

A linear Policy Approach

Preface

Introduction .....	1
1. The general model .....	4
2. The linear-quadratic model .....	7
2.1 Finite horizon case .....	7
2.2 Least square forecasts .....	14
2.2.1 Least square property of $\hat{\Gamma}_k(i)$ .....	14
2.2.2 Recursive calculation of $\hat{\Gamma}_k(i)$ .....	15
2.3 An ideal situation .....	22
2.4 Infinite horizon case .....	22
2.5 Appendix to Chapter 2 .....	27
2.5.1 State space representation and Separation Theorem .....	27
2.5.2 Optimal policies for ARMA-processes .....	32
3. The linear non-quadratic model .....	36
3.1 The general linear non-quadratic model .....	36
3.2 The general solution .....	38
3.3 Special cost functions .....	42
3.3.1 Piecewise linear costs .....	42
3.3.2 Probability constraints .....	44
3.3.3 A production smoothing problem .....	46
3.4 Special stochastic demand sequences .....	47
3.4.1 Non-correlated demand .....	48
3.4.2 Exponentially correlated demand .....	51
3.5 A direct approach solving a LNQ-problem .....	53
3.5.1 Piecewise linear costs .....	53
3.5.2 Production smoothing problem .....	55
3.6 Appendix to Chapter 3: The normality condition .....	57
4. Comparison with optimal Dynamic Programming solutions ....	63
4.1 Piecewise linear costs (no set-up costs $P=Q=0$ ) .....	64
4.1.1 Dynamic Programming solution .....	64
4.1.2 Numerical results .....	68

4.2 Piecewise linear costs (including .....	69
set-up costs: $P$ and/or $Q \neq 0$ )	
4.2.1 Optimal solution .....	70
4.2.2 Numerical results .....	72
4.3 Piecewise linear costs - Gauss-Markov case .....	74
4.3.1 Dynamic Programming solution .....	74
4.3.2 Numerical results .....	76
5. Comparison with deterministic approximations .....	78
5.1 White noise case .....	79
5.1.1 Numerical results .....	80
5.2 Gauss-Markov case .....	83
5.2.1 Numerical results .....	87
5.3 Appendix to Chapter 5: .....	90
Derivation of the deterministic policy	
6. Comparison with <u>AHM-Inventory</u> Models .....	95
6.1 No-set-up cost case ( $P=0$ ) .....	97
6.1.1 The LNQ-approach .....	97
6.1.2 Comparison of demand distributions .....	101
6.2 Set-up cost case ( $P \neq 0$ ) .....	105
6.2.1 Derivation of an optimal $S(T)$ -policy .....	105
6.2.2 Numerical results .....	107
7. Summary and concluding remarks .....	110
Literature .....	114
