A STATISTICAL MODEL OF A POLLUTED ESTUARY	283
	D. W. Mackay and J. Gilligan	
1.	Introduction	283
2.	General Nature of the Situation	284
3.	The Effect of Tidal Range	288
4.	Multiple Regression Analyses	288
5.	Importance of Variables	291
6.	Conclusions	294
	References	295

19.	SOME STATISTICAL ANALYSES OF WATER QUALITY IN THE DELAWARE RIVER	297
-----	---	-----

Robert V. Thomann

1.	Introduction	297
2.	Available Data	297
3.	Statistical Analyses	298
4.	Results of Analysis	301
5.	Summary	310
	References	310

Part V: OTHER STATISTICAL METHODS

20.	ASPECTS OF SAMPLING ATTITUDES TOWARDS SOLID WASTE PROBLEMS	315
-----	---	-----

Albert J. Klee

1.	Goals and Objectives	315
2.	Information Sought	315
3.	Some Concepts Used in the Study	316
4.	The Survey of Householders	317
5.	The Survey of City Officials	320
6.	Other Interviews	321
7.	Study of Organizations	321
8.	Data Processing	322
9.	The Case Studies	324
10.	Analysis of Organizations	324
11.	Results	325
	References	326

21.	STATISTICAL PROBLEMS IN AEROSOL STUDIES	329
-----	---	-----

Gerald van Belle

0.	Summary	329
1.	Introduction	329
2.	Statistical Distributions	330
3.	Comments	332
	References	335

	DISCUSSION - S. Dawson	337
--	----------------------------------	-----

22.	EVALUATION OF ACTIVATED SLUDGE TREATMENT PLANT PERFORMANCE	339
	Jerzy Ganczarczyk	
0.	Summary	339
1.	Introduction	339
2.	Activated Sludge Treatment Plant Control Data	340
3.	General Appraisal of Control Data	341
4.	Automation of Activated Sludge Treatment Plants	343
5.	Analysis of Plant Performance Data	344
6.	Conclusions	348
	References	350
23.	COMBINING MULTIPLE ATTRIBUTE OUTCOMES INTO AN OVERALL INDEX	353
	Clifford J. Maloney	
1.	Introduction	353
2.	Example	354
3.	Scales	355
4.	Probability	356
5.	Quantal Regression	357
6.	Individual Sickness Score	361
7.	Construction of the Sickness Score	362
8.	Check of the Model	362
	References	363
24.	A PROPOSAL FOR ECONOMICAL FIRST STAGE SCREENING FOR TUMORIGENS WITH A POSSIBLE "JOINT ACTION" BONUS	365
	Robert M. Elashoff, Milton Sobel, and M. A. Schneiderman	
1.	Introduction	365
2.	A Probability Model for Joint Action of Compounds	367
3.	Decision Rules for Selecting Tumorigens	367
4.	Probability Inequalities to be Satisfied	369
5.	Comparisons Between the 2AAT and 1AAT Designs	369
6.	Inhibitors and Multiple Tumorigens	371
7.	Summary	373
	References	374

25.	SOME STATISTICAL ASPECTS OF EXPERIMENTS FOR DETERMINING THE TERATOGENIC EFFECTS OF CHEMICALS	375
	David G. Hoel	
1.	Introduction	375
2.	The Teratological Experiment	376
3.	Some Probabilistic Considerations	377
4.	Some Statistical Considerations	379
	References	381
26.	CLOSING COMMENTS	383
	Gerald van Belle	
	Index	387
