	Page
Preface	3
Introduction	7
I. Determinables	11
1. Determinables as Adjectives	12
2. Determinables as Classes	14
3. Determinables as Functors	18
4. Fundamentum Divisionis	20
5. Determination	23
6. State Spaces	28
7. Some Comparisons	31
Notes	34
II. Concepts	37
1. Partial Cartesian Products	38
2. A Representation of Concepts: Systems F and D^1	41
3. Categories: Systems F_+ and D_+	43
4. Negations: System K	45
5. Kauppi's Calculus of Concepts	50
6. Continuous Lattices	54
Notes	60
III. Points of View	63
1. What is a Point of View	63
2. The Definition for a Point of View	65
3. Partitions and Points of View: Ontologies	68
4. Q-Predicates and Constituents	73
5. P-Sets	76
Notes	81

IV. The Logic of Points of View	83
1. Properties and Relations	83
2. The Language $L(I)$	88
3. Semantics of $L(I)$	89
4. I-Logic	93
5. Some Other Systems	106
Notes	107
V. Glimpses Beyond	109
1. Free Logic	109
2. Modal Logic and Analyticity	112
3. Relative Identity	117
4. Identification and Essence	120
5. Comparability of Bases	123
6. Theories	128
7. Dialectics	130
8. Realism	140
9. The Scientific Image	143
Notes	146
Bibliography	150
