

TABLE OF CONTENTS

MOGENS NISS Assessment in Mathematics Education and its Effects: An Introduction	1
JEREMY KILPATRICK The Chain and the Arrow: From the History of Mathematics Assessment	31
GEOFFREY HOWSON The Relationship Between Assessment, Curriculum and Society	47
JIM RIDGWAY & DON PASSEY An International View of Mathematics Assessment — Through a Class, Darkly	57
PETER GALBRAITH Paradigms, Problems and Assessment: Some Ideological Implications	73
DAVID WHEELER Epistemological Issues and Challenges to Assessment: What is Mathematical Knowledge?	87
THOMAS A. ROMBERG How One Comes to Know: Models and Theories of the Learning of Mathematics	97
ANTOINE BODIN What Does to Assess Mean? The Case of Assessing Mathematical Knowledge	113
STIEG MELLIN-OLSEN A Critical View of Assessment in Mathematics Education: Where is the Student as a Subject?	143
HERBERT P. GINSBURG & SUSAN F. JACOBS & LUZ S. LOPEZ Assessing Mathematical Thinking and Learning Potential in Primary Grade Children	157
BENGT JOHANSSON Diagnostic Assessment in Arithmetic	169
JOHN IZARD Challenges to the Improvement of Assessment Practice	185

MALCOLM SWAN Improving the Design and Balance of Mathematical Assessment	195
DEREK FOXMAN The Assessment of Performance Unit's Monitoring Surveys 1978-1987	217
DAVID F. ROBITAILLE & J. STUART DONN TIMSS: The Third International Mathematics and Science Study	229
GILA HANNA The Validity of International Performance Comparisons	245
NORMAN L. WEBB Visualizing a Theory of the Assessment of Students' Knowledge of Mathematics	253
Index	265
