Figures and Tables	xi
Preface	xiii
<b>PART I: INTRODUCTION</b>	<b>1</b>
1. INFORMATION	3
The Ambiguity of “Information”	3
Goal	5
Scope	7
Some Problems and Paradoxes	10
Plan	12
<b>PART II: CONCEPTS</b>	<b>15</b>
2. THEORY	17
Theory	17
Useful Theory, Provisional Theory, Better Theory	19
Improving Theory: Scholarship and Research	20
Pathology of Theory	22
Unique, Characteristic, and Shared Theory	23

3. SYSTEMS	27
Systems and Systems Concepts	27
Controls and Responses	28
Types of Information Systems	30
Objectives of Information Systems	36
Summary	36
4. KNOWLEDGE AND INFORMATION	39
Information, Knowledge, and Belief	39
Recorded Knowledge; Knowledge Representation	40
Information-as-Knowledge	41
Summary	42
5. INFORMATION-AS-THING	43
A Reverse Approach: What Is Informative?	44
Types of Information	45
When Is Information Not Information?	49
Copies of Information and Representations	52
Summary	54
6. INFORMATION IN INFORMATION SYSTEMS	55
Collecting Information	55
Historical Character of Information in Information Systems	59
Type of System by Type of Information	62
Summary	66
7. INFORMATION TECHNOLOGY	69
Definition	69
Comparing Information Technologies	71
Information Technology and the Use of Information Services	75
Summary	75

Contents	vii
8. ACCESS TO INFORMATION	77
Six Aspects of Access	78
Access and the Ambiguity of “Information System”	80
Summary	80
<b>PART III: PROCESSES</b>	81
9. INQUIRIES	83
Motivation to Know	83
Origins and Characteristics of Inquiries	86
Representation of the Inquiry	88
Urgency and Importance	90
Summary	91
10. PERCEIVING, RECEIVING, AND RETRIEVING	93
Definition and Structure	93
Four Basic Difficulties in Retrieval	97
Types of Retrieval	99
Bases for Retrieval	100
Relevance and Retrieval Effectiveness	101
Conclusion	103
11. BECOMING INFORMED: INFORMATION-AS-PROCESS	107
Becoming Informed	107
Information and the Changing of What Is Known	109
A Case Study	110
Misinformation, Harm, and Distress	111
Limitations in Helpfulness	112
Summary	113

12. INFORMATION PROCESSING AND REPRESENTATION	115
Definition	115
Activities of Representation	120
Interpretations and Summaries of Evidence	122
Information Processing by Machine	124
Summary	125
13. DEMAND	127
The Real Price	128
The Double Feedback Loop	132
Price, Scarcity, and Information	133
Patterns of Demand	135
Summary	138
14. PROVIDING INFORMATION	139
Noncommercial Information Services	140
Diffusion, Subversion, Compromise	141
Mission, Goal, Objectives	144
The Golden Rule and the Users' Influence	146
Commercial Information Service	147
Interplay of Political and Economic Aspects	149
Summary	150
<b>PART IV: RELATIONSHIPS</b>	153
15. CONNECTIONS AND COHERENCE	155
The Basic Structure	155
Less Complex Situations	162
Coherent, Consistent, Optimal	163
Summary	166

16. EXPERTISE AND ARTIFICIAL INTELLIGENCE	169
Coping with Complexity	170
Varieties of Task Complexity	171
Examples	174
A Pragmatic Measure of System Intelligence	177
Computer Assisted and Computer Delegated	178
The User's Perspective	179
Summary	180
17. SOCIAL CONTEXT	181
Values and Motivations	181
Information Handling, Organizations, and Power	183
Change in Information Systems	189
Information Professionals	191
Summary	192
<b>PART V: CONCLUSION</b>	195
18. SUMMARY AND RETROSPECT	197
Summary	197
Some Problems Reconsidered	199
Ideals	203
References	207
Index	219

# Figures and Tables

## FIGURES

11.1	The Process of Becoming Informed	108
12.1	Information Processing	118
13.1	Double Feedback Loop	134
14.1	Noncommercial Allocation of Resources	141
14.2	Allocation of Resources	148
15.1	Provision: A Political and Managerial System	157
15.2	Information through Retrieval: A Cognitive System	158
15.3	Use: An Economic System	160
15.4	An Information System as Three Connected Systems	161
16.1	Expertise in Two Dimensions	173
16.2	User's Expertise and Difficulty of a Text	175
18.1	Information System Goodness	204

## TABLES

1.1	Four Aspects of Information	6
6.1	Information Systems and Characteristics of Information	64
7.1	Characteristics of Information Technologies	74
10.1	Retrieval Matrix	102
12.1	Transformations of Information	116
16.1	Different Approaches to Task Complexity	172
