

## Table of Contents

<u>Session 1</u> (Chairman: H. J. Borchers)	
D. Tagolnitzer: Analyticity properties of scattering amplitudes: a review of some recent developments. . . . .	1
M. Sato: Recent development in hyperfunction theory and its application to physics. (Microlocal analysis of S-matrices and related quantities.) . . . . .	13
<u>Session 11</u> (Chairman: H. Komatsu)	
M. Kashiwara: Micro-local calculus. . . . .	30
T. Kawai and H. P. Stapp: Microlocal study of S-matrix singularity structure. . . . .	38
M. Morimoto: Convolutors for ultrahyperfunctions. . . . .	49
<u>Session 13</u> (Chairman: M. Sato)	
T. Kinoshita and A. Ukawa: Mass singularities of Feynman amplitudes. . . . .	55
K. Pohlmeier: Large momentum behaviour of Feynman amplitudes. . . . .	59
G. Sommer: Spectral dependence of the analyticity domain of local vertex functions. . . . .	66
<u>Session 12</u> (Chairman: K. Nishijima)	
E. Brünig and P. Stichel: Asymptotics and light-cone singularities in quantum field theory. . . . .	72
S. Schlieder: Structure of singularities of Wightman-distributions and the Wilson-Zimmermann-expansion respectively lightcone-expansion. . . . .	85
B. Schroer: Conformal invariance in Minkowskian quantum field theory and global operator expansions. . . . .	92
K. Symanzik: On some massless superrenormalizable and non-renormalizable theories. . . . .	102
<u>Session 14</u> (Chairman: Y. Ohnuki)	
Y. Ohnuki and S. Kamefuchi: The locality condition in parafermi field theory. . . . .	107
M. Ninomiya and K. Watanabe: Bound state nature and deep inelastic structure functions. . . . .	111
V. P. Shelest: The physical content of the statistical bootstrap and high energy hadron interaction. . . . .	114

K. Kinoshita: Field theoretical approach to composite particle reactions. . . . .	116
<u>Session 2</u> (Chairman: J. R. Klauder)	
J. Glimm and A. Jaffe: Particles and bound states and progress toward unitarity and scaling. . . . .	118
K. Kikkawa: Field theory of relativistic strings. . . . .	128
<u>Session 21</u> (Chairman: N. Mugibayashi)	
K. Hepp: Results and problems in irreversible statistical mechanics of open systems. . . . .	138
J. S. Feldman and K. Osterwalder: The Wightman axioms and the mass gap for weakly coupled $(\phi^4)_3$ quantum field theories. . . . .	151
<u>Session 23</u> (Chairman: H. Ezawa)	
J. R. Klauder: Soluble models and the meaning of nonrenormalizability. . . . .	160
Y. Kato: Bound states and asymptotic fields in model field theories. . . . .	170
<u>Session 22</u> (Chairman: M. Ida)	
M. Minami: Feynman propagators associated with the Veneziano model. . . . .	175
T. Yoneya: Dual string models and quantum gravity. . . . .	180
G. Konisi and T. Saito: Physical states satisfying supergauge conditions in dual resonance models. . . . .	184
Y. Chikashige and K. Kamimura: The canonical quantization of a relativistic string. . . . .	187
<u>Session 24</u> (Chairman: K. Kawarabayashi)	
F. Gürsey: Algebraic methods and quark structure. . . . .	189
K. Sekine: Unitarity and asymptotic condition in a model with dipole ghost. . . . .	196
K. Yokoyama and Reijiro Kubo: Invariant gauge families inherent in Abelian-gauge field theory. . . . .	199
N. Nakazawa and M. Yamada: Space-time approach to anomalies in the Ward-Takahashi identities and implications in physical processes. . . . .	202
<u>Session 3</u> (Chairman: V. S. Vladimirov)	
K. Nishijima: Dispersion approach to Ward-Takahashi identities. . . . .	205
A. A. Slavnov: Renormalization of supersymmetric gauge theories. . . . .	214
<u>Session 31</u> (Chairman: T. Hida)	
K. Itô: Stochastic calculus. . . . .	218

Masatoshi Fukushima: Asymptotic properties of the spectral distributions of disordered systems. . . . .	224
M. Miyamoto: A remark to Harris's theorem on percolation. . . . .	228
<u>Session 33</u> (Chairman: K. Itô)	
I. Kubo: The ergodicity of the motion of a particle in a potential field. . . . .	230
T. Niwa: Ergodicity of some simple model systems of infinitely many particles. . . . .	236
<u>Session 32</u> (Chairman: Z. Maki)	
A. Hosoya and J. Ishida: New exact solutions of the classical Yang-Mills field equation. . . . .	238
J. Arafune, P. G. O. Freund, and C. J. Goebel: Topology of Higgs fields. . . . .	240
T. Maskawa and H. Nakajima: Spontaneous breaking of chiral symmetry in a vector-gluon model. . . . .	242
N. Nakanishi: Quantum field-theoretical approach to spontaneously broken gauge invariance. . . . .	245
H. Reeh: Reviews on axiomatic study of symmetry breaking. . . . .	249
<u>Session 34</u> (Chairman: N. Nakanishi)	
O. I. Zavialov: Structure of renormalized Feynman amplitudes. . . . .	256
Y. Fujii and Y. Takahashi: On the regularization in the Callan-Symanzik equation. . . . .	261
<u>Session 4</u> (Chairman: N. M. Hugenholtz)	
S. Doplicher: The statistics of particles in local quantum theories. . . . .	264
Ryogo Kubo: Relaxation and fluctuation of macrovariables. . . . .	274
<u>Session 41</u> (Chairman: K. Sekine)	
V. S. Vladimirov: Holomorphic functions with a nonnegative imaginary part in the future tube. . . . .	281
H. J. Borchers: Algebraic aspects of Wightman quantum field theory. . . . .	283
G. Reents: The infrared problem and non-Fock representations of the canonical commutation relations. . . . .	293
G. Lassner: Continuous representations of the test function algebra and the existence problem for quantum fields. . . . .	297
<u>Session 43</u> (Chairman: T. Nakano)	
D. W. Robinson: Unbounded derivations of $C^*$ algebras. . . . .	303
R. Arens: A method for making relativistic non-quantum systems by constructing the Hamiltonian and the other nine generating functions. . . . .	312

G. G. Emch: An algebraic approach to the theory of K-flows and K-entropy. . . . .	315
<u>Session 42</u> (Chairman: R. Abe)	
R. Jackiw: Symmetry restoration at finite temperature. . . . .	319
G. Jona-Lasinio: Critical behaviour of stationary random fields. . . . .	326
J. Zittartz: Phase transitions of continuous order. . . . .	330
<u>Session 44</u> (Chairman: S. Katsura)	
H. Nakano: Order of the phase transition related to the degeneracy and interaction with proposal for an exact problem. . . . .	336
T. Ogawa: The Heisenberg model on the Cayley tree. . . . .	339
C. Di Castro: Generalized Gell-Mann and Low group trans- formations: scaling variables and cross-over effects. . .	342
Y. Yamazaki: Generalizations and applications of Callan- Symanzik equations to statistical mechanics in critical phenomena. . . . .	349
T. Izuyama: On the rigorous definition of superfluidity and superconductivity. . . . .	353
<u>Session 5</u> (Chairman: D. Ruelle)	
J.-L. Lions: Variational problems and free boundary problems. . . . .	356
J. L. Lebowitz: Uniqueness, analyticity and decay properties of correlations in equilibrium systems. . . . .	370
<u>Session 51</u> (Chairman: H. Fujita)	
S. Matsuura: On the propagation of support of solutions to general systems of partial differential equations. . . .	380
M. Toda: Wave propagation in a non-linear lattice. . . . .	387
R. Jackiw: Quantization of non-linear waves. . . . .	394
<u>Session 53</u> (Chairman: M. Yamaguchi)	
Y. Kametaka: On the non-linear diffusion equation of Kolmogorov-Petrovskii-Piskunov type. . . . .	401
T. Nishida and M. Mimura: Global solutions to the Broadwell's model of Boltzmann equation for a simple discrete velocity gas. . . . .	408
<u>Session 52</u> (Chairman: N. Saito)	
H. Mori: Scaling method for asymptotic evaluation in nonequilibrium statistical mechanics. . . . .	413
Y. Kuramoto: Self-entrainment of a population of coupled non-linear oscillators. . . . .	420

M. Suzuki: Thermodynamic limit of non-equilibrium systems —extensive property, fluctuation and nonlinear relaxation. . . . .	423
<u>Session 54</u> (Chairman: H. Nakano)	
J. L. Lebowitz: Equilibrium states and ergodic properties of infinite systems. . . . .	432
H. Hasegawa: Variational principles for Markov processes and Onsager principle. . . . .	433
B. Mühlischlegel: Functional averages in statistical physics. . . . .	437
M. Takahashi: On the validity of collective variable description of Bose systems. . . . .	446
<u>Session 6</u> (Chairman: G. G. Emch)	
D. Ruelle: Equilibrium statistical mechanics of one- dimensional classical lattice systems. . . . .	449
T. Ikebe: A look at the development of spectral and scattering theory in Japan. . . . .	458
<u>Session 61</u> (Chairman: T. Ikebe)	
J. M. Combes: On the Born-Oppenheimer approximation. . . . .	467
S. T. Kuroda: Abstract approaches to spectral and scattering theory, contributions from Japan. . . . .	472
Y. Saltō: Eigenfunction expansions for differential operators with operator-valued coefficients and their applications to the Schrödinger operators with long- range potentials. . . . .	476
<u>Session 63</u> (Chairman: S. T. Kuroda)	
L. E. Thomas: Asymptotic completeness in three-particle quantum mechanical scattering. . . . .	483
K. Mochizuki: Decay and asymptotics for wave equations with dissipative term. . . . .	486
T. Sasakawa: Treatment of three-body problems in coordinate space. . . . .	491
<u>Session 62</u> (Chairman: H. Matsuda)	
B. Souillard: Links between decay properties of correla- tions and analyticity of the pressure and correlation functions. . . . .	497
A. Verbeure: Linear response, stability, cluster properties. . .	504
G. L. Sewell: Equilibrium and metastable states of classical systems. . . . .	510
J. T. Lewis and J. V. Pulè: Dynamical theories of Brownian motion. . . . .	516

Session 64 (Chairman: K. Kawasaki)

K. Ikeda: Distribution of zeros and the equation of state. . . . .	520
Y. Karaki: New theorems on algebraic equation and its application to statistical physics. . . . .	524
Masahisa Fukushima: Operator-valued-measure approach to spectra of two-dimensional classical harmonic lattices. . . . .	528
M. E. Mayer: Models for relativistic statistical mechanics. . . . .	532

Contributions by mail

C. DeWitt-Morette: Path integrals in Riemannian manifolds. . . . .	535
B. Simon: Bose quantum field theory as an Ising ferromagnet: recent developments. . . . .	543
