

# CONTENTS

## CHAPTER I

### ORDINARY DIFFERENTIAL EQUATIONS

ART.	PAGE
1. Introduction . . . . .	1
<i>Part I. Equations of the First Order and Miscellaneous Equations of Higher Order</i>	
2. Variables Separable . . . . .	3
3. Integrable Combinations . . . . .	4
4. Homogeneous Equations . . . . .	9
5. Linear Equations . . . . .	11
6. Equations of Order Higher Than the First . . . . .	15
7. Applications . . . . .	18
<i>Part II. Linear Equations of Higher Order</i>	
8. Definitions and Properties . . . . .	33
9. Operators . . . . .	37
10. The Complementary Function . . . . .	41
11. Particular Integrals . . . . .	48
12. Euler's Equation . . . . .	61
13. Simultaneous Equations . . . . .	63
14. Applications . . . . .	67

## CHAPTER II

### HYPERBOLIC FUNCTIONS

15. Introductory Remarks . . . . .	86
16. Definitions of the Six Hyperbolic Functions . . . . .	86
17. Geometric Representation of the Hyperbolic Functions . . . . .	89
18. Some Formulas of Hyperbolic Trigonometry . . . . .	90
19. Rectilinear Motion with Acceleration Proportional to Displacement . . . . .	93
20. Motion under Resistance . . . . .	94
21. The Tractrix . . . . .	95
22. Schiele's Pivot . . . . .	96
23. A Cantilever Beam Problem . . . . .	97
24. The Suspended Cable . . . . .	99
25. The Capillary Curve; One Vertical Plate . . . . .	101
26. The Rotating Shaft . . . . .	104
27. Voltage and Current Relations in a Uniform Transmission Line under Steady-State D-C. Conditions . . . . .	107
28. Ionization of a Gas . . . . .	110

## CHAPTER III

## ELLIPTIC INTEGRALS

ART.	PAGE
29. Rectification of the Ellipse.....	116
30. The Pendulum.....	119
31. Discussion of Elliptic Integrals and Functions.....	124
32. Capillarity; Two Parallel Vertical Plates.....	127
33. The Elastica.....	131
34. The Swinging Cord.....	133
35. Field Intensity Due to a Circular Current.....	137

## CHAPTER IV

## INFINITE SERIES

36. Introduction.....	143
37. Definitions.....	143
38. Theorems on Power Series.....	146
39. Other Types of Infinite Series.....	153
40. Applications.....	159
41. Picard's Method.....	165
42. Method of Frobenius.....	168

## CHAPTER V

## FOURIER SERIES

43. Introduction.....	173
44. Definitions and Formulas.....	173
45. Examples.....	177
46. Even and Odd Functions.....	181
47. Half-Range Series.....	182
48. Change of Interval.....	185
49. R. M. S. Value of a Function.....	188
50. Harmonic Analysis.....	191
51. The Use of Trigonometric Series in Beam and Bridge Problems.....	196

## CHAPTER VI

## GAMMA AND BESSEL FUNCTIONS

52. The Factorial.....	201
53. Generalization of the Factorial; the Gamma Function.....	201
54. A Useful Formula.....	205
55. The Length of the Lemniscate.....	207
56. A Problem in Dynamics.....	207
57. The Bessel Function $J_n(x)$ .....	209
58. Two Differential Formulas Involving $J_0$ and $J_1$ .....	213

## CONTENTS

ix

ART.	PAGE
59. The Roots of $J_0(x) = 0$ and $J_1(x) = 0$ . . . . .	214
60. Two Integral Relations Involving $J_0$ and $J_1$ . . . . .	216
61. Expansion of $f(x)$ in Terms of Bessel Functions of Order Zero . . . . .	217
62. The Bessel Function $J_{-n}(x)$ . . . . .	218
63. The Ber and Bei Functions . . . . .	220
64. Wire Clamped at Lower End . . . . .	222

## CHAPTER VII

### PARTIAL DERIVATIVES AND PARTIAL DIFFERENTIAL EQUATIONS

65. Partial Derivatives . . . . .	228
66. Differentiation under the Integral Sign . . . . .	233
67. Linear Partial Differential Equations . . . . .	237
68. Particular Solutions . . . . .	239
69. The Vibrating String . . . . .	241
70. One-Dimensional Heat Flow . . . . .	245
71. Two-Dimensional Heat Flow . . . . .	251
72. Fluid Flow . . . . .	257
73. Flow of Electricity in a Cable . . . . .	262
74. An Eddy-Current Problem . . . . .	267
75. Diffusion Problems . . . . .	275

## CHAPTER VIII

### VECTOR ANALYSIS

76. Introduction . . . . .	284
77. Vector Algebra . . . . .	285
78. Vector Calculus . . . . .	291
79. Applications . . . . .	294
80. Scalar Fields; Gradient . . . . .	300
81. Vector Fields; Divergence and Curl . . . . .	305
82. Theorems of Stokes, Gauss, and Green . . . . .	309
83. Further Applications . . . . .	314

## CHAPTER IX

### PROBABILITY

84. Introduction . . . . .	324
85. Principles of Combination . . . . .	324
86. Probability: Definitions and Rules of Combination . . . . .	327
87. Repeated Trials. The Binomial Law . . . . .	329
88. The Probability Curve . . . . .	332
89. Probable Error; Standard Deviation . . . . .	337
90. The Method of Least Squares . . . . .	345

## CHAPTER X

## FUNCTIONS OF A COMPLEX VARIABLE

ART.	PAGE
91. Introduction .....	352
<i>Part I. Elementary Theory of Analytic Functions</i>	
92. Analytic Functions .....	352
93. Geometrical Aspects .....	360
94. Inverse Functions and Multiple-Valued Functions .....	363
<i>Part II. The Schwarz-Christoffel Transformation and Its Applications</i>	
95. The Schwarz-Christoffel Transformation .....	367
96. Flow Near a Right-Angled Corner .....	374
97. Flow Near Two 90° Corners .....	375
98. Edge Effect in a Condenser; Flow out of a Channel .....	377
99. Point Source and Point Sink .....	380
<i>Part III. Further Theory of Analytic Functions</i>	
100. Line Integrals .....	383
101. Cauchy's Integral Theorem and Integral Formula .....	390
102. Series Expansions and Singular Points .....	394
103. Residues .....	397

## CHAPTER XI

## OPERATIONAL CALCULUS

104. Introduction .....	407
<i>Part I. Elementary Operational Methods</i>	
105. The Operator $Q$ .....	407
106. Heaviside's Operator $p$ .....	415
107. Electrical Networks .....	422
108. The Superposition Theorem .....	429
109. Network Problems .....	432
<i>Part II. Operational Methods Based on the Theory of Functions</i>	
110. Bromwich's Line Integrals .....	437
111. Applications .....	448
ANSWERS TO PROBLEMS .....	457
INDEX .....	467
