
CONTENTS

1. Organizing and Summarizing Data	1
1.1 Introduction	1
1.2 Some Basic Concepts	1
1.3 The Ordered Array	4
1.4 Measures of Central Tendency	6
1.5 Measures of Dispersion	10
1.6 Grouped Data—The Frequency Distribution	14
1.7 Measures of Central Tendency Computed from Grouped Data	23
1.8 The Variance and Standard Deviation—Grouped Data	25
1.9 Computers and Biostatistical Analysis	28
1.10 Summary	29
<i>Review Questions and Exercises</i>	29
<i>References</i>	31
2. Some Basic Probability Concepts	34
2.1 Introduction	34
2.2 Two Views of Probability—Objective and Subjective	35
2.3 Elementary Properties of Probability	36
2.4 Set Theory and Set Notation (Basic Notions)	37
2.5 Counting Techniques—Permutations and Combinations	42
2.6 Calculating the Probability of an Event	50
2.7 Summary	56
<i>Review Questions and Exercises</i>	57
<i>References</i>	59
3. Probability Distributions	61
3.1 Introduction	61
3.2 Probability Distributions of Discrete Variables	61
3.3 The Binomial Distribution	64
3.4 The Poisson Distribution	71
3.5 Continuous Probability Distributions	74
3.6 The Normal Distribution	77

3.7	Summary	89
	<i>Review Questions and Exercises</i>	89
	<i>References</i>	91
4.	Some Important Sampling Distributions	93
4.1	Introduction	93
4.2	Simple Random Sampling	93
4.3	Sampling Distribution	97
4.4	Distribution of the Sample Mean	98
4.5	Distribution of the Difference Between Two Sample Means	107
4.6	Distribution of the Sample Proportion	112
4.7	Distribution of the Difference Between Two Sample Proportions	115
4.8	Summary	117
	<i>Review Questions and Exercises</i>	118
	<i>References</i>	120
5.	Estimation	121
5.1	Introduction	121
5.2	Confidence Interval for a Population Mean	124
5.3	Confidence Interval for the Difference Between Two Population Means	129
5.4	Confidence Interval for a Population Proportion	131
5.5	Confidence Interval for the Difference Between Two Population Proportions	131
5.6	The t Distribution	135
5.7	Determination of Sample Size for Estimating Means	142
5.8	Determination of Sample Size for Estimating Proportions	145
5.9	Confidence Interval for the Variance of a Normally Distributed Population	147
5.10	Confidence Interval for the Ratio of the Variances of Two Normally Distributed Populations	152
5.11	Summary	155
	<i>Review Questions and Exercises</i>	155
	<i>References</i>	157
6.	Hypothesis Testing	159
6.1	Introduction	159
6.2	Hypothesis Testing: A Single Population Mean	163
6.3	Hypothesis Testing: The Difference Between Two Population Means	174

6.4	Paired Comparisons	182
6.5	Hypothesis Testing: A Single Population Proportion	187
6.6	Hypothesis Testing: The Difference Between Two Population Proportions	189
6.7	Hypothesis Testing: A Single Population Variance	192
6.8	Hypothesis Testing: The Ratio of Two Population Variances	194
6.9	Summary	197
	<i>Review Questions and Exercises</i>	198
	<i>References</i>	201
7.	Analysis of Variance	203
7.1	Introduction	203
7.2	The Completely Randomized Design	204
7.3	The Randomized Complete Block Design	223
7.4	The Factorial Experiment	232
7.5	Miscellany	244
7.6	Summary	247
	<i>Review Questions and Exercises</i>	247
	<i>References</i>	249
8.	Simple Linear Regression and Correlation	254
8.1	Introduction	254
8.2	The Regression Model	255
8.3	The Sample Regression Equation	257
8.4	Evaluating the Regression Equation	265
8.5	Using the Regression Equation	277
8.6	The Correlation Model	281
8.7	The Correlation Coefficient	284
8.8	Some Precautions	294
8.9	Summary	296
	<i>Review Questions and Exercises</i>	297
	<i>References</i>	301
9.	Multiple Regression and Correlation	304
9.1	Introduction	304
9.2	The Multiple Regression Model	305
9.3	Obtaining the Multiple Regression Equation	307
9.4	Evaluating the Multiple Regression Equation	314
9.5	Using the Multiple Regression Equation	321
9.6	The Correlation Model	323
9.7	Choosing the Independent Variables for the Multiple Regression Equation	330

9.8	Summary	331
	<i>Review Questions and Exercises</i>	332
	<i>References</i>	335
10.	The Chi-Square Distribution and the Analysis of Frequencies	338
10.1	Introduction	338
10.2	The Mathematical Properties of the Chi-Square Distribution	338
10.3	Tests of Goodness-of-Fit	340
10.4	Test of Independence	352
10.5	Test of Homogeneity	361
10.6	Summary	366
	<i>Review Questions and Exercises</i>	366
	<i>References</i>	371
11.	Nonparametric and Distribution-Free Statistics	373
11.1	Introduction	373
11.2	Measurement Scales	374
11.3	The Sign Test.	376
11.4	The Median Test	383
11.5	The Kolmogorov-Smirnov Goodness-of-Fit Test	386
11.6	The Kruskal-Wallis One-Way Analysis of Variance by Ranks	392
11.7	The Friedman Two-Way Analysis of Variance by Ranks	397
11.8	The Spearman Rank Correlation Coefficient	402
11.9	Summary	409
	<i>Review Questions and Exercises</i>	410
	<i>References</i>	413
12.	Vital Statistics	417
12.1	Introduction	417
12.2	Death Rates and Ratios	418
12.3	Measures of Fertility	425
12.4	Measures of Morbidity.	428
12.5	Summary	429
	<i>References</i>	429
	<i>Appendix.</i>	431
	<i>Answers to Odd-Numbered Exercises</i>	491
	<i>Index</i>	501
