PREFACE	vii
ACKNOWLEDGMENTS	ix
Population Waves	1
<i>Nathan Keyfitz</i>	
Harvard University, Cambridge, Massachusetts	
Some Properties of a Stochastic Attraction Model	39
<i>Robert McGinnis and Neil W. Henry</i>	
Cornell University, Ithaca, New York	
The Sampling Frame as a Determinant of Observed Distributions of Duration Variables	57
<i>Jane A. Menken and Mindel C. Sheps</i>	
Office of Population Research, Princeton University, Princeton, New Jersey, and University of North Carolina, Chapel Hill, North Carolina	
Comparison of Alternative Marriage Models	89
<i>David D. McFarland</i>	
University of Chicago, Chicago, Illinois	
Can There Be a Marriage Function?	107
<i>B. Parlett</i>	
University of California, Berkeley, California	
Contraceptive Impact over Several Generations	137
<i>Robert G. Potter</i>	
Brown University, Providence, Rhode Island	
On Estimating the Risk of Conception from Censored Data	167
<i>Mindel C. Sheps and Jane A. Menken</i>	
University of North Carolina, Chapel Hill, North Carolina, and Office of Population Research, Princeton University, Princeton, New Jersey	

Influence of Cause of Death Structure on Age-Patterns of Mortality	201
<i>Samuel H. Preston</i>	
University of Washington, Seattle, Washington	
Inhomogeneous Semi-Markov Processes, Select Actuarial Tables, and Duration-Dependence in Demography	251
<i>Jan M. Hoem</i>	
Central Bureau of Statistics, Oslo, Norway	
A Class of Doubly Stochastic Processes: with an Application to the Effects of Lactation on the Postpartum Anovulatory Period	297
<i>Ralph B. Ginsberg</i>	
University of Pennsylvania, Philadelphia, Pennsylvania	
A General Migration Process	333
<i>C. L. Chiang</i>	
University of California, Berkeley, California	
Some Results in the Theory of Three Gene Loci	357
<i>Marcus W. Feldman and Beverley Balkau</i>	
Stanford University, Stanford, California, and La Trobe University, Bundoora, Victoria, Australia	
The Main Results of Optimal Control Theory Made Simple	385
<i>Stuart E. Dreyfus</i>	
University of California, Berkeley, California	
The Plato System Population Dynamics Course	419
<i>Paul Handler and Judith Sherwood</i>	
University of Illinois, Urbana, Illinois	
SUBJECT INDEX	435
NAME INDEX	441
