

## CONTENTS

### Chapter I. General Theory

1. Basic Concepts and Formulas	1
2. Stress Functions	5
3. The Stresses and Displacements under Transformation of Coordinate System	12
4. Complex Expressions for Certain Mechanical Quantities	15
5. Boundary Conditions of Fundamental Problems: The Case of Bounded and Simply Connected Regions	19
6. The Case of Bounded and Multi-connected Regions	24
7. The Case of Unbounded Regions	29
8. Modified Second Fundamental Problems under General Relative Displacements	35

### Chapter II. General Methods of Solution for Fundamental Problems

9. First Fundamental Problems for Bounded and Simply Connected Regions	41
10. First Fundamental Problems for the Infinite Plane with a Hole	46
11. First Fundamental Problems for Multi-connected Regions	49
12. The General Method of Solution for Second Fundamental Problems	54
13. The Method of Solution for Modified Second Fundamental Problems	62

### Chapter III. Methods of Solution for Various Particular Problems

14. The Case of Circular Region	67
15. The Case of Infinite Plane with a Circular Hole	73

16. The Case of Circular Ring Region	81
17. Applications of Conformal Mapping	91
18. The Case of Half-plane	97
19. The Case of Cyclic Symmetry	105
20. The Methods of Solution for Cyclically Symmetric Problems	110
<b>Chapter IV. Problems with Compound Boundary Conditions</b>	
21. Mixed Boundary Problems	123
22. First Fundamental Problems of Welding	127
23. Second Fundamental Problems of Welding	135
24. Welding in the Whole Plane, Some Examples	140
<b>Chapter V. Fundamental Crack Problems</b>	
25. General Expressions of Complex Stress Functions	151
26. First Fundamental Problems for the Infinite Plane with Cracks	154
27. Second Fundamental Problems for the Infinite Plane with Cracks	159
28. Collinear or Co-circular Cracks in the Infinite Plane	162
29. Crack Problems for Bounded Regions	173
30. Simplification of the Method of Solution for First Fundamental Problems	182
<b>Chapter VI. Fundamental Crack Problems of Composite Materials</b>	
31. Fundamental Crack Problems of Composite Materials in the Infinite Plane	191
32. The Welding Problem for a Circular Plate with a Straight Crack	195
33. The Welding Problem for Two Half-planes with Cracks	203
34. Fundamental Crack Problems of Composite Materials for a Bounded Region	209
<b>Appendix. On the Uniqueness Theorems for Fundamental Problems</b>	
	217
<b>Bibliography</b>	227
<b>Index</b>	229
