

TABLE OF CONTENTS

CHAPTER 1 - Plenary Session Addresses 1

- 1.1 Mathematics Improves the Mind 1
George Polya
- 1.2 Major Problems of Mathematics Education 1
Hans Freudenthal
- 1.3 Young Children's Acquisition of Language and Understanding of Mathematics 7
Hermina Sinclair
Reactions to Hermina Sinclair's Plenary Lecture 13
Bill Higginson
- 1.4 Some Experiences in Popularizing Mathematical Methods 16
Hua Loo-keng
Reactions to Hua Loo-keng's Plenary Lecture 23
Dorothy Bernstein
J.S. Gyakye Jackson

CHAPTER 2 - Universal Basic Education 27

- 2.1 Mathematics in General Primary Education 27
Romanus O. Ohuche
- 2.2 Back-to-Basics: Past, Present, Future 29
Max Sobel
- 2.3 Suggested Mathematics Curricula for Students Who Leave School at Early Ages 32
Shirley Frye
Alonso B. Viteri Garrido

CHAPTER 3 - Elementary Education 36

- 3.1 Roots of Failure in Primary School Arithmetic 36
Frederique Papy
- 3.2 Do We Still Need Fractions in the ELEMENTARY Curriculum? 37
Peter Hilton
Mary Laycock

CHAPTER 4 - Post-Secondary Education 44

- 4.1 Decline in Post-Secondary Students Continuing the Study of Mathematics 44
James T. Fey
R.R. McLone
Bienvenide F. Nebres
- 4.2 Is Calculus Essential? 50
Margaret E. Rayner
Fred Roberts
- 4.3 Mathematics and the Physical Science and Engineering 54
Gerhard Becker
Daniela Gori-Giorgi
Jean-Pierre Provost
- 4.4 Why We Must and How We Can Improve the Teaching of Post-Secondary Mathematics 62
Henry L. Alder
Detlef Laugwitz
- 4.5 Alternate Approaches to Beginning the Teaching of Calculus and the Effectiveness of These Methods
George Papy
Daniel Reisz

4.6	In What Ways Have the Mathematical Preparation of Students for Post-Secondary Mathematics Courses Changed?	70
	Kathleen Cross S.M. Sharfuddin	
4.7	Curriculum for A Mathematical Sciences Major	73
	Alan Tucker	
4.8	University Programs with an Industrial Problem Focus	77
	Jerome Spanier Germund Dahlquist A. Clayton Aucoin William E. Boyce J.L. Agnew	

CHAPTER 5 - The Profession of Teaching 89

5.1	Current Status and Trends in Teacher Education	89
	David Alexander Jeffrey Baxter Sr. Iluminada C. Coronel, f.m.m. Hilary Shuard	
5.2	Integration of Content and Pedagogy in Pre-Service Teacher Education	96
	Zbigniew Semadeni Julian Weissglass	
5.3	Preparation in Mathematics of a Prospective Elementary Teacher Today, in View of the Current Trends in Mathematics, in Schools, and in Society	100
	James E. Schultz	
5.4	Evaluation of Teachers and Their Teaching	102
	Thomas J. Cooney Edward C. Jacobsen	
5.5	Hand-held Calculators and Teacher Education	107
	Willy Vanhamme	
5.6	Computers in Mathematics Teacher Education	109
	Rosemary Fraser	
5.7	The Mathematical Preparation of Secondary Teachers - Content and Method	111
	Trevor Fletcher	
5.8	Special Assistance for the Beginning Teacher	113
	Edith Biggs Mervyn Dunkley	
5.9	The Making of a Professional Mathematics Teacher	118
	Gerald Rising Geoffry Howson	
5.10	The Dilemma of Teachers Between Teaching What They Like and Teaching What the Pupils Need to Know: How Much Freedom Should Teachers Have to Add Materials, How Much Material, Which Teachers?	124
	Andrew C. Porter	
5.11	Integration of Mathematical and Pedagogical Content In-Service Teacher Education: Successful and Unsuccessful Attempts	126
	David A. Sturges E. Glenadine Gibb	
5.12	In-Service Education for Secondary Teachers	131
	Martin Barner Michel Darche Richard Pallascio	
5.13	Support Services for Teachers of Mathematics	140
	Michael Silbert Max Stephens	

5.14	What is a Professional Teacher of Mathematics?	144
	John C. Eggsgard	
	Jacques Nimier	
	Leopoldo Varela	

CHAPTER 6 - Geometry 153

6.1	Geometry in the Secondary School	153
	Eric Gower	
	G. Holland	
	Jean Pederson	
	Julio Castineira Merino	
6.2	Geometric Activities in the Elementary School	161
	Koichi Abe	
	John Del Grande	
6.3	The Death of Geometry at the Post-Secondary Level	165
	Branko Grunbaum	
	Robert Osserman	
6.4	The Development of Children's Spatial Ideas	171
	Michael C. Mitchelmore	
	Dieter Lunkenbein	
	Kiyoshi Yokochi	
	Alan J. Bishop	

CHAPTER 7 - Stochastics 179

7.1	Statistics: Probability: Computer Science: Mathematics. Many Phases of One Program?	179
	Leo Klingens	
	Richard S. Pieters	
7.2	Vigor, Variety and Vision -- the Vitality of Statistics and Probability	186
	I.J. Good	
7.3	The Place of Probability in the Curriculum	190
	Ruma Falk	
	Tibor Nemetz	
7.4	The Nature of Statistics to be Taught in Schools	198
	Jim Swift	
	A.P. Shulte	
	Peter Holmes	
7.5	Statistics and Probability in Teacher Education	202
	Peter Holmes	
	Luis A. Santalo	

CHAPTER 8 - Applications 207

8.1	Mathematics and the Biological Sciences - Implications for Teaching	207
	Sam O. Ale	
	Diego Bricio Hernandez	
	Lilia del Riego	
8.2	The Relationship of Mathematics and the Teaching of Mathematics with the Social Sciences	214
	John Ling	
	Ivo W. Molenaar	
	Samuel Goldberg	
8.3	Applications, Modeling and Teacher Education	226
	Aristedes C. Barreto	
	Hugh Burkhardt	
8.4	The Use of Modules to Introduce Applied Mathematics into the Curriculum	230
	John Gaffney	

8.5	Teaching Applications of Mathematics F. van der Blij Douglas A. Quadling Paul C. Rosenbloom	233
8.6	The Interface between Mathematics and Employment Connie Knox David R. Mathews Rudolf Straesser Robert Lindsay P.C. Price Werner Blum	236
8.7	How Effective are Integrated Courses in Mathematics and Science for the Teaching of Mathematics? Mogens Niss Helmut Siemon	247
8.8	Materials Available Worldwide for Teaching Applications of Mathematics at the School Level Max S. Bell	252
8.9	Mutualism in Pure and Applied Mathematics Maynard Thompson Donald Bushaw Candido Sitia	267

CHAPTER 9 – Problem Solving 276

9.1	Teaching for Effective Problem Solving: A Challenging Problem Shmuel Avital Jose R. Pascual Ibarra Ian Isaacs	276
9.2	Real Problem Solving Diana Burkhardt	283
9.3	Mathematization, Its Nature and Its Use in Education Eric Love Marion Walter David Wheeler	285
9.4	The Mathematization of Situations Outside Mathematics from an Educational Point of View Rolf Biehler Tatsuro Miwa Christopher Ormell Vern Treilibs	291

CHAPTER 10 – Special Mathematical Topics 299

10.1	Algebraic Coding Theory J.H. van Lint	299
10.2	Combinatorics Nicolas Balacheff David Singmaster	303
10.3	The Impact of Algorithms on Mathematics Teaching Arthur Engel	312
10.4	Operations Research William F. Lucas	330
10.5	Maxima and Minima Without Calculus A.J. Lohwater Ivan Niven	336
10.6	Exploratory Data Analysis Ram Gnanadesikan Paul Tukey Andrew F. Siegel Jon R. Kettenring	344

CHAPTER 11 - Mathematics Curriculum 358

- 11.1 Successes and Failures of Mathematics Curricula in the Past Two Decades 358
H. Brian Griffiths
Ubiratan D'Ambrosio
Stephen S. Willoughby
- 11.2 Curriculum Recommendations for the 1980's by Several National Committees 366
Mohammed El Tom
W.H. Cockcroft
David F. Robitaille
- 11.3 Curriculum Changes During the 1980's 371
Shigeo Katagiri
Alan Osborne
Hans-Christian Reichel
- 11.4 The Changing Curriculum - An International Perspective 382
E.E. Oldham
- 11.5 Models of Curriculum Development 384
Tashio Miyamoto and Ko Gimbayasu
James M. Moser
- 11.6 Mathematics for Secondary School Students 388
Harold C. Trimble
- 11.7 What Should be Dropped from the Secondary School Mathematics Curriculum to Make Room for New Topics? 390
Ping-tung Chang
Zalman Usiskin
- 11.8 Alternative Approaches to the Teaching of Algebra in the Secondary School 394
Harry S.J. Instone
- 11.9 How Can You Use History of Mathematics in Teaching Mathematics in Primary and Secondary Schools? 396
Casey Humphreys
Bruce Meserve
Leo Rogers
Maassouma M. Kazim

CHAPTER 12 - The Begle Memorial Series on Research in Mathematics Education 405

- 12.1 Critical Variables in Mathematics Education 405
Richard E. Snow
Herbert J. Walberg
- 12.2 Some Critical Variables Revisited 412
Christine Keitel-Kreidt
Donald J. Dessart
L. Ray Carry
Jens H. Lorenz
Nicholas A. Branca
- 12.3 Some New Directions for Research in Mathematics Education 424
Richard E. Mayer
Edward A. Silver
Robert B. Davis
Gunnar Gjone
John P. Keeves
Thomas Cooney

CHAPTER 13 - Research in Mathematics Education 444

- 13.1 The Relevance of Philosophy and History of Science and Mathematics for Mathematical Education 444
Niels Jahnke
Rolando Chauqui
Giles Lachaud
David Pimm

- 13.2 Research in Mathematical Problem Solving 452
Gerald A. Goldin
Alan H. Schoenfeld
- 13.3 Researchable Questions Asked by Teachers 456
Elaine Bologna
Sadaaki Fujimori
Douglas E. Scott
Richard J. Shumway
- 13.4 Alternative Methodologies for Research in Mathematics Education 461
George Booker
Jack Easley
Francois Pluvinage
R.W. Scholz
Leslie P. Steffe
Joan Yates
- 13.5 Error Analyses of Childrens' Arithmetic Performance 474
Annie Bessot
Leroy C. Callahan
Roy Hollands
Fredricka Reisman
- 13.6 Comparative Study of the Development of Mathematical Education as a Professional Discipline in Different Countries 482
Gert Schubring
Mahdi Abdeljaouad
Phillip S. Jones
Janine Rogalski
Gert Shubring
Derek Woodrow
Vaclaw Zawadowski
- 13.7 The Development of Mathematical Abilities in Children 489
Jeremy Kilpatrick
Horacio Rimoldi
Raymond Sumner
Ruth Rees
- 13.8 The Child's Concept of Number 499
Karen Fuson
Shuntaro Sato
Claude Comiti
Tom Kieren
Gerhard Steiner
- 13.9 Relation Between Research on Mathematics Education and Research on Science Education. Problems of Common Interest and Future Cooperation 511
Charles Taylor
Anthony P. French
Robert Karplus
Gerard Vergnaud
- 13.10 Central Research Institutes for Mathematical Education. What Can They Contribute to the Development of the Discipline and the Interrelation between Theory and Practice? 520
Edward Esty
Georges Glaeser
Heini Halberstam
Yoshihiko Hashimoto
Thomas Romberg
Christine Keitel
B. Winkelmann
- 13.11 The Functioning of Intelligence and the Understanding of Mathematics 530
Richard Lesh
Richard Skemp
Laurie Buxton
Nicholas Herscovics

13.12	The Young Adolescent's Understanding of Mathematics	541
	Stanley Bezuska	
	Kath Hart	

CHAPTER 14 - Assessment 546

14.1	Assessing Pupils' Performance in Mathematics	546
	Norbert Knoche	
	Robert Lindsay	
	Ann McAloon	
14.2	Issues, Methods and Results of National Mathematics Assessments	553
	Bob Roberts	

CHAPTER 15 - Competitions 557

15.1	Mathematical Competitions, Contests, Olympiads	557
	Jan van de Craats	
	Neville Gale	
	Jose Ipina	
	Lucien Kieffer	
	Murray Klamkin	
	Peter J. O'Halloran	
	Peter R. Sanders	
	Janos Suranyi	
15.2	Mathematics Competitions: Philosophy, Organization and Content	566
	Albert Kalfus	

CHAPTER 16 - Language and Mathematics 568

16.1	Language and the Teaching of Mathematics	568
	A. Geoffrey Howson	
16.2	The Relationship Between the Development of Language in Children and the Development of Mathematical Concepts in Children	573
	F.D. Lowenthal	
	Michele Pellerey	
	Colette Laborde	
	Tsutomu Hosoi	
16.3	Teaching Mathematics in a Second Language	582
	Maurizio Gnere	
	Althea Young	

CHAPTER 17 - Objectives 587

17.1	Teaching for Combined Process and Content Objectives	587
	Alan W. Bell	
	A.J. Dawson	
	P.G. Human	
17.2	The Complementary Role of Intuitive and Analytical Reasoning	595
	Erich Wittmann	
	Efraim Fischbein	
	Leon A. Henkin	

CHAPTER 18 - Technology 605

18.1	The Effect of the Use of Calculators on the Initial Development and Acquisition of Mathematical Concepts and Skills	605
	Hartwig Meissner	
18.2	A Mini-Course on Symbolic and Algebraic Computer Programming Systems	606
	Richard J. Fateman	

18.3	The Use of Programmable Calculators in the Teaching of Mathematics Klaus-D. Graf Guy Noel K.A. Keil H. Lothe	612
18.4	Perspectives and Experiences with Computer-Assisted Instruction in Mathematics D. Alderman R. Gunzhauser	623
18.5	Computer Literacy / Awareness in Schools; What, How and for Whom? David C. Johnson Claudette Vieules Andrew Molnar	627
18.6	The Technological Revolution and Its Impact on Mathematics Education Andrea DiSessa	632
18.7	Calculators in the Pre-Secondary School Marilyn Suydam A. Wynands	637

CHAPTER 19 - Forms and Modes of Instruction 641

19.1	Distance Education for School-age Children David Roseveare	641
19.2	Teaching Mathematics in Mixed-Ability Groups Denis C. Kennedy David Lingard	643
19.3	Approaching Mathematics through the Arts Emma Castelnovo Paul Delannoy James R.C. Leitzel	648
19.4	The Use and Effectiveness of Mathematics Instructional Games Margariete Montague Wheeler	652
19.5	Strategies for Improving Remediation Efforts Ronald Davis Deborah Hughes Hallett Gerald Kulm Joan R. Leitzel	654
19.6	Individualized Instruction and Programmed Instruction F. Alvarado	661

CHAPTER 20 - Women and Mathematics 665

20.1	A Community Action Model to Increase the Participation of Girls and Young Women in Mathematics Elizabeth Stage Kay Gilliland Nancy Kreinberg Elizabeth Fennema	665
20.2	Contributions by Women to Mathematics Education Kristina Leeb-Lundberg	671
20.3	The Status of Women and Girls in Mathematics: Progress and Problems Marjorie C. Carss Eileen L. Poiani Nancy Shelley Dora Helen Skypek	674
20.4	Special Problems of Women in Mathematics Erika Schildkamp-Kundiger	682

- 21.1 Curriculum Organizations and Teaching Modes That Successfully Provide for the Gifted Learner 688
A.L. Blakers
Isabelle P. Rucker
Burt A. Kaufman
Gerald Rising
Dorothy S. Strong
Arnold E. Ross
Graham T.Q. Hoare
- 21.2 Distance Education for Adults 702
Michael Crampin
- 21.3 Adult Numeracy - Programmes for Adults Not in School 705
Anna Jackson
Peter Kaner
- 21.4 Problems of Defining the Mathematics Curriculum in Rural Communities 708
Desmond Broomes
P.K. Kuperus
- 21.5 Participation of the Handicapped in Mathematics 711
Robert Dieschbourg
Carole Greenes
Esther Pillar Grossi
