CONTENTS

A. PROBLEMS OF LAND USE MANAGEMENT 1

A. Charnes, K. E. Haynes, J. Hazleton, M. J. Ryan, "An Hierarchical Goal Programming Approach to Environmental-Land Use Management" 2

H. Bormann, "An Ecosystem Approach to Problem Solving" 14

F. Wielgolaski, "A Grazing Lands Simulation Model" 45

B. AIR, NOISE AND WATER POLLUTION CONTROL 84

J. Heaney, H. Sheikh, "Game Theoretic Approach to Equitable Regional Environmental Quality Management" 85

R. Abrams, "Optimization Models for Regional Air Pollution Control" 116

D. Loucks, "Environmental Noise Management" 138

L. Lijklema, "Models in Biological Wastewater Treatment: Objectives, Results, Applicability" 174

H. Gotaas, W. Galler, "Biological Filter Design Optimization" 204

C. CONTROL OF INFECTIOUS DISEASE 248

A. Arata, "Sampling & Mapping Reservoirs & Vectors of Human Disease" 249

W. Hirsch, I. Nåsell, "The Transmission and Control of Schistosome Infections" 271

K. Dietz, "Simulation Models for Genetic Control Alternatives" 299

W. Costello, H. Taylor, "Mathematical Models of the Sterile Male Technique of Insect Control" 318

D. SOCIAL AND BEHAVIORAL ANALYSIS 360

M. Beckmann, "The Limits to Growth in a Neo-Classical Model" 361

O. Coskunoglu, "Dynamic Optimization of the Trade-Off Between Production and Pollution" 371

D. Bayart, B. Collomb, J.-P. Ponssard, "A 'Pollution' Game: A Theoretical and Experimental Study" 386
