

Brief Contents

<i>Preface</i>	<i>xi</i>
<i>Acknowledgements</i>	<i>xv</i>
<i>List of Figures</i>	<i>xvii</i>
<i>List of Tables</i>	<i>xxiii</i>
<i>List of Exhibits</i>	<i>xxvii</i>

OM Structure | _____ **1**

Chapter 1	Om Basics	3
Chapter 2	Product and Product Design	25
Supplement to Chapter 2:	Economic Evaluation	62
Chapter 3	Process Selection and Design	81
Chapter 4	Capacity Design and Planning	113
Supplement to Chapter 4:	Linear Programming	145
Chapter 5	Facility Planning and Layout	163
Supplement to Chapter 5:	Transportation Problem	203

Infrastructure | _____ **223**

Chapter 6	Forecasting Techniques	225
Chapter 7	Managing for Quality	261
Supplement to Chapter 7:	Six Sigma and Statistical Quality Control	295
Chapter 8	Aggregate Planning	319
Supplement to Chapter 8:	Waiting Line Models	352
Chapter 9	The Supply Chain	373
Supplement to Chapter 9:	Inventory and Inventory Models	407
Chapter 10	MRP and Operations Scheduling	433
Supplement to Chapter 10:	Transportation Problem	478

People and Processes | _____ **487**

Chapter 11	Productivity, Work Analysis and Job Design	489
Chapter 12	Lean Manufacturing	525
Chapter 13	Project Management	551
Chapter 14	Maintenance and Safety	591

Chapter 15	Strategy and Operations Strategy	621
Chapter 16	Globalization and Operations	647

Case Studies | --- **675**

Case 1	Gunny Bags Inventory at Western India Cement Company	677
Case 2	Just in Time at Eicher Tractors	681
Case 3	Rang Bharti Pvt. Ltd. Gomia Plant	689
Case 4	Swarup Engineers Limited	701
Case 5	Vasant Industries (A)	705
Case 6	Enercon India: Project Planning	711
Case 7	Maintenance Management Game	737
Case 8	Supply Chain Management at Titan Industries Limited	741
Case 9	Lucas-TVS Limited: A Journey Towards Manufacturing Excellence	767

Glossary 785

Bibliography 805

Index 807

Detailed Contents

<i>Preface</i>	<i>xi</i>	Chapter 3: Process Selection and Design	81
<i>Acknowledgements</i>	<i>xv</i>	Analyzing a Process	84
<i>List of Figures</i>	<i>xvii</i>	Process Flow Charts'	88
<i>List of Tables</i>	<i>xxiii</i>	Linking Processes	88
<i>List of Exhibits</i>	<i>xxvii</i>	Typology of Processes	89
		Process Decisions	93
		Flexibility	96
		Level of Mechanization	98
		Process Choice	99
		Characteristics of Different Production Systems	101
		Services	103
		Designing Processes	105
		Conclusion	108
		Definitions And Terminology	110
		Exercises	111
OM Structure	1	Chapter 4: Capacity Design and Planning	113
Chapter 1: Om Basics	3	Capacity Planning	116
Historical Background	5	Measurement of Capacity	117
Scientific Management-time and Motion Studies	5	Theoretical Capacity	118
World War II To The 1960's - Operations Research	6	Individual Machine Capacity	119
The 1970s and 1980s - The Japanese Challenge	7	Capacity Planning Process - The Trigger	120
The 1990s and After	8	Quantitative Methods	125
Value Driven Approach	11	Improving Competitiveness by Creating Complex Resources	129
Operations Management Basics	13	Service Operations And System Capacity	130
The Operations Manager's Role	15	Factors of Scale, Learning and Experience	131
Interface with Other Functions	17	Capacity Expansion Strategies	138
Operations Management's Future Challenges	19	Conclusion	141
Conclusion	22	Definitions and Terminology	142
Definitions and Terminology	22	Exercises	143
Exercises	23	Supplement to Chapter 4: Linear Programming	145
Chapter 2: Product and Product Design	25	Common Characteristics of LP Problems	145
Typology of Products	28	Graphical Method	147
Product Lifecycle	30	The Simplex Method	153
Technology Lifecycle	31	Exercises	161
The Product Development Process	34	Chapter 5: Facility Planning and Layout	163
Product Architecture	40	Facility Planning	165
Making Economic Decisions	43	Global Level	166
New Product Development And Economic Cost	46	Macro Level	175
Product Development In Services	49	Micro Level	181
Product Development And Organizational Capabilities	49	Types of Layout	183
New Product Development And Organizational Capabilities	50	Process Layout	184
Conclusion	57	Product or Line Layout	188
Definitions And Terminology	58	Fixed Layout	194
Exercises	59		
Supplement to Chapter 2: Economic Evaluation	62		
Opportunity And Ownership Costs	62		
Payback Period Analysis	64		
Discounted Cash Flow Analysis	66		
Benefit-cost Ratios	68		
Sensitivity Analysis	69		
Break-even Method Of Investment Analysis	70		
Other Costing Methods	74		
Exercises	79		

Cellular or Group Layout	195	Chapter 8: Aggregate Planning	319
Comparison of Layouts	197	What is Aggregate Planning?	321
New Approaches to Layout Design	199	Costs and Aggregate Planning	327
Conclusion	200	Managing Supply and Demand	327
Definitions and Terminology	201	Level Strategy	332
Exercises	202	Methods for Aggregate Planning	338
Supplement to Chapter 5: Transportation Problem	203	Graphical and Charting Method	338
The Transportation Method	204	Aggregate Planning for Services	344
Assignment Problems (Hungarian Method):		Conclusion	348
Special Class of Transportation Problems	218	Definitions and Terminology	349
Exercises	220	Exercises	350
Infrastructure	223	Supplement to Chapter 8: Waiting Line Models	352
Chapter 6: Forecasting Techniques	225	Elements of Waiting Lines	353
Forecasting in Operations	227	Infinite Waiting-Line Model Formulation	358
Characterizing Demand	229	Finite Waiting Line Models	363
Demand Management	230	Performance Measures	365
Developing a Model	231	Definitions and Terminology	369
Modeling Demand	234	Exercises	370
Quantitative Methods	234	Chapter 9: The Supply Chain	373
Time Series	234	Materials Management and the Supply Chain	375
Regression Analysis	240	Supply Chain Processes	380
Forecast Errors	243	Supply Chain Models	381
Forecast Control	244	Purchasing	385
Decomposition of a Time Series	246	Logistics	389
Using Standard Computer Programs	249	Relationship Management	396
Qualitative Methods	252	Supply Chain Performance	401
Special Long-term Forecast Methodologies	254	Conclusion	404
Simulation	257	Definitions and Terminology	405
Conclusion	257	Exercises	406
Definitions and Terminology	259	Supplement to Chapter 9: Inventory and Inventory Models	407
Exercises	259	Inventory and Inventory Control	407
Chapter 7 Managing for Quality	261	Inventory Control	413
What is Quality?	264	Elementary Inventory Models	414
Quality Management Principles	266	Multiple Period Inventory Models	415
Quality Principles	267	More Complex Models	425
Leadership	271	Conclusion	430
Quality Improvement is for People at all Levels	274	Definitions and Terminology	430
Process Approach – Total Quality Management (TQM)	275	Exercises	431
Systems Approach to Management	278	Chapter 10: MRP and Operations Scheduling	433
Continual Improvement	279	What is Material Requirements Planning (MRP)?	435
Mutually Beneficial Supplier Relationships	287	Master Production Schedule (MPS)	437
The Quality Management Function	288	Bill of Materials	439
The Future	290	Identification of Inventory Items	442
The Shingo System	292	Inventory Records	442
Conclusion	293	Data Integrity	445
Definitions and Terminology	294	The MRP System	445
Exercises	294	MRP in Service Organizations	454
Supplement to Chapter 7: Six Sigma and Statistical Quality Control	295	Scheduling	454
Six Sigma	295	Gantt Charts	459
Statistical Quality Control	298	Job Shop Scheduling	461
Statistical Process Control	304	Labour-limited Environments	470
Analytical Tools	312	Scheduling in Services	472
Exercises	316	Managing Planning and Scheduling	473
		Conclusion – Information: A Key Resource	474
		Definitions and Terminology	474
		Exercises	476

Supplement to Chapter 10: Transportation Problem	478	Plant Safety	609
Theory of Constraints – Synchronized Manufacturing	478	Conclusion	615
Conclusion	484	Definitions and Terminology	618
Definitions and Terminology	486	Exercises	620
Exercises	486	Chapter 15: Strategy and Operations Strategy	621
People and Processes	487	Managing Strategy	624
Chapter 11: Productivity, Work Analysis and Job Design	489	Competitive Strategy	629
The Organization and Productivity	491	The Richardson, Taylor and Gordon Framework	637
Productivity and Production	494	Translating Strategy into Operational Effectiveness	639
Work Analysis	497	Conclusion	642
Work Measurement	510	Definitions and Terminology	643
Job Design	518	Exercises	644
Conclusion	522	Chapter 16: Globalization and Operations	647
Definitions and Terminology	523	The Internet	649
Exercises	524	E-Commerce	653
Chapter 12: Lean Manufacturing	525	World-wide Sourcing	658
The Lean concept	528	Conclusion	671
Lean Manufacturing Tools	529	Definitions and Terminology	672
Conclusion	548	Exercises	673
Definitions and Terminology	549	Case Studies	675
Exercises	550	Case 1: Gunny Bags Inventory at Western India Cement Company	677
Chapter 13: Project Management	551	Case 2: Just in Time at Eicher Tractors	681
Importance of Project Management	553	Case 3: Rang Bharti Pvt. Ltd. Gomia Plant	689
Project Management - Basics	553	Case 4: Swarup Engineers Limited	701
Classification of Project Schedules	560	Case 5: Vasant Industries (A)	705
Network Representation of a Project	561	Case 6: Enercon India: Project Planning	711
Using Project Software	574	Case 7: Maintenance Management Game	737
Project Planning Scheduling and Control System (PPSCS)	581	Case 8: Supply Chain Management at Titan Industries Limited	741
Multilevel Scheduling Systems	584	Case 9: Lucas-TVS Limited: A Journey Towards Manufacturing Excellence	767
Conclusion	586	<i>Glossary</i>	785
Definitions and Terminology	587	<i>Bibliography</i>	805
Exercises	588	<i>Index</i>	807
Chapter 14: Maintenance and Safety	591		
The Maintenance Function	593		
Maintenance Strategies	595		
Maintenance Economics	600		
Measurement of Maintenance Performance	605		
Asset Life-cycle Management	607
