

Contents

Part I.	Theory.	1
1.	Introduction.	1
2.	The Inverse Problem of Design.	3
3.	Complex Extension and the Schwarz Reflection Principle.	8
4.	Characteristic Coordinates.	10
5.	Initial Data.	15
6.	The Singular Solution.	20
7.	Finite Difference Scheme.	26
8.	The Sonic Locus.	30
9.	Branch Points and Limiting Lines.	34
10.	Automatic Selection of Parameters.	36
11.	Boundary Layer Correction.	39
12.	Analysis at Off-Design Conditions.	43
Part II.	Users Manual.	48
1.	Introduction.	48
2.	Teletype Operation.	50
3.	Paths of Integration.	52
4.	Automation.	59
5.	Guidelines for Choosing the Input Parameters.	64
6.	The Boundary Layer Program.	70
7.	The Analysis Program.	71
Part III.	Examples.	76
1.	Four Lifting Airfoils.	76
2.	Comparison with Analysis and Experiment.	78
3.	Conclusions.	79
References.		81
