

Table of Contents

Preface	vi
1. Nondifferentiable Functions in Optimization	1
2. Tangent Cones and Normal Vectors	12
3. Subderivatives and Subgradients	24
4. Lipschitzian Cases; Subgradients as Limits	39
5. Stationary Points and Subdifferential Calculus	51
6. Duality and Marginal Functions	77
7. Monotonicity of Subgradient Multifunctions	93
References	106
