Chapter 1 Empirical Analyses in the Social Sciences

| | | |
|-----|--|----|
| 1.1 | Introduction | 1 |
| 1.2 | Social Science Theory and Statistical Models | 2 |
| 1.3 | Fitting Models to Data | 6 |
| 1.4 | The Development of Stochastic Models | 11 |
| 1.5 | The Analysis of Nonexperimental Data and the Selection of a Statistical Procedure | 13 |
| 1.6 | Simple Methods | 16 |
| | Review Questions | 23 |

Chapter 2 Estimation with Simple Linear Models

| | | |
|-----|---|----|
| 2.1 | Introduction | 24 |
| 2.2 | The Basic Model | 25 |
| 2.3 | Least Squares Estimators | 28 |
| 2.4 | Two Examples | 35 |
| 2.5 | Conclusion | 39 |
| | Appendix 2.1 Properties of Summations | 40 |
| | Appendix 2.2 Calculus and the Minimization of Functions | 42 |
| | Review Questions | 44 |

Chapter 3 Least Squares Estimators: Statistical Properties and Hypothesis Testing

| | | |
|-----|--|----|
| 3.1 | Introduction | 45 |
| 3.2 | Properties of Least Squares Estimators | 46 |

| | |
|---|----|
| 3.3 Distribution of b —A Monte Carlo Experiment | 60 |
| 3.4 Statistical Inference | 65 |
| 3.5 Hypothesis Tests for Schooling/Earnings Model | 69 |
| 3.6 Conclusion | 69 |
| Appendix 3.1 Estimation of Schooling/Earnings Model Using SPSS Computer Program | 72 |
| Review Questions | 72 |

Chapter 4 Ordinary Least Squares in Practice

| | |
|---|-----|
| 4.1 Introduction | 75 |
| 4.2 Interpretation of Regression Coefficients | 76 |
| 4.3 Model Specification | 79 |
| 4.4 Multicollinearity | 86 |
| 4.5 Model Specification and Multicollinearity in Practice | 93 |
| 4.6 Functional Forms | 96 |
| 4.7 Dummy Explanatory Variables | 101 |
| Review Questions | 108 |

Chapter 5 Multivariate Estimation in Matrix Form

| | |
|--|-----|
| 5.1 Introduction | 109 |
| 5.2 The Least Squares Estimators | 110 |
| 5.3 Least Squares in Matrix Notation | 113 |
| 5.4 Properties of Least Squares | 116 |
| 5.5 Distributional Aspects of the Error Term | 120 |
| 5.6 Statistical Inference | 122 |
| 5.7 Multivariate Education Example | 129 |
| 5.8 Multicollinearity | 131 |
| 5.9 Conclusion | 133 |
| Appendix 5.1 Proof of Best | 137 |
| Appendix 5.2 Proof of Unbiasedness of the Estimator for σ^2 | 138 |
| Review Questions | 139 |

Chapter 6 Generalized Least Squares

| | |
|--|-----|
| 6.1 Introduction | 141 |
| 6.2 Heteroskedasticity and Autocorrelation | 142 |
| 6.3 Formal Statement of the Problem | 145 |
| 6.4 Generalized Least Squares | 146 |
| 6.5 Generalized Least Squares and Examples of Heteroskedasticity and Autocorrelation | 149 |
| 6.6 Generalized Least Squares and Weighted Regression | 150 |
| 6.7 Monte Carlo Simulation of Generalized Least Squares | 153 |
| 6.8 Generalized Least Squares in Practice | 157 |
| 6.9 Visual Diagnostics | 168 |
| 6.10 Dynamic Models | 169 |
| 6.11 Conclusion | 174 |
| Appendix 6.1 Derivation of Generalized Least Squares Estimator | 176 |
| Appendix 6.2 Unbiased Estimator of σ^2 | 177 |
| Review Questions | 178 |

Chapter 7 Models with Discrete Dependent Variables

| | | |
|------|---|-----|
| 7.1 | Introduction | 179 |
| 7.2 | The Problem of Estimating Models with Discrete Dependent Variables | 180 |
| 7.3 | Alternative Models—Dichotomous Dependent Variables | 187 |
| 7.4 | Logit Analysis—Grouped Data | 190 |
| 7.5 | Logit Analysis—Microdata | 200 |
| 7.6 | Probit Analysis | 204 |
| 7.7 | An Example | 206 |
| 7.8 | Monte Carlo Simulation of Dichotomous Dependent Variables | 207 |
| 7.9 | Polytomous Variables/Joint Distributions | 210 |
| 7.10 | Conclusions | 215 |

Chapter 8 Introduction to Multiequation Models

| | | |
|-----|--|-----|
| 8.1 | Introduction | 217 |
| 8.2 | Two Examples of Structural Systems | 218 |
| 8.3 | Path Analysis | 220 |
| 8.4 | The General Multiequation Model | 224 |
| 8.5 | Estimating Hierarchical Models | 229 |
| 8.6 | Hierarchical, Nonrecursive Systems | 231 |
| 8.7 | Underidentification in Hierarchical Models | 239 |
| 8.8 | Nonrecursive Hierarchical Models: Two Examples | 241 |
| 8.9 | Conclusion | 243 |
| | Appendix 8.1 Instrumental Variables Estimator | 244 |
| | Review Questions | 244 |

Chapter 9 Structural Equations: Simultaneous Models

| | | |
|-----|---|-----|
| 9.1 | Introduction | 246 |
| 9.2 | Identification in Simultaneous Systems: An Example | 250 |
| 9.3 | Identification in Simultaneous Models | 254 |
| 9.4 | Estimating Identified Models | 266 |
| 9.5 | Simultaneous Equations: The Voting and Aspiration Examples | 269 |
| 9.6 | Identification through Assumptions about Error Terms | 271 |
| 9.7 | Alternative Estimators | 276 |
| 9.8 | Summary and Conclusions | 278 |
| | Appendix 9.1 Variances and Covariances for Peer Influence Data | 280 |
| | Review Questions | 280 |

***Chapter 10 Estimating Models with Erroneous
and Unobserved Variables***

| | | |
|------|---------------------------------|-----|
| 10.1 | Introduction | 282 |
| 10.2 | Erroneous Explanatory Variables | 286 |
| 10.3 | Unobserved Variables | 289 |
| 10.4 | Factor Analysis | 302 |

| | |
|---|-----|
| 10.5 Linear Structural Models and the General Analysis of Covariances | 312 |
| 10.6 Conclusion | 323 |
| | |
| Appendix I Statistical Review | 325 |
| I.1 Probability | 326 |
| I.2 Theoretical Distributions | 332 |
| I.3 Properties of Estimators | 337 |
| I.4 Hypothesis Testing | 341 |
| I.5 Maximum Likelihood (ML) Estimation | 344 |
| | |
| Appendix II Matrix Algebra | 349 |
| II.1 Basic Properties | 349 |
| II.2 Basic Operations | 351 |
| II.3 Matrix Multiplication | 351 |
| II.4 Other Operations | 353 |
| II.5 Systems of Linear Equations | 354 |
| II.6 Inverses | 355 |
| II.7 Existence of an Inverse–Rank | 358 |
| Review Questions for Appendix II | 359 |
| | |
| Appendix III Statistical Tables | 360 |
| | |
| References | 367 |
| | |
| Index | 369 |
