Preface	vii
Acknowledgements	ix
Notation	xi
List of Abbreviations	xv
Chapter 1. Introduction and Preliminaries	1
1.1 Historical Background of Interior-Point Methods	2
1.1.1 Prelude	2
1.1.2 A Brief Review of Modern Interior-Point Methods	3
1.2 Primal-Dual Path-Following Algorithm for LO	5
1.2.1 Primal-Dual Model for LO, Duality Theory and the Central Path	5
1.2.2 Primal-Dual Newton Method for LO	8
1.2.3 Strategies in Path-following Algorithms and Motivation	12
1.3 Preliminaries and Scope of the Monograph	16
1.3.1 Preliminary Technical Results	16
1.3.2 Relation Between Proximities and Search Directions	20
1.3.3 Contents and Notational Abbreviations	22
Chapter 2. Self-Regular Functions and Their Properties	27
2.1 An Introduction to Univariate Self-Regular Functions	28
2.2 Basic Properties of Univariate Self-Regular Functions	35
2.3 Relations Between S-R and S-C Functions	42
Chapter 3. Primal-Dual Algorithms for Linear Optimization Based on Self-Regular Proximities	47
3.1 Self-Regular Functions in \mathcal{R}_{+}^n and Self-Regular Proximities for LO	48
3.2 The Algorithm	52
3.3 Estimate of the Proximity After a Newton Step	55
3.4 Complexity of the Algorithm	61
3.5 Relaxing the Requirement on the Proximity Function	63
Chapter 4. Interior-Point Methods for Complementarity Problems Based on Self-Regular Proximities	67
4.1 Introduction to CPs and the Central Path	68
4.2 Preliminary Results on $P_*(\kappa)$ Mappings	72

4.3 New Search Directions for $P_*(\kappa)$ CPs	80
4.4 Complexity of the Algorithm	83
4.4.1 Ingredients for Estimating the Proximity	83
4.4.2 Estimate of the Proximity After a Step	87
4.4.3 Complexity of the Algorithm for CPs	96
Chapter 5. Primal-Dual Interior-Point Methods for Semidefinite Optimization Based on Self-Regular Proximities	99
5.1 Introduction to SDO, Duality Theory and Central Path	100
5.2 Preliminary Results on Matrix Functions	103
5.3 New Search Directions for SDO	111
5.3.1 Scaling Schemes for SDO	111
5.3.2 Intermezzo: A Variational Principle for Scaling	112
5.3.3 New Proximities and Search Directions for SDO	114
5.4 New Polynomial Primal-Dual IPMs for SDO	117
5.4.1 The Algorithm	117
5.4.2 Complexity of the Algorithm	118
Chapter 6. Primal-Dual Interior-Point Methods for Second-Order Conic Optimization Based on Self-Regular Proximities	125
6.1 Introduction to SOCO, Duality Theory and The Central Path	126
6.2 Preliminary Results on Functions Associated with Second-Order Cones	129
6.2.1 Jordan Algebra, Trace and Determinant	130
6.2.2 Functions and Derivatives Associated with Second-Order Cones	132
6.3 New Search Directions for SOCO	142
6.3.1 Preliminaries	142
6.3.2 Scaling Schemes for SOCO	143
6.3.3 Intermezzo: A Variational Principle for Scaling	145
6.3.4 New Proximities and Search Directions for SOCO	147
6.4 New IPMs for SOCO	150
6.4.1 The Algorithm	150
6.4.2 Complexity of the Algorithm	152
Chapter 7. Initialization: Embedding Models for Linear Optimization, Complementarity Problems, Semidefinite Optimization and Second-Order Conic Optimization	159
7.1 The Self-Dual Embedding Model for LO	160
7.2 The Embedding Model for CP	162
7.3 Self-Dual Embedding Models for SDO and SOCO	165
Chapter 8. Conclusions	169
8.1 A Survey of the Results and Future Research Topics	170
References	175
Index	183
