## Part I Introduction to Kinetics and Many-Body Theory

---

<b>1</b>	<b>Boltzmann Equation</b> . . . . .	<b>3</b>
1.1	Heuristic Derivation of the Semiclassical Boltzmann Equation . . . . .	3
1.2	Approach to Equilibrium: H-Theorem . . . . .	5
1.3	Linearization: Eigenfunction Expansion . . . . .	8
<b>2</b>	<b>Numerical Solutions of the Boltzmann Equation</b> . . . . .	<b>11</b>
2.1	Introduction . . . . .	11
2.2	Linearized Coulomb Boltzmann Kinetics of a 2D Electron Gas . . . . .	12
2.3	Ensemble Monte Carlo Simulation . . . . .	20
2.3.1	General Theory . . . . .	20
2.3.2	Simulation of the Relaxation Kinetics of a 2D Electron Gas . . . . .	23
2.4	$N^+N^-N^+$ Structure: Boltzmann Equation Analysis . . . . .	29
<b>3</b>	<b>Equilibrium Green Function Theory</b> . . . . .	<b>35</b>
3.1	Second Quantization . . . . .	35
3.2	Density Matrix Equations: An Elementary Derivation of a Non-Markovian Quantum Kinetic Equation . . . . .	38
3.3	Green Functions . . . . .	41
3.3.1	Examples of Measurable Quantities . . . . .	43
3.4	Fluctuation–Dissipation Theorem . . . . .	45
3.5	Perturbation Expansion of the Green Function . . . . .	47
3.6	Examples of Simple Solvable Models . . . . .	50
3.6.1	Free-Particle Green Function . . . . .	50
3.6.2	Resonant-Level Model . . . . .	50

3.7	Self-Energy .....	52
3.7.1	Electron–Phonon Interaction .....	52
3.7.2	Elastic Impurity System: Impurity Averaging .....	54
3.8	Finite Temperatures .....	58

---

## Part II Nonequilibrium Many-Body Theory

---

<b>4</b>	<b>Contour-Ordered Green Functions</b> .....	63
4.1	General Remarks .....	63
4.2	Two Transformations .....	64
4.3	Analytic Continuation.....	69
<b>5</b>	<b>Basic Quantum Kinetic Equations</b> .....	75
5.1	Introductory Remarks.....	75
5.2	The Kadanoff–Baym Formulation .....	75
5.3	Keldysh Formulation.....	77
<b>6</b>	<b>Boltzmann Limit</b> .....	79
6.1	Gradient Expansion.....	79
6.2	Quasiparticle Approximation.....	81
6.3	Recovery of the Boltzmann Equation.....	82
<b>7</b>	<b>Gauge Invariance</b> .....	85
7.1	Choice of Variables .....	85
7.2	Gauge Invariant Quantum Kinetic Equation .....	87
7.2.1	Driving Term .....	87
7.2.2	Collision Term .....	90
7.3	Retarded Green Function .....	91
<b>8</b>	<b>Quantum Distribution Functions</b> .....	93
8.1	Relation to Observables, and the Wigner Function .....	93
8.2	Generalized Kadanoff–Baym Ansatz .....	94
8.3	Summary of the Main Formal Results .....	97

---

## Part III Quantum Transport in Semiconductors

---

<b>9</b>	<b>Linear Transport</b> .....	101
9.1	Quantum Boltzmann Equation .....	101
9.2	Linear Conductivity of Electron–Elastic Impurity Systems.....	104
9.2.1	Kubo Formula .....	105
9.2.2	Quantum Kinetic Formulation.....	109
9.3	Weak Localization Corrections to Electrical Conductivity ..	111

<b>10</b>	<b>Field-Dependent Green Functions</b> .....	115
10.1	Free Green Functions and Spectral Functions in an Electric Field .....	115
10.2	A Model for Dynamical Disorder: The Gaussian White Noise Model .....	121
10.2.1	Introduction .....	121
10.2.2	Determination of the Retarded Green Function . . . .	121
10.2.3	Kinetic Equation for the GWN .....	123
10.2.4	Other Transport Properties .....	127
10.3	Introduction to High-Field Transport in Semiconductors . . .	129
10.4	Resonant-Level Model in High Electric Fields .....	131
10.4.1	Introduction .....	131
10.4.2	Retarded Green Function: Single Impurity Problem .....	131
10.4.3	Retarded Green Function: Dilute Concentration of Impurities .....	133
10.4.4	Analytic Continuation .....	140
10.4.5	Quantum Kinetic Equation .....	141
10.5	Quantum Kinetic Equation for Electron–Phonon Systems .....	144
10.6	An Application: Collision Broadening for a Model Semiconductor .....	148
10.6.1	Analytical Considerations .....	148
10.6.2	A Simple Model: Optical Phonon Emission at $T = 0$ .....	150
10.7	Spatially Inhomogeneous Systems .....	151
<b>11</b>	<b>Optical Absorption in Intense THz Fields</b> .....	157
11.1	Introductory Remarks .....	157
11.2	Optical Absorption as a Response Function .....	158
11.3	Absorption Coefficient .....	162
11.4	Static Electric Field .....	163
11.5	Harmonically Varying External Electric Fields .....	164
11.5.1	Joint Density of States, 2D .....	167
11.5.2	Joint Density of States, 3D .....	169
11.6	Dynamical Franz–Keldysh Effect: Excitonic Effects .....	171
11.6.1	Matrix Truncation .....	172
11.6.2	Floquet Space Formulation .....	175
<b>12</b>	<b>Transport in Mesoscopic Semiconductor Structures</b> .....	181
12.1	Introduction .....	181
12.2	Nonequilibrium Techniques in Mesoscopic Tunneling Structures .....	184
12.3	Model Hamiltonian .....	185
12.4	General Expression for the Current .....	186

XVIII Contents

12.5	Current Conservation . . . . .	191
12.6	Noninteracting Resonant-Level Model . . . . .	192
12.7	Density Functional Theory and Modeling of Molecular Electronics . . . . .	195
12.8	Resonant Tunneling with Electron–Phonon Interactions . . . . .	196
12.9	Transport in a Semiconductor Superlattice . . . . .	198
12.10	Transport in Atomic Gold Wires: Signature of Coupling to Vibrational Modes . . . . .	202
12.11	Transport Through a Coulomb Island . . . . .	205
<b>13</b>	<b>Time-Dependent Phenomena . . . . .</b>	<b>213</b>
13.1	Introduction . . . . .	213
13.2	Applicability to Experiments . . . . .	214
13.3	Mathematical Formulation . . . . .	215
13.4	Average Current . . . . .	217
13.5	Time-Dependent Resonant-Level Model . . . . .	218
	13.5.1 Response to Harmonic Modulation . . . . .	221
	13.5.2 Response to Step-Like Modulation . . . . .	224
13.6	Linear-Response . . . . .	227
13.7	Fluctuating Energy Levels . . . . .	229
13.8	Noise . . . . .	230
	13.8.1 The Disconnected Terms . . . . .	235
	13.8.2 The Connected Terms . . . . .	236

---

**Part IV Theory of Ultrafast Kinetics  
in Laser-Excited Semiconductors**

---

<b>14</b>	<b>Optical Free-Carrier Interband Kinetics in Semiconductors . . . . .</b>	<b>243</b>
14.1	Interband Transitions in Direct-Gap Semiconductors . . . . .	243
	14.1.1 Reduced Density Matrices . . . . .	243
	14.1.2 Nonequilibrium Green Functions . . . . .	245
	14.1.3 Calculations of the Two-Time-Dependent Nonequilibrium Green Function . . . . .	245
	14.1.4 Replacement of Two-Time Propagators by a One-Time Density Matrix and a Two-Time Spectral Function . . . . .	246
14.2	Free-Carrier Kinetics Under Laser-Pulse Excitation . . . . .	251
14.3	The Optical Free-Carrier Bloch Equations . . . . .	255
<b>15</b>	<b>Interband Quantum Kinetics with LO-Phonon Scattering . . . . .</b>	<b>259</b>
15.1	Derivation of the Interband Quantum Kinetic Equations . . . . .	259
15.2	The Spectral Green Functions $G_{\mu\nu}^r$ and $G_{\mu\nu}^a$ . . . . .	266

15.2.1	Free-Particle Retarded Green Function . . . . .	266
15.2.2	Retarded GF in the Mean-Field Approximation . . .	267
15.2.3	Spectra of Retarded Gfs . . . . .	269
15.2.4	Dephasing of Retarded Green Functions . . . . .	274
15.3	Intraband Relaxation . . . . .	279
15.4	Interband-Polarization Dephasing . . . . .	281
15.5	Numerical Strategies . . . . .	283
<b>16</b>	<b>Two-Pulse Spectroscopy . . . . .</b>	<b>287</b>
16.1	Introductory Remarks . . . . .	287
16.2	Thin Samples . . . . .	289
16.3	Low-Intensity Two-Beam Experiments . . . . .	290
16.3.1	LO-Phonon Relaxation Cascades . . . . .	291
16.3.2	LO-Phonon Quantum Beats in FWM . . . . .	292
16.3.3	Two-Time Electron-Phonon Quantum Kinetics . . . .	294
<b>17</b>	<b>Coulomb Quantum Kinetics</b>	
	<b>in a Dense Electron-Hole Plasma . . . . .</b>	<b>301</b>
17.1	Introduction . . . . .	301
17.2	Screening in the Nonequilibrium GF Theory . . . . .	302
17.3	Coulomb Quantum Kinetics . . . . .	306
17.4	Plasmon-Pole Approximation	
	for the Two-Time-Dependent Potential . . . . .	309
17.4.1	Parametric Plasma Oscillations . . . . .	311
17.4.2	Instantaneous Static Potential Approximation . . . .	313
<b>18</b>	<b>The Buildup of Screening . . . . .</b>	<b>317</b>
18.1	Screening of the Coulomb Interaction . . . . .	317
18.1.1	Calculations of the Two-Time-Dependent	
	Screened Potential . . . . .	318
18.1.2	Femtosecond Optical Pump	
	and THz Probe Spectroscopy . . . . .	320
18.2	Time-Dependent Screening of Phonon-Mediated	
	and Coulomb Interactions . . . . .	320
18.2.1	Buildup of the Phonon-Plasmon Mixed Modes . . . .	324
<b>19</b>	<b>Femtosecond Four-Wave Mixing with Dense Plasmas . . . .</b>	<b>331</b>
19.1	Time-Resolved Four-Wave Mixing . . . . .	331
19.2	Time-Integrated Four-Wave Mixing . . . . .	334
19.3	Four-Wave Mixing with Coherent Control . . . . .	335
	<b>References . . . . .</b>	<b>341</b>
	<b>Index . . . . .</b>	<b>353</b>
