|--|----------|
| Introduction . . . . .   | 1        |
| <b>Part 1: Measurement</b>   |          |
| <b>Chapter 1. Social mobility measurement: measures without models . . . . .</b> | <b>7</b> |
| 1.1. Introductory remarks . . . . .  | 7        |
| Notation . . . . .   | 7        |
| Interpretation of intergenerational mobility tables . . . . .                    | 9        |
| Types of indices . . . . .   | 11       |
| 1.2. Pragmatic measures . . . . .  | 12       |
| Crude measures . . . . .   | 12       |
| Elementary measures using perfect mobility . . . . .                             | 12       |
| Rogoff's interpretation of the Glass index . . . . .                             | 16       |
| 1.3. Distinguishing between structural and pure mobility . . . . .               | 17       |
| Yasuda's index . . . . .   | 17       |
| Relation between the Glass and Yasuda indices . . . . .                          | 19       |
| Application to non-dichotomous mobility tables . . . . .                         | 21       |
| 1.4. Dropping perfect mobility . . . . .   | 22       |
| The rationale for $I_B$ . . . . .  | 22       |
| Comparison of Yasuda's index and $I_B$ . . . . .                                 | 27       |
| The generalization of $I_B$ to polytomies . . . . .                              | 29       |
| 1.5. Counting indices . . . . .  | 35       |

|  |    |
|--|----|
| Chapter 2. Measures derived from mathematical models:  |    |
| structural analysis of mobility matrices . . . . .   | 40 |
| 2.1. Introductory remarks . . . . .  | 40 |
| 2.2. A first mobility index using Markov chains . . . . .  | 41 |
| Markov chains applied to mobility analysis . . . . .   | 41 |
| The Prais index: a reformulation using Markov chains<br>without the equilibrium distribution . . . . .           | 45 |
| Prais' original index . . . . .  | 48 |
| Correction for changes in the occupational structure . . . . .   | 50 |
| 2.3. Another application of Markov chain theory to social<br>mobility measurement: Bartholomew's index . . . . . | 51 |
| 2.4. A derived measure of inheritance; first application of<br>the mover—stayer distinction . . . . .            | 54 |
| The original mover—stayer model . . . . .  | 55 |
| White's intergenerational mover—stayer model . . . . .   | 56 |
| A simplified version of White's model: Goodman's<br>model . . . . .  | 60 |
| Three types of mover—stayer models applied to inter-<br>generational mobility . . . . .                          | 62 |
| 2.5. A general model for the analysis of mobility tables: the<br>Type 3 model . . . . .                          | 63 |
| The two latent class version of the Type 3 model . . . . .   | 64 |
| Extension of the Type 3 model to $g$ latent classes . . . . .  | 66 |
| 2.6. Structural methods, an overview . . . . .   | 67 |

## Part 2: Towards a formal theory of social mobility

|  |    |
|--|----|
| Chapter 3. Theories without intervening variables . . . . .                  | 72 |
| 3.1. Types of theories . . . . .   | 72 |
| 3.2. Types of models in the intragenerational case . . . . .                 | 75 |
| 3.3. Solution of the original stayer—mover model . . . . .                   | 77 |
| 3.4. Pseudo-Markovian models with collective history . . . . .               | 80 |
| A general model with collective history . . . . .                            | 80 |
| Possible variations of the model . . . . .                                   | 84 |
| 3.5. A class of pseudo-Markovian models with individual<br>history . . . . . | 85 |
| Some possible versions of the axiom of cumulative<br>inertia . . . . .       | 85 |
| Version B of the Cornell Mobility Model . . . . .                            | 88 |
| Uses of the model . . . . .  | 91 |
| The convergence of $P_t$ towards a limiting distribution . . . . .           | 92 |

|  |     |
|--|-----|
| 3.6. Pseudo-Markovian models with heterogeneous sub-populations . . . . .  | 95  |
| 3.7. Job mobility instead of individual mobility . . . . .   | 99  |
| The rationale for the vacancy model . . . . .  | 100 |
| Some applications . . . . .  | 102 |
| Chapter 4. Theories using intervening variables . . . . .  | 105 |
| 4.1. Introduction . . . . .  | 105 |
| Types of models . . . . .  | 106 |
| Overview of the chapter . . . . .  | 108 |
| 4.2. A model with differential fertility as intervening variable and treating social mobility as an independent variable . . . . . | 108 |
| The rationale for the model . . . . .  | 109 |
| Introducing the assumption of perfect mobility . . . . .   | 110 |
| Dropping the assumption of perfect mobility . . . . .  | 111 |
| 4.3. A model introducing several intervening variables where social mobility is treated as a dependent variable . . . . .          | 116 |
| The rationale for the model . . . . .  | 117 |
| Introducing the effect of differential fertility and of changes in the educational and social structure . . . . .                  | 122 |
| Uses of the model . . . . .  | 124 |
| An application of the model . . . . .  | 126 |
| Pseudo-cohort version of the model . . . . .   | 131 |
| 4.4. A true cohort socio-demographic model . . . . .   | 132 |
| Introducing age, fertility and social status into a transition matrix . . . . .  | 133 |
| An adaptation of the model to the analysis of educational mobility . . . . .   | 135 |
| A dynamic version of the model or a cohort version of the model of Section 4.3 . . . . .   | 136 |
| Concluding remarks . . . . .   | 139 |
| Statistical appendix (by J.K. Lindsey) . . . . .   | 141 |
| 5.1. Social mobility measurement: measures without models . . . . .  | 142 |
| 5.2. Measurements derived from mathematical models . . . . .   | 146 |
| Markov chains . . . . .  | 148 |
| White's intergenerational mover-stayer model . . . . .   | 149 |
| Goodman's mover-stayer model . . . . .   | 150 |

|   |         |
|---|---------|
| The Type 3 model . . . . .  | 150     |
| 5.3. Theories without intervening variables . . . . .                     | 152     |
| The original mover—stayer model using the equilibrium<br>matrix . . . . . | 153     |
| Collective history model . . . . .  | 154     |
| Cornell Mobility Model with axiom B . . . . .                             | 156     |
| 5.4. Discussion . . . . .   | 156     |
| Bibliography for Appendix . . . . .                                       | 157     |
| <br>Bibliography . . . . .  | <br>158 |
| <br>Index . . . . .   | <br>163 |
