PREFACE	v
CHAPTER 1 THE NATURE OF STATISTICAL METHODS	1
General Interest in Numbers	1
The Purposes of Statistical Methods	3
Preview of This Text	3
Rounding, Significant Figures, and Decimals	8
Supplement 1	8
Rounding	8
CHAPTER 2 AVERAGES	15
Raw Data	15
The Mean Computed from Raw Data	15
Grouping of Data	17
The Mean Computed from Grouped Data	22
The Median	27
Choice of Mean or Median	31
The Histogram and the Frequency Polygon	33

Summary	36
Supplement 2	36
Other Averages	36
Proof that Error Due to Grouping Is Small	42
Cumulative Graphs	42
Bar Diagrams	44
CHAPTER 3 THE STANDARD DEVIATION	46
Need for a Measure of Variability	46
Formula for the Standard Deviation	48
Computing the Standard Deviation with Grouped Data	52
Standard Deviation of a Finite Population	58
Standard Scores	61
Other Measures of Dispersion	64
Summary	64
Supplement 3	65
How to Square Numbers	65
Methods of Extracting Square Roots	67
How to Check Square Roots	73
How to Compute and Check the Standard Deviation	75
Sheppard's Correction for Coarseness of Grouping	76
Some Other Measures of Dispersion	78
Types of Standard Scores	80
CHAPTER 4 NORMAL PROBABILITY CURVE	82
The Nature of the Normal Probability Curve	82
The Ordinates of the Normal Probability Curve	84
Binomial Coefficients and the Normal Probability Curve	89
Applications of the Binomial Coefficients	92
The Area under the Normal Probability Curve	97
Summary	108
Supplement 4	108
Simplifying the Equation for the Normal Curve	108
Fitting a Normal Probability Curve to Any Frequency Distribution	109
CHAPTER 5 STATISTICAL INFERENCE	115
Dependability of Figures	115
Speculation	117

Samples and Populations	118
Sampling Distributions and Standard Error of the Mean	119
The t Test for Means	121
Levels of Significance	124
The z Test for Means	125
Point and Interval Estimates	127
Statistical Inference	129
Sampling Distribution and Standard Error of the Median	130
Sampling Distribution and Standard Error of the Standard Deviation	132
Hypothesis Testing	134
Summary	140
Supplement 5	140
Stability of the Median	140
Standard Error of a Proportion	143

CHAPTER 6 PERCENTILES AND PERCENTILE RANKS 145

Percentiles	146
Percentile Ranks	146
Computation of Percentiles	147
Percentiles and Percentile Ranks Compared	150
Deciles	152
Quartiles	153
Standard Error of a Percentile	153
Summary	156
Supplement 6	156
Method of Obtaining Percentile Ranks for Grouped Data	156
Measures of Variability Based upon Percentiles	158
The Range	160
Relative Value of Measures of Variability	161

CHAPTER 7 SKEWNESS AND TRANSFORMED SCORES 164

Skewness	164
Kurtosis	171
Transformed Scores	179
The Description of Frequency Distributions	183
Summary	185
Supplement 7	185
Additional Measures of Skewness and Kurtosis	185

CHAPTER 8 PEARSON PRODUCT MOMENT COEFFICIENT OF CORRELATION	192
Definition of Pearson r	193
Plotting a Scatter Diagram	195
Illustrations of Pearson r 's of Various Sizes	197
Published Correlation Coefficients	211
Some Characteristics of Pearson r	229
Computing r Without Plotting the Data	232
Plotting the Data and Computing r from the Scatter Diagram	243
The z' Transformation and Its Standard Error	248
Assumptions upon Which Pearson r Is Based	252
Interpretation of Pearson r	254
Summary	260
Supplement 8	262
Other Formulas for Pearson r	262
Alternate Ways to Test the Significance of an Obtained Pearson r	264
Reliability and Validity	264
CHAPTER 9 REGRESSION EQUATIONS	278
The Purpose of a Regression Equation	278
Formulas for Regression Equations	279
The Use of Regression Equations	282
The Graphic Representation of Prediction	290
A Second Illustration of Regression Equations	292
Further Interpretations of r	298
Summary	308
Supplement 9	308
Making a Large Number of Predictions	308
CHAPTER 10 MORE MEASURES OF CORRELATION	311
Why Other Correlations	311
Biserial r	312
Multiserial Correlation	328
Point Biserial r	328
Classification of Dichotomous Variables	335
Tetrachoric r	340

Contents	xiii
Phi	346
Interrelations among r_{bis} , r_{pb} , r_t , and ϕ	353
Summary	355
Supplement 10	356
Cosine Pi Correlation Coefficient	356
Rank Correlation Coefficient	358
CHAPTER 11 CHI SQUARE	362
Nature of Chi Square	362
Illustration of Correct Use of Chi Square	364
Sources of Error in Chi Square	366
Chi Square in the General Contingency Table	369
The Exact Test of Significance in 2×2 Tables	374
Use of Chi Square in Curve Fitting	378
Advantages and Disadvantages of Chi Square	383
Summary	384
Supplement 11	384
Unique Characteristics of Chi Square	384
CHAPTER 12 NONPARAMETRIC STATISTICS OTHER THAN CHI SQUARE	392
The Purposes of Nonparametric Statistics	392
The Sign Test	394
The Runs Test	396
The Median Test	399
The Mann-Whitney U Test	402
Which Nonparametric Statistic Should Be Used?	405
Other Nonparametric Statistics	406
Summary	407
CHAPTER 13 SIMPLE ANALYSIS OF VARIANCE	408
Why Not the t Test	408
The Basis of Analysis of Variance	409
A First Example	412
Assumptions	416
Checking	417

Technicalities	419
A Second Example	421
Summary	426
Supplement 13	428
CHAPTER 14 STANDARD ERRORS OF DIFFERENCES	432
Standard Error of Any Difference	433
Standard Error of the Difference between Means	434
Standard Error of the Difference between Standard Deviations	440
The Standard Error of Other Differences	444
Summary	444
Supplement 14	446
CHAPTER 15 REORIENTATION	447
Moments	447
Correlation	449
Popular Concepts	450
Future Courses	450
Using Statistics	453
