

CONTENTS

PREFACE vii

ONE SET THEORY 1

- 1.1 Introduction to Sets 1
- 1.2 Union and Intersection of Sets 7
- 1.3 Complementation and Cartesian Product of Sets 18
Key Ideas for Review 32

TWO COORDINATE SYSTEMS AND GRAPHS 33

- 2.1 Coordinate Systems 33
- 2.2 The Straight Line 42
- 2.3 Linear Systems of Two Equations in Two Unknowns 55
- 2.4 Applications of Linear Equations 63
- 2.5 Linear Inequalities and Their Graphs 75
Key Ideas for Review 84

THREE LINEAR PROGRAMMING (A GEOMETRIC APPROACH) 86

- 3.1 What Is Linear Programming? 86
- 3.2 Solving Linear Programming Problems Geometrically 96
Key Ideas for Review 106

FOUR MATRICES AND LINEAR SYSTEMS 107

- 4.1 Linear Systems 107
- 4.2 Gauss–Jordan Elimination 116
- 4.3 Matrices; Matrix Addition and Scalar Multiplication 128
- 4.4 Matrix Multiplication 139
- 4.5 Inverses of Matrices 151
- Key Ideas for Review 163*

FIVE LINEAR PROGRAMMING (AN ALGEBRAIC APPROACH) 164

- 5.1 Introduction; Slack Variables 164
- 5.2 The Key Ideas of the Simplex Method 172
- 5.3 The Simplex Method 183
- 5.4 Nonstandard Linear Programming Problems; Duality 200
- Key Ideas for Review 207*

SIX COUNTING TECHNIQUES; PERMUTATIONS AND COMBINATIONS 208

- 6.1 Counting Elements in Sets 208
- 6.2 Permutations and Combinations 220
- Key Ideas for Review 234*

SEVEN PROBABILITY 236

- 7.1 Introduction; Sample Space and Events 236
- 7.2 Probability Models for Finite Sample Spaces 247
- 7.3 Basic Theorems of Probability 260
- 7.4 Solving Probability Problems 271
- 7.5 Conditional Probability; Independence 276
- 7.6 Bayes' Formula 292
- Key Ideas for Review 302*

EIGHT STATISTICS 304

- 8.1 Introduction; Random Variables 305
- 8.2 Expected Value of a Random Variable 311
- 8.3 Variance of a Random Variable 321
- 8.4 Chebyshev's Inequality; Applications of Mean and Variance 331
- 8.5 Binomial Random Variables 339
- 8.6 The Normal Approximation of the Binomial 349
- 8.7 Hypothesis Testing; The Chi-Square Test 362
- Key Ideas for Review 372*

NINE APPLICATIONS 374

- 9.1 Applications of Probability and Expected Value to Life Insurance and Mortality 374
- 9.2 Introduction to Game Theory and Applications 381
- 9.3 Games with Mixed Strategies 394
- 9.4 An Application of Probability to Genetics; The Hardy–Weinberg Stability Principle 407
- 9.5 An Application of Conditional Probability to Medical Diagnosis 416
- 9.6 Markov Chains and Applications 421
Key Ideas for Review 442

TEN MATHEMATICS OF FINANCE 444

- 10.1 Simple and Compound Interest 444
- 10.2 Effective Rate of Interest; Simple Discount 452
- 10.3 Annuities and Sinking Funds 457
- 10.4 Present Value 463
- 10.5 Mortgages and Amortization Schedules 468
Key Ideas for Review 472

ELEVEN FUNCTIONS, LIMITS, AND RATES OF CHANGE 473

- 11.1 Introduction 473
- 11.2 Functions 474
- 11.3 Limits 484
- 11.4 Limits at Infinity 494
- 11.5 Continuity 502
- 11.6 Average and Instantaneous Rate of Change 508
Key Ideas for Review 520

TWELVE THE DERIVATIVE 522

- 12.1 The Derivative 522
- 12.2 The Chain Rule 534
- 12.3 Applications of the Derivative 541
- 12.4 Derivatives of the Exponential and Logarithmic Functions 550
Key Ideas for Review 556

THIRTEEN APPLICATIONS OF DIFFERENTIATION 558

- 13.1 Applications of Differentiation to Optimization 558
- 13.2 First and Second Derivative Tests 573
- 13.3 More Applications to Optimization 583
- 13.4 Sketching Graphs of Polynomial Functions 592
- 13.5 Applications to Exponential Growth and Decay Models 596
Key Ideas for Review 609

FOURTEEN INTEGRATION 611

- 14.1 Antiderivatives and Indefinite Integrals 611
- 14.2 The Definite Integral 618
- 14.3 Properties of the Definite Integral 631
- 14.4 Techniques of Integration 643
- 14.5 Improper Integrals 652
- Key Ideas for Review 656*

FIFTEEN APPLICATIONS OF INTEGRATION 658

- 15.1 Integrating Rates of Change 658
- 15.2 Differential Equations 665
- 15.3 Applications of Integration in Probability 684
- Key Ideas for Review 691*

SIXTEEN FUNCTIONS OF SEVERAL VARIABLES 693

- 16.1 Functions of Two Variables; Coordinate Systems in Three Dimensions 693
- 16.2 Partial Derivatives 699
- 16.3 Applications of Partial Derivatives to Optimization 706
- Key Ideas for Review 713*

ALGEBRA REVIEW 715

- A.1 Real Numbers 715
- A.2 Algebraic Notation and the Basic Rules of Algebra 721
- A.3 Solving Equations; Linear Equations 724
- A.4 Exponents and Radicals 729
- A.5 Polynomials and Factoring 736
- A.6 Rational Expressions 741
- A.7 Quadratic Equations 746
- A.8 Logarithms 750

APPENDIX/TABLES 756

ANSWERS TO ODD-NUMBERED EXERCISES 793

INDEX 847
