

CONTENTS

PREFACE	xi
Part 1 EQUATIONS	1
1. Elementary Concepts	3
1.1 Signed Numbers	3
1.2 One Equation, One Unknown	7
1.3 Roundoff	12
1.4 Exponents	14
1.5 The Quadratic Formula	21
1.6 Scientific Notation	24
1.7 Logarithms	25
1.8 Computing with Logarithms	30
1.9 Cartesian Coordinate System	33
1.10 Graphs	39
1.11 Sigma Notation	47
2. Equations and Curves	53
2.1 Linear Equations and Straight Lines	54
2.2 Properties of Straight Lines	64
2.3 Break-Even Analysis	72
2.4 Quadratic Equations and Curves	76
2.5 Polynomial Equations and Curves	82
2.6 Exponential Equations and Curves	84

3. The Value of Money	87
3.1 Compound Interest	87
3.2 Time Value of Money	92
3.3 Present Value of a Cash Flow	98
3.4 Future Value of an Annuity	106
3.5 Effective Interest	114
4. Matrix Operations	117
4.1 Matrices	117
4.2 Elementary Operations	120
4.3 Matrix Multiplication	126
4.4 Simultaneous Linear Equations	132
4.5 Elementary Row Operations	138
4.6 Solutions of Simultaneous Linear Equations	144
4.7 Matrix Inversion	149
5. Linear Programming	155
5.1 Inequalities	155
5.2 Systems of Linear Inequalities	161
5.3 Optimizing a Functional: A Geometric Approach	168
5.4 Linear Programming Problems	175
5.5 Slack Variables and Standard Form	187
5.6 Maximizing a Functional: The Simplex Method	191
5.7 Minimizing a Functional: The Simplex Method	199
Part 2 CALCULUS	205
6. The Derivative	207
6.1 Concept of a Function	207
6.2 Mathematical Functions	213
6.3 Average Rate of Change	218
6.4 Instantaneous Rates of Change	224
6.5 The Derivative	236
6.6 Additional Rules	242
6.7 Higher-Order Derivatives	246
7. Applications of the Derivative	249
7.1 Optimization through Differentiation	250
7.2 Modeling	259
7.3 Profit, Revenue, and Cost	261
7.4 Inventory Control*	267
7.5 Econometrics*	274

8. The Integral	279
8.1 Areas	279
8.2 Antiderivatives	288
8.3 The Definite Integral	294
8.4 Applications of the Integral	299
8.5 Substitution of Variables	306
Part 3 PROBABILITY	311
9. Sets	313
9.1 Sets	313
9.2 The Algebra of Sets	316
9.3 Venn Diagrams	321
9.4 Sample Spaces	329
10. Permutations and Combinations	333
10.1 Trees	333
10.2 Fundamental Theorem of Counting	340
10.3 Permutations	344
10.4 Combinations	348
10.5 Counting Complex Processes*	353
11. Probability	361
11.1 Equal Probability—Simple Processes	362
11.2 Equal Probability—Complex Processes*	367
11.3 The Rules of Probability	373
11.4 Conditional Probability	381
11.5 Independent Events	388
11.6 Bernoulli Trials	393
11.7 Expected Value	397
Appendix A. Curve Fitting	401
A.1 Constant Curve Fit	403
A.2 Linear Least-Squares Fit	408
A.3 Quadratic Least-Squares Fit	417
A.4 Exponential Least-Squares Fit	423
A.5 Selecting an Appropriate Curve	427
Appendix B. Mathematics of Finance	429
B.1 Finite Geometric Sums	429
B.2 Installment Loans and Interest Charges	433
B.3 Mortgages and Amortization	436

Appendix C. Tables	441
C.1 Common logarithms	442
C.2 Exponential functions	444
C.3 Values of $(1 + i)^n$	445
C.4 Values of $(1 + i)^{-n}$	449
C.5 Values of $a_{\overline{n} i}$	453
C.6 Values of $s_{\overline{n} i}$	457
Solutions to Selected Odd-Numbered Problems	461
Index	487
