Introduction	11
PART ONE: ALPINE SKIING	
Skiing with carving skis – what is new? E. Müller, C. Schiefermüller, J. Kröll and H. Schwameder	15
Alpine ski physiology: retro and prospectus J. Karlsson	23
Induction of endogenous Erythropoietin: hypoxic, exercise or natremic stimulus? D. Roberts	39
Analysis of downhill ski performance using GPS and grounding force recording S. Ducret, P. Ribot, R. Vargiolu, J. Lawrence and A. Midol	56
Energy supply mechanisms in alpine ski racing – consequences for testing and training U. Hartmann, A. Mader, M. Niessen, P. Spitzenpfeil and J. Lehnen	67
Inline-skating as a dry land modality for slalom racers – electromyographic and dynamic similarities and differences J. Kröll, C. Schiefermüller, J. Birklbauer and E. Müller	76
Time advantage using an improved slalom technique O. Kugovnik, M. Supej and B. Nemec	87
Determination of forces in carving using three independent methods A. Lüthi, P. Federolf, M. Fauve, K. Oberhofer, H. Rhyner, W. Ammann, G. Stricker, C. Schiefermüller, E. Eitzlmair, H. Schwameder and E. Müller	96

Contents

Role of heat shock proteins in sports activities: validation with in situ test	107
A. Midol, S. Ducret, G. Gutierrez and M. Serrar	
Power characteristics and lower limb force imbalances during loaded squat jumps in elite Austrian ski racers	115
C. Patterson, C. Raschner, R. Pühringer and H. Platzer	
3-D kinematics and kinetic analysis of G-Slalom in elite skiers at Val Badia World Cup race in 2002	125
R. Pozzo, A. Canclini, C. Cotelli and G. Baroni	
On the measurement of the stiffness of skis	136
F. Rainer, W. Nachbauer, K. Schindelwig and P. Kaps	
Cornerstones of a holistic educational concept in youth alpine ski racing – exemplified by the Skigymnasium Stams	148
C. Raschner, R. Huber, A. Staudacher, J. Kröll, C. Patterson, R. Pühringer and E. Müller	
Physiological aspects of alpine skiing with differently shaped skis	166
Y. Röder, H. Vater, K. Vater, H. Riehle and H. Haag	
The skier's centre of gravity as a reference point in movement analyses for different designated systems	172
C. Schiefermüller, S. Lindinger and E. Müller	
The effects of AD Libitum Fluid ingestion on fluid balance during alpine skiing in recreational skiers	186
J. Seifert, E. Burke, A. White, R. Kipp and M. Luetkemeier	
Causes and consequences of overbalance in alpine ski racing - a qualitative video analysis since 1994	195
P. Spitzenpfeil, S. Lipfert, M. Gaebe, K. Waibel, S. Burger and U. Hartmann	

Evaluation of a specific training device in alpine skiing P. Spitzenpfeil, M. Niessen, N. Rienaecker and U. Hartmann	204
Advanced analysis of alpine skiing based on 3D kinematic measurements M. Supej, O. Kugovnik and B. Nemec	216
Energy principle used for estimating the quality of a racing ski turn M. Supej, O. Kugovnik and B. Nemec	228
Accelerated rehabilitation after ACL reconstruction in professional alpine skiers E. Tellatin, L. Boldrini and G. Roi	238
The dynamographic and kinematographic method application for a short carving turn S. Vodičková, A. Lufinka and T. Zůbek	247
Oxygenation and deoxygenation of thigh muscle tissue during isometric and dynamic exercise in junior male and female competitive alpine ski racers S. von Duvillard	257
PART TWO: CROSS COUNTRY SKIING	
Current practices in altitude training R. Wilber	275
Body composition and selected maximal functional and performance characteristics in top Czech young biathletes V. Bunc, V. Vávra and P. Levora	300

Contents

3-D kinematics of double poling in classical technique of elite cross-country skiers engaged in world championships races (1999-2003)	308
A. Canclini, R. Pozzo, C. Cotelli and G. Baroni	
A biomechanical and performance related validation of a specific upper body testing and training device for strength abilities in cross-country ski racing	317
S. Lindinger, T. Stöggl and E. Müller	
A specific upper body testing and training device and concept for strength capacities in cross-country ski racing	326
T. Stöggl, E. Müller and S. Lindinger	
Ground reaction forces from poles and ski in cross-country skiing and 3-D kinematic analysis	341
M. Tagliabue, A. Canclini, R. Pozzo, C. Cotelli, R. Bonomi and G. Baroni	
PART THREE: SKI JUMPING	
Discipline-specific biomechanical diagnosis concept in ski jumping	349
D. Hahn, A. Schwirtz, A. Huber and P. Bösl	
Physical characteristics of Japanese female ski jumpers	360
H. Sasaki, K. Tsunoda, H. Hoshino, K. Maeda, T. Koike and T. Sasaki	
Kinetic analysis of ski jumping in the period of transition area	367
T. Sasaki, K. Tsunoda and T. Koike	
Kinematic characteristics of the early flight phase in ski-jumping	381
H. Schwameder, E. Müller, E. Lindenhofer, G. De Monte, W. Potthast, G. Brüggemann, M. Virmavirta, J. Isoletho, P. Komi	

PART FOUR: SNOW

Predicting snow conditions for the optimization of race piste preparation	395
S. Bethke, M. Fauve, C. Fierz, M. Lehning, O. Martius, H. Rhyner and W. Ammann	
Influence of snow and weather characteristics on the gliding properties of skis	401
M. Fauve, D. Buhl, H. Rhyner, M. Schneebeli and W. Ammann	
Surface metrology of ski base textures	411
S. Jordan, T. Bergstrom, D. Geiger and C. Brown	
Measurement of friction coefficient for ski-sliding at low speeds	423
K. Nikki, S. Haizuka, I. Tomizawa, K. Kaneko, S. Saito, K. Shirahata, T. Asai, M. Izumiya, T. Kitamura and A. Ishii	
Index of authors	433
