

Contents

Chapter 0	
Zero, Our Starting Point	2
Some Special Features of This Book	6
Chapter 1	
Getting Ready for a Good Beginning	12
Pre-Number Concepts	
Objectives for the Child	13
Teacher Goals	13
Helping the Child Develop Pre-Number Concepts	14
The Child's View	14
Classifying	15
Finding the Relation Between Two Sets	17
Conserving Relations	19
Classifying on the Basis of the As-Many-As Relation	20
Ordering Sets on the Basis of the More-Than or Less-Than Relation	21
Summary	22
Learning the Numbers 1 Through 10	23
Naming a Family of Sets with a Number	23
What About 10 and 0?	24
It's Time to Count	24
Getting Ready to Add and Subtract	26
The Computer Corner	27
Computer Tips	28
Ideas for Children with Special Needs: Writing Numerals and Numeral Names	28
Ideas for Enrichment: Classification Games	28
In Closing . . .	29
It's Think-Tank Time	30
<i>Suggested Readings</i>	<i>31</i>

Chapter 2

... 100s, 10s, 1s ... The Best Yet 32 **Our Base-Ten Numeration System**

Objectives for the Child	33
Teacher Goals	33
Understanding Numeration Systems	34
Introduction	34
A Base-Ten Numeration System	35
Reading and Writing with Larger Numbers	37
Extension to Decimal Fractions	38
Applications	38
A Few Advantages	38
Helping Children Understand Place Value	39
Activities for Teaching Place-Value Concepts	41
Place-Value Activities for Later Grades	43
Beyond Happy Faces: Place-Value Activities for Numbers	
Greater Than 1000	45
Rounding Numbers	47
A Variety of Interpretations for Large Numbers	47
The Computer Corner	51
Computer Tips	53
Ideas for Children with Special Needs: Reading Numerals	53
Ideas for Enrichment: Other Bases	53
In Closing ...	55
It's Think-Tank Time	56
<i>Suggested Readings</i>	56

Chapter 3

Better Ways to Use the Best 58 **Addition & Subtraction of Whole Numbers**

Objectives for the Child	59
Teacher Goals	59
Addition of Whole Numbers	60
Interpretations	61
Learning the Basic Facts of Addition	61
Sums Less Than 10	63
Sums That Equal 10	65
Sums Greater Than 10	65
Developing an Addition Algorithm	72
Subtraction of Whole Numbers	76
Interpretations	77
Relating Subtraction Sentences to the Basic Facts of Addition	79
Developing a Subtraction Algorithm	83
Subtraction Computation Involving Numbers	
Greater than 100	86
Other Computational Ideas	87

Using Mental Arithmetic	89
When to Teach What	90
The Computer Corner	91
The Computer Tips	91
Ideas for Children with Special Needs: Developing Concepts	92
Ideas for Enrichment: Integers	92
In Closing . . .	93
It's Think-Tank Time	93
<i>Suggested Readings</i>	94

Chapter 4

Better Ways to Use the Best . . . 96 **Multiplication & Division**

Objectives for the Child	97
Teacher Goals	97
Multiplication of Whole Numbers	98
Interpretations	98
Learning the Basic Facts of Multiplication	102
Properties of Multiplication	104
Activities for Skill Development	110
Products of Multiples of 10	111
Developing a Multiplication Algorithm	113
When to Teach What	116
Division of Whole Numbers	117
Interpretations	118
Developing a Division Algorithm	124
Estimation and Whole Numbers	129
Using Mental Arithmetic	131
When to Teach What	132
The Computer Corner	132
Computer Tips	133
Ideas for Children with Special Needs: Using Computers	133
Ideas for Enrichment: Finger Multiplication	134
In Closing . . .	135
It's Think-Tank Time	135
<i>Suggested Readings</i>	136

Chapter 5

Some Theory about Numbers 138 **Factors, Multiples, Primes & Composites**

Objectives for the Child	139
Teacher Goals	139
Factors and Multiples	140
Even Numbers and Odd Numbers	141
Classifying on the Basis of Number of Factors	143
Primes and Composites	146
Finding Factors of Whole Numbers	147

Greatest Common Factor	149
Least Common Multiple	151
The Computer Corner	154
Computer Tips	154
Ideas for Children with Special Needs: Even and Odd	155
Ideas for Enrichment: Patterns in Nature	155
In Closing . . .	156
It's Think-Tank Time	156
<i>Suggested Readings</i>	157

Chapter 6

Not All Numbers Are Whole Numbers 158

Representing, Adding, & Subtracting Rational Numbers

Objectives for the Child	159
Teacher Goals	159
The Need for Rational Numbers	160
Describing Parts	162
Describing Ratios	166
Learning to Use Rational Numbers	167
Exploratory Experiences	167
A More Structured Approach for Developing Key Concepts	168
Emphasizing Meaning	174
Developing Algorithms	174
A Better Way to Work With Rational Numbers	180
Exploratory Experiences	182
Addition and Subtraction with Decimals	186
Addition and Subtraction: Expanded Form	187
Percent	189
Estimation	190
The Computer Corner	191
Computer Tips	191
Ideas for Children With Special Needs: Visual Models for Decimal Fractions	192
Ideas for Enrichment: Scientific Notation	192
In Closing . . .	193
Its Think-Tank Time	193
<i>Suggested Readings</i>	194

Chapter 7

Security is Knowing Why 196

Multiplying & Dividing Rational Numbers

Objectives for the Child	197
Teacher Goals	197

Multiplication of Rational Numbers	198
The Additive Interpretation for Multiplication with Fractions	198
The Area Interpretation for Multiplication with Fractions	201
Algorithms for Multiplication with Fractions	203
Multiplication with Decimals	206
More About Percent	207
Reciprocals	208
Division of Rational Numbers	208
Interpretations for Division with Fractions	208
An Algorithm for Division with Fractions	210
Extending the Equivalent-Fraction Rule	211
Division with Decimals	212
Developing an Algorithm	213
Estimating	219
Products	219
Quotients	219
When To Teach What	221
The Computer Corner	222
Computer Tips	222
Ideas for Children with Special Needs: Percents Greater Than One	222
Ideas for Enrichment: Terminating and Repeating Decimals	223
In Closing . . .	224
It's Think-Tank Time	225
<i>Suggested Readings</i>	226

Chapter 8

Diagnosis, Before & After 228

Common Mathematical Difficulties

Teacher Goals	229
Getting Ready to Diagnose	231
What is Diagnosis?	231
What Learner Characteristic Can Be Diagnosed?	232
What Skills Must Teachers Have?	232
What Methods are Used for Diagnosing?	234
Common Mathematical Difficulties Involving Whole Numbers and Suggestions for Remediation	237
What Kind of Difficulties Are There?	237
Common Difficulties Involving Fractions and Suggestions for Remediation	253
Difficulties Associated with Fractions	253
Difficulties Using Decimals	259
Reading and Writing Difficulties	261
The Computer Corner	266
Computer Tips	266
In Closing . . .	267
It's Think-Tank Time	268
<i>Suggested Readings</i>	268

Chapter 9

Putting It All Together 270

Problem Solving

Objectives for the Child	271
Teacher Goals	271
What is Problem Solving?	272
Solving Routine Problems	273
Translating Word Problems Involving One Operation	274
Solving Number Sentences	278
Dealing with More Than One Operation	280
Dealing with Problems Involving Two Variables	282
Solving Unusual Problems	287
Encouraging Problem Solving in the Classroom	293
The Computer Corner	295
Computer Tips	297
In Closing . . .	297
It's Think-Tank Time	297
<i>Suggested Readings</i>	298

Chapter 10

The Shape of Things 300

Geometric Figures & Relationships

Teacher Goals	301
Geometric Figures	302
Points, Lines, Segments, and Rays	303
Plane Figures	303
Space Figures	307
Congruence and Similarity	309
Congruence	309
Similarity	312
Motions and Symmetry	314
Motions	314
Symmetry	316
In Closing . . .	318
It's Think-Tank Time	318
<i>Suggested Readings</i>	322

Chapter 11

Seeing is Believing 324

Children's Development of Geometric Ideas

Objectives for the Child	325
Teacher Goals	325
Before Age 4	328
From Ages 4 to 7	330
Geometry Concepts for Kindergarten Through	
Second Grade	331
From Ages 7 to 9	338
Geometry Concepts for the Second Through Fourth Grades	339

From Ages 9 to 11	345
Geometry Concepts for Grades Four Through Six	346
Ideas for Children with Special Needs: Classification Ideas	350
Ideas for Enrichment: Constructions	350
The Computer Corner	352
Computer Tips	352
In Closing . . .	352
It's Think-Tank Time	353
<i>Suggested Readings</i>	354

Chapter 12

Before You Teach Measurement 356

Attributes of Measurement . . .

The Metric System . . . Expectations

Teacher Goals	357
Attributes of Measurement	358
Using Metric Units of Measure	359
Getting Ready to Measure	366
Levels of Development	369
Measuring Area	370
Measuring Volume	372
Deciding on Measurement Experiments	373
In Closing . . .	373
It's Think-Tank Time	374
<i>Suggested Readings</i>	375

Chapter 13

Superstitious? Not Us . . . 376

Chapter 14

Sizing It Up 378

The Measurement of Attributes

Objectives for the Child	379
Teacher Goals	379
Measuring Length	380
Measuring Area	389
Measuring Volume	394
Measuring Weight	396
Measuring Angles	397
Measuring Time and Temperature	399
Time	399
Temperature	402
Estimation	402
Money	404
Ideas for Children with Special Needs: Measuring	406
Ideas for Enrichment: π	407
The Computer Corner	408
Computer Tips	408

In Closing . . .	409
It's Think-Tank Time	409
<i>Suggested Readings</i>	410

Chapter 15

Making Numbers Count 412

Organizing, Representing & Interpreting Data

Objectives for the Child	413
Teacher Goals	413
Statistics	415
Collecting and Organizing Data	415
Drawing Inferences	417
Probability	420
Using Familiar Language	420
Determining Possible Outcomes	421
The Probability of An Event	423
Ideas for Children with Special Needs: Graphs	426
Ideas for Enrichment: Interesting Data	426
The Computer Corner	427
Computer Tips	428
In Closing . . .	428
It's Think-Tank Time	429
<i>Suggested Readings</i>	430

Chapter 16

Calculators In the Classroom 432

Concepts & Computations

Objective for the Child	433
Teacher Goals	433
A Rationale for the Use of Calculators	435
Using Calculators to Teach	437
Place Value	438
Computation with Whole Numbers	439
Number Theory	443
Concepts Related to Rational Numbers	444
Problem Solving	448
In Closing . . .	452
It's Think-Tank Time	452
<i>Suggested Readings</i>	452

Chapter 17

Computers & Mathematics Instruction 454

Status & Direction

Teacher Goals	455
What is a Microcomputer?	456

Using Computers to Improve Instruction	458
Computer Directed Instruction	459
Array, Array: A Program for Concept Development	459
The Rule Genie: A Program for Thinking	462
Toystore: A Program of Simulation	463
Computer Directed Instruction: A Wrap-Up	464
Computer Enhanced Instruction	466
Models for Fractions: A Program That Draws Pictures	467
Certificate: A Program for Rewarding	469
The Item Database: A Program for Storing	469
Master Maker: Another Tool for the Teacher	472
Data: A Student Utility	473
Computer Managed Instruction	475
Instructional Management: Bits and Pieces	476
List: A Generic Tool	476
Mini-Grader: A Specific Tool	477
Putting the Pieces Together	478
Important Potpourri	479
In Closing . . .	480
It's Think-Tank Time	481
<i>Suggested Readings</i>	482

Chapter 18

The End . . . Your Beginning Toward Efficient Instruction **484**

Decide on a Plan	487
Keeping Records	487
Arranging and Managing the Classroom	488
Keep on Top of Things	490
The Computer Corner	491
Computer Tips	491
In Closing . . .	492
<i>Suggested Readings</i>	492

Appendix A

Instructional Objectives Chart **497**

Appendix B

Selected Answers for Think-Tank Time Exercises **500**

Appendix C

Material Sheets **513**

Index **543**
