| <b>Preface</b>                                     | <b>xi</b>  |
| <b>Acknowledgments</b>                             | <b>xix</b> |
| <br><b>PART I CONFLICT ANALYSIS IN PRACTICE</b>    |            |
| <b>Chapter 1 Introduction to Conflict Analysis</b> | <b>3</b>   |
| 1.1 Types of Conflicts                             | 3          |
| 1.2 Modeling and Analysis of Simple Conflicts      | 6          |
| 1.3 The Cuban Missile Crisis                       | 8          |
| 1.3.1 Historical Background                        | 9          |
| 1.3.2 Modeling the Cuban Crisis                    | 11         |
| 1.3.3 Stability Analysis                           | 14         |
| 1.3.4 Results of the Cuban Crisis Analysis         | 20         |
| 1.4 Important Concepts from Chapter 1              | 22         |
| Questions  | 23         |
| <br>   |            |
| <b>Chapter 2 Garrison Diversion Unit</b>           | <b>25</b>  |
| 2.1 Introduction                                   | 25         |
| 2.2 Garrison Diversion Unit                        | 25         |
| 2.3 Modeling the Garrison Conflict                 | 28         |
| 2.3.1 Players                                      | 29         |
| 2.3.2 Options                                      | 32         |
| 2.3.3 Outcome Removal                              | 33         |
| 2.3.4 Preferences                                  | 39         |
| 2.4 Stability Analysis                             | 44         |
| 2.5 Important Concepts from Chapter 2              | 49         |
| Questions  | 51         |

|                  |  |            |
|------------------|--|------------|
| <b>Chapter 3</b> | <b>Hypergame Analysis</b>                              | <b>53</b>  |
| 3.1              | Introduction   | 53         |
| 3.2              | Cuban Missile Crisis Hypergame                         | 54         |
| 3.2.1            | First Level Hypergames                                 | 55         |
| 3.2.2            | Cuban Missile Crisis as a First Level Hypergame        | 56         |
| 3.2.3            | Second Level Hypergames                                | 59         |
| 3.2.4            | Cuban Missile Crisis as a Second Level Hypergame       | 60         |
| 3.3              | Hypergame Analysis of the Normandy Invasion            | 64         |
| 3.3.1            | Historical Background                                  | 64         |
| 3.3.2            | Modeling D-Day as a Hypergame                          | 67         |
| 3.3.3            | Hypergame Structure                                    | 69         |
| 3.3.4            | Stability Analysis of the D-Day Hypergame              | 70         |
| 3.4              | Important Concepts from Chapter 3                      | 73         |
|                  | Questions  | 74         |
| <b>Chapter 4</b> | <b>Modeling Strategic Surprise Using Hypergames</b>    | <b>75</b>  |
| 4.1              | Introduction   | 75         |
| 4.2              | Fall of France   | 75         |
| 4.3              | Suez Crisis  | 79         |
| 4.3.1            | Historical Background                                  | 79         |
| 4.3.2            | Hypergame Modeling and Analysis                        | 86         |
| 4.4              | Important Concepts from Chapter 4                      | 97         |
|                  | Questions  | 97         |
| <b>Chapter 5</b> | <b>Sensitivity and Coalition Analysis</b>              | <b>99</b>  |
| 5.1              | Introduction   | 99         |
| 5.2              | Techniques for Sensitivity Analysis                    | 100        |
| 5.2.1            | Multiple Analyses                                      | 100        |
| 5.2.2            | Hypergame Analysis                                     | 101        |
| 5.2.3            | Conservative Sanction Criterion                        | 101        |
| 5.2.4            | Coalitions   | 103        |
| 5.3              | Historical Description of the Zimbabwe Conflict        | 104        |
| 5.4              | Stability Analysis of the Zimbabwe Conflict            | 108        |
| 5.4.1            | Modeling the Conflict                                  | 108        |
| 5.4.2            | Stability Analysis                                     | 112        |
| 5.5              | Coalition Analysis of the Zimbabwe Conflict            | 112        |
| 5.5.1            | Ordinality in Coalition Formation                      | 112        |
| 5.5.2            | Coalition Algorithm                                    | 116        |
| 5.5.3            | Stability Analysis for the Coalition Preference Vector | 123        |
| 5.5.4            | Compatibility of Coalition Members                     | 124        |
| 5.6              | Other Coalition Research                               | 126        |
| 5.7              | Important Concepts from Chapter 5                      | 129        |
|                  | Questions  | 130        |
| <b>Chapter 6</b> | <b>Dynamic Models and Probability Considerations</b>   | <b>131</b> |
| 6.1              | Introduction   | 131        |
| 6.2              | Watergate Tapes Conflict                               | 132        |
| 6.2.1            | History of the Watergate Conflict                      | 132        |

|   |   |            |
|---|---|------------|
| 6.2.2   | Players and Options                                   | 135        |
| 6.2.3   | Outcome Removal                                       | 136        |
| 6.2.4   | Preferences   | 136        |
| 6.3   | Static Analysis                                       | 139        |
| 6.4   | Extensive Form  | 139        |
| 6.5   | State Transition Approach                             | 142        |
| 6.5.1   | State Transition Model                                | 142        |
| 6.5.2   | Probability Considerations: The Afghan Battle         | 147        |
| 6.5.3   | Further Discussion of the State Transition Model      | 151        |
| 6.6   | State Transition Analysis of the Cuban Missile Crisis | 152        |
| 6.7   | Important Concepts from Chapter 6                     | 156        |
|   | Questions   | 157        |
| <b>Chapter 7 Computer Assistance in Conflict Analysis</b> |   | <b>159</b> |
| 7.1   | Introduction  | 159        |
| 7.2   | Poplar River Conflict                                 | 160        |
| 7.2.1   | History of the Conflict                               | 160        |
| 7.2.2   | Players   | 161        |
| 7.2.3   | Options   | 162        |
| 7.2.4   | Preferences   | 164        |
| 7.2.5   | Model Entry   | 165        |
| 7.3   | Outcome Removal                                       | 166        |
| 7.4   | Preference Vector Development                         | 167        |
| 7.5   | Stability Analysis                                    | 170        |
| 7.6   | State Transition Form                                 | 172        |
| 7.7   | Important Concepts from Chapter 7                     | 173        |
|   | Questions   | 174        |
| <b>Chapter 8 Conflict Analysis and Bargaining</b>         |   | <b>175</b> |
| 8.1   | Introduction  | 175        |
| 8.2   | Holston River Negotiations                            | 177        |
| 8.2.1   | Participants  | 177        |
| 8.2.2   | History of the Negotiations                           | 178        |
| 8.3   | Bargaining Analysis                                   | 181        |
| 8.3.1   | Modeling the Holston River Negotiations               | 182        |
| 8.3.2   | Stability Analysis of the Holston River Negotiations  | 184        |
| 8.4   | Important Concepts from Chapter 8                     | 189        |
|   | Questions   | 190        |
| <b>Chapter 9 Conflict Analysis and Negotiation</b>        |   | <b>191</b> |
| 9.1   | Introduction  | 191        |
| 9.2   | Strategic Negotiation                                 | 192        |
| 9.2.1   | Static Conflict Analysis                              | 192        |
| 9.2.2   | Hypergames in Negotiation                             | 194        |
| 9.2.3   | State Transition Model in Negotiation                 | 195        |
| 9.2.4   | Discussion  | 197        |

|                                       |     |
|---------------------------------------|-----|
| 9.3 Tactical Negotiation              | 198 |
| 9.4 Important Concepts from Chapter 9 | 199 |
| Questions                             | 199 |

## PART II CONFLICT ANALYSIS IN THEORY

|  |            |
|--|------------|
| <b>Chapter 10 Development of Metagame Analysis</b>             | <b>203</b> |
| 10.1 Introduction  | 203        |
| 10.2 Normal Form   | 204        |
| 10.3 Metagame Theory   | 205        |
| 10.4 Mathematical Description of Metagame Theory               | 209        |
| 10.4.1 Strategies and Outcomes                                 | 209        |
| 10.4.2 Preference Functions                                    | 210        |
| 10.4.3 Game Definition   | 211        |
| 10.4.4 Metarational Outcomes                                   | 211        |
| 10.4.5 Metagame kG   | 211        |
| 10.4.6 $\beta$ Operator  | 211        |
| 10.4.7 Metagame Preferences                                    | 212        |
| 10.4.8 Metarational Outcomes                                   | 212        |
| 10.4.9 Types of Metarational Outcomes                          | 214        |
| 10.5 Metagame Analysis   | 215        |
| 10.6 Important Concepts from Chapter 10                        | 219        |
| Questions  | 220        |
| <br>   |            |
| <b>Chapter 11 Conflict Analysis Methods</b>                    | <b>223</b> |
| 11.1 Introduction  | 223        |
| 11.2 The Two-Player Game                                       | 224        |
| 11.2.1 Credibility Assumption                                  | 224        |
| 11.2.2 Sequential Stability                                    | 225        |
| 11.2.3 Simultaneous Stability                                  | 225        |
| 11.2.4 Analysis Consequences                                   | 227        |
| 11.3 $n$ -Player Games   | 228        |
| 11.4 Nuclear Conflict  | 231        |
| 11.5 Important Concepts from Chapter 11                        | 233        |
| Questions  | 234        |
| <br>   |            |
| <b>Chapter 12 Theory and Implications of Conflict Analysis</b> | <b>235</b> |
| 12.1 Introduction  | 235        |
| 12.2 Foundations of Conflict Analysis                          | 237        |
| 12.3 Rationality   | 240        |
| 12.4 Utility and Transitivity                                  | 241        |
| 12.5 Equilibriums and Solution Concepts                        | 243        |
| 12.5.1 Nash Equilibriums and Metagame Analysis                 | 243        |
| 12.5.2 Nonmyopic Equilibriums                                  | 244        |
| 12.5.3 Stackelberg Equilibriums                                | 244        |
| 12.5.4 Pareto Optimality                                       | 246        |
| 12.5.5 Inducement  | 246        |

|   |     |
|---|-----|
| 12.6 Famous $2 \times 2$ Games          | 247 |
| 12.6.1 Prisoner's Dilemma               | 247 |
| 12.6.2 Naval Conflict                   | 250 |
| 12.6.3 Chicken                          | 252 |
| 12.6.4 Cookie Conflict                  | 257 |
| 12.7 Important Concepts from Chapter 12 | 258 |
| Questions                               | 259 |

**Chapter 13 Solution Procedures for Noncooperative Games** **261**

|   |     |
|---|-----|
| 13.1 Introduction                             | 261 |
| 13.2 Definitions and Conventions              | 262 |
| 13.3 Stability Concepts in $n$ -Person Games  | 263 |
| 13.3.1 Individual Stability Concepts          | 263 |
| 13.3.2 Group Stability Concepts               | 268 |
| 13.4 Stability Concepts in Two-Person Games   | 271 |
| 13.5 Stability Concepts in $2 \times 2$ Games | 274 |
| 13.6 Strict Ordinal Games                     | 278 |
| 13.7 Important Concepts from Chapter 13       | 280 |
| Questions                                     | 281 |

**Chapter 14 Advanced Dynamic Modeling** **283**

|   |     |
|---|-----|
| 14.1 Introduction   | 283 |
| 14.2 Supergames   | 283 |
| 14.3 Nuclear Conflict   | 286 |
| 14.3.1 Extensive Form Analysis  | 286 |
| 14.3.2 State Transition Model   | 288 |
| 14.3.3 Concluding Discussion of the Nuclear Conflict                        | 292 |
| 14.4 Time-Dependent Transition Matrices                                     | 294 |
| 14.4.1 Introduction   | 294 |
| 14.4.2 Time-Dependent State Transitions                                     | 294 |

| <b>Appendix B Negotiation Concepts</b>                           | <b>311</b> |
| B.1 Introduction   | 311        |
| B.2 Negotiation Moves  | 311        |
| B.3 Commitment   | 312        |
| B.4 Threats and Ambiguity  | 313        |
| B.5 Bounds of Negotiation  | 313        |
| B.6 Power  | 314        |
| B.7 Level of Aspiration  | 314        |
| B.8 Needs  | 315        |
| <b>Appendix C Summary of Classical Game Theoretic Techniques</b> | <b>317</b> |
| C.1 Introduction   | 317        |
| C.2 Games and Extensive Forms of Games                           | 317        |
| C.3 Strategies, the Normal Form, and Utilities                   | 318        |
| C.4 Two-Person Zero-Sum Games                                    | 319        |
| C.4.1 Equilibriums   | 319        |
| C.4.2 Mixed Strategies   | 320        |
| C.4.3 Solutions  | 321        |
| C.5 Two-Person Nonzero-Sum Games                                 | 324        |
| C.6 $n$ -Player Games  | 325        |
| <b>Appendix D Characterization Theorem</b>                       | <b>327</b> |
| D.1 Introduction   | 327        |
| D.2 Definitions  | 327        |
| D.3 Characterization Theorem for Metarational Outcomes           | 328        |
| <b>Appendix E Examples to Illustrate Existence</b>               | <b>333</b> |
| E.1 Introduction   | 333        |
| E.2 Existence Examples for Figure E.1                            | 334        |
| E.3 Existence Examples for Figure E.2                            | 335        |
| E.4 Existence Examples for Figure E.3                            | 336        |
| E.5 Existence Examples for Figure E.4                            | 337        |
| E.6 Existence Examples for Figure E.5                            | 338        |
| E.7 Existence Examples for Figure E.6                            | 340        |
| E.8 Existence Examples for Figure E.7                            | 342        |
| E.9 Existence Examples for Figure E.8                            | 344        |
| <b>Appendix F Special Classes of Games</b>                       | <b>347</b> |
| F.1 Introduction   | 347        |
| F.2 No-Conflict Games  | 347        |
