

# Contents

Introduction	
<i>Carson T. Schütze and Victor S. Ferreira</i> .....	1
Cheap repairs: A Distributed Morphology toolkit for sentence construction	
<i>Roland Pfau</i> .....	9
Cheap but not free: Commentary on Pfau 'Cheap repairs'	
<i>Adam Albright</i> .....	35
A typology of suprasegmental structure	
<i>Thomas Berg</i> .....	53
Using slips to study phonotactic learning in the laboratory	
<i>Gary S. Dell and Jill A. Warker</i> .....	75
Constraint interaction: A lingua franca for stochastic theories of language	
<i>Matthew Goldrick</i> .....	95
Articulatory perspectives on errors	
<i>Marianne Pouplier</i> .....	115
Gradience and asymmetries in phonological speech errors	
<i>Joseph Paul Stemberger</i> .....	133
Walking the tightrope between cognition and articulation: The state of the art in the phonetics of speech errors	
<i>Stefan A. Frisch</i> .....	155
A syntactic analysis of interference in subject–verb agreement	
<i>Julie Franck, Ulrich H. Frauenfelder and Luigi Rizzi</i> .....	173
Pronoun production: Word or world knowledge?	
<i>L. Robert Slevc, Liane Wardlow Lane and Victor S. Ferreira</i> .....	191
Case particle errors in Japanese: Is the nominative <i>ga</i> a default case marker in sentence production?	
<i>Noriko Iwasaki</i> .....	205
Exchanging elicits: Stem-exchange errors and syntactic category shifts	
<i>Liane Wardlow Lane, L. Robert Slevc and Victor S. Ferreira</i> .....	221
Alignment in syntactic blending	
<i>Elizabeth Coppock</i> .....	233
Grammatical gender is everywhere, even on the tip of the mind: An investigation into retrieval failures	
<i>Belen Lopez Cutrin and Gabriella Vigliocco</i> .....	253
Syllable, word, and phoneme frequency effects in Spanish phonological speech errors: The David effect on the source of the error	
<i>Julio Santiago, Elvira Pérez, Alfonso Palma and     Joseph Paul Stemberger</i> .....	265
Aphasic errors in expressing location: Implications for production models	
<i>Lise Menn and Michael Gottfried</i> .....	305
Sign Language: Typology vs. modality	
<i>Helen Leuninger, Annette Hohenberger and Eva Waleschkowski</i> .....	317
Universals vs. language-specific factors in speech production planning: The effect of prosody and information structure	
<i>Jeri J. Jaeger</i> .....	347
Comparing effect sizes in naturalistic speech error data with Dell's a/b ratio: A methodological note	
<i>Joseph Paul Stemberger</i> .....	363
What traditional speech error corpora can tell us (and what they can't): How not to throw the baby out with the bathwater	
<i>Stefanie Shattuck-Hufnagel</i> .....	373
What should we do with our speech error corpora? Notes from the panel discussion	
<i>Carson T. Schütze and Victor S. Ferreira</i> .....	383
Speech error research: Comments on the state of the art	
<i>Merrill Garrett</i> .....	395
