# Contents

Preface .....	v
Contributors .....	ix
1 Stabilization of Protein Structure <i>Kenneth P. Murphy</i> .....	1
2 Protein Stabilization by Naturally Occurring Osmolytes <i>D. Wayne Bolen</i> .....	17
3 The Thermodynamic Linkage Between Protein Structure, Stability, and Function <i>Ernesto Freire</i> .....	37
4 Measuring the Conformational Stability of a Protein by Hydrogen Exchange <i>Beatrice M.P. Huyghues-Despointes, C. Nick Pace, S. Walter Englander, and J. Martin Scholtz</i> .....	69
5 Modeling the Native State Ensemble <i>Vincent J. Hilser</i> .....	93
6 Conformational Entropy in Protein Folding: <i>A Guide to Estimating Conformational Entropy via Modeling and Computation</i> <i>Trevor P. Creamer</i> .....	117
7 Turn Scanning: <i>Experimental and Theoretical Approaches to the Role of Turns</i> <i>Carl Frieden, Enoch S. Huang, and Jay W. Ponder</i> .....	133
8 Laser Temperature-Jump Methods for Studying Folding Dynamics <i>James Hofrichter</i> .....	159
9 Kinetics of Conformational Fluctuations by EX1 Hydrogen Exchange in Native Proteins <i>T. Sivaraman and Andrew D. Robertson</i> .....	193
10 Molecular Dynamics Simulations of Protein Unfolding/Folding <i>Valerie Daggett</i> .....	215
Index .....	249
