Contents

Preface vii

1 Introduction 1

2 Constitutive Models 6
2.1 Constitutive Models for Creep 6
2.2 New Generation of Constitutive Models for Inelastic Deformation 8
2.3 The Constitutive Model due to Hart 9

3 Three-dimensional Formulations 15
3.1 Elasticity 15
3.2 Time-independent Plasticity 20
3.3 Time-dependent Viscoplasticity 24

4 Solution Strategy and Time Integration 38
4.1 Solution Strategy 38
4.2 Time Integration and Time-step Selection 40
4.3 Comparison of Various Strategies for Uniaxial Problems 43

5 Planar Viscoplasticity Problems 50
5.1 Governing Differential Equations 50
5.2 Boundary Element Formulation for Displacement Rates. 51
5.3 Stress Rates 54
5.4 An Analytical Example for Plane Strain 55
5.5 An Analytical Example for Plane Stress 59
5.6 Finite Element Formulation 60
5.7 Numerical Implementation of BEM for Plane Stress..... 61

5.8 Numerical Results for Plane Stress Problems—Comparison of BEM and FEM Results 63
5.9 Integrals of the Plane Stress Kernels..... 72

6 Axisymmetric Viscoplasticity Problems..... 79
6.1 Governing Differential Equations..... 79
6.2 Boundary Element Formulation for Displacement Rates. 81
6.3 Stress Rates..... 84
6.4 Finite Element and Direct Formulations..... 87
6.5 Numerical Implementation of BEM 88
6.6 Numerical Results—Comparison of Various Solutions.. 92

7 Viscoplastic Torsion 104
7.1 Governing Differential Equations..... 104
7.2 Boundary Element Formulations 105
7.3 An Analytical Example 108
7.4 Finite Element Formulation 109
7.5 Numerical Results 110

8 Bending of Viscoplastic Plates 122
8.1 Governing Differential Equations..... 122
8.2 Boundary Element Formulations 124
8.3 Analytical Example for the Bending of a Circular Elastic Plate 128
8.4 Numerical Implementation and Solution Strategy 131
8.5 Numerical Results and Discussion..... 135
8.6 Appendix 140

9 Cracked Plates Loaded in Anti-plane Shear 150
9.1 Governing Differential Equations..... 150
9.2 Boundary Element Formulation 151
9.3 Line Integrals..... 158
9.4 Discretization and Implementation of BEM 160
9.5 Analytical and Finite Element Methods 162
9.6 Numerical Results by BEM..... 163

10 Planar Problems of Inelastic Fracture..... 180
10.1 Governing Differential Equations..... 180
10.2 Boundary Element Formulation..... 181
10.3 Illustrative Examples for Circular Geometries 190

10.4 Numerical Implementation 196
10.5 Numerical Results and Discussion..... 198

Index..... 205
