<i>Preface</i>	xi
<i>Acknowledgments</i>	xv

Introduction and Overview	1
----------------------------------	---

PART ONE	
ASPECTS OF MATHEMATICAL THINKING:	
A THEORETICAL OVERVIEW	9

1. A Framework for the Analysis of Mathematical Behavior	11
Overview	11
Typical Problems, Typical Behavior:	
The Four Categories Illustrated	14
Resources	17
Heuristics	22
Control	27
Belief Systems	34
Summary	44
2. Resources	46
Routine Access to Relevant Knowledge	46
The Broad Spectrum of Resources	54
Flawed Resources and Consistent Error Patterns	61
Summary	67

3. Heuristics	69
Introduction and Overview	69
What a Problem Is and Who the Students Are	74
Toward More Precise and Usable Descriptions of Heuristic Strategies	76
The Complexity of Implementing a "Straightforward" Heuristic Solution	84
Heuristics and Resources Deeply Intertwined	91
Summary	95
4. Control	97
Introduction and Overview	97
On the Importance of Control: A Look at a Microcosm	100
Modeling a Control Strategy for Heuristic Problem Solving	106
Toward a Broader View of Control	114
Literature Related to Control	127
Summary	143
5. Belief Systems	145
Selections from the Relevant Literature	146
A Mathematician Works a Construction Problem	157
The Student as Pure Empiricist:	
A Model of Empirical Behavior	160
How the Model Corresponds to Performance	164
A Deeper Look at Empiricism: CS and AM Work Problem 1.1	165
Further Evidence Regarding Naive Empiricism:	
DW and SP Work Four Related Problems	174
Summary	184
PART TWO	
EXPERIMENTAL AND OBSERVATIONAL STUDIES, ISSUES OF METHODOLOGY, AND QUESTIONS OF WHERE WE GO NEXT	
187	
<hr/>	
Overview	187
6. Explicit Heuristic Training as a Variable in Problem-Solving Performance	189
A Brief Discussion of Relevant Literature	190
Experimental Design	193
Results	203
Two Methodological Questions	208
Discussion	209
Implications and Directions for Extension	212
Summary	214

7. Measures of Problem-Solving Performance and Problem-Solving Instruction	216
A Brief Discussion of Relevant Work	217
The Experimental and Control Treatments	219
Measure 1: A Plausible-Approach Analysis of Fully Solved Questions	223
Discussion of Testing Results	230
Measure 2: Students' Qualitative Assessments of Their Problem Solving	231
Measure 3: Heuristic Fluency and Transfer	233
A Brief Discussion of Control Issues	238
Summary	239
8. Problem Perception, Knowledge Structure, and Problem-Solving Performance	242
Background	243
Method	247
Results of the Sortings	252
Discussion	259
Summary	263
Appendix: Problems Used in the Card Sort	265
9. Verbal Data, Protocol Analysis, and the Issue of Control	270
Overview	270
Background, Part 1: Verbal Methods	272
Through a Glass Darkly: A Close Look at Verbal Data	275
Background, Part 2: Other Protocol Coding Schemes and Issues of Control	283
The Major Issues for Analysis: A Brief Discussion of Two Protocols	288
A Framework for the Macroscopic Analysis of Problem-Solving Protocols	292
Episodes and the Associated Questions	297
A Full Analysis of a Protocol	301
A Further Discussion of Control: More Data from Students, and the Analysis of an Expert Problem Solver's Protocol	306
Brief Discussion: Limitations and Needed Work	314
Summary	316
Appendix 9.1: A Single-Person Protocol of the Cells Problem	317
Appendix 9.2: Protocol 9.2	319
Appendix 9.3: Protocol 9.3	324
Appendix 9.4: Protocol 9.4	331
Appendix 9.5: Protocol 9.5	340

10. The Roots of Belief	345
A Discussion of Two Geometry Protocols	346
A Brief Analysis of Protocol 10.1	347
A Brief Analysis of Protocol 10.2	349
A Brief Discussion	354
The Strength of Empiricism: More Data	355
The Origins of Empiricism	357
Summary	373
Postscript	375
Appendix 10.1: Protocol 10.1	375
Appendix 10.2: Protocol 10.2	382
References	388
<i>Author Index</i>	399
<i>Subject Index</i>	403
