

# Contents

Preface		xi
Chapter 1	<b>Introductory Questions</b>	1
Chapter 2	<b>Permutations and Combinations</b>	7
2.1	The Multiplication Principle	8
2.2	Factorials	10
2.3	Permutations	12
2.4	Zero Factorial	16
2.5	Combinations	18
2.6	Permutations of Things in a Circle	23
2.7	Summary	25
Chapter 3	<b>Combinations and Binomial Coefficients</b>	27
3.1	A Path Problem	27
3.2	Permutations of Things Not All Alike	28
3.3	Pascal's Formula for $C(n, r)$	31
3.4	The Binomial Expansion	34
3.5	The Multinomial Expansion	38
3.6	Pascal's Triangle	41
3.7	The Number of Subsets of a Set	42
3.8	Sums of Powers of Natural Numbers	44
3.9	Summary	48
Chapter 4	<b>Some Special Distributions</b>	50
4.1	Fibonacci Numbers	50
4.2	Linear Equations with Unit Coefficients	54
4.3	Combinations with Repetitions	59
4.4	Equations with Restricted Solutions	60
4.5	Summary	65
Chapter 5	<b>The Inclusion-Exclusion Principle; Probability</b>	67
5.1	A General Result	67

5.2	Applications to Equations and to Combinations with Repetitions	72
5.3	Derangements	78
5.4	Combinatorial Probability	82
5.5	Summary	88
Chapter 6	<b>Partitions of an Integer</b>	91
6.1	Graphs of Partitions	92
6.2	The Number of Partitions	96
6.3	Summary	99
Chapter 7	<b>Generating Polynomials</b>	100
7.1	Partitions and Products of Polynomials	102
7.2	Change for a Dollar Bill	106
7.3	Summary	108
Chapter 8	<b>Distribution of Objects Not All Alike</b>	109
8.1	Objects Different, Boxes Different	110
8.2	Objects Different, Boxes Alike (Partitions of a Set)	112
8.3	Objects Mixed, Boxes Different	114
8.4	Summary	118
Chapter 9	<b>Configuration Problems</b>	120
9.1	The Pigeonhole Principle	120
9.2	Chromatic Triangles	122
9.3	Separations of the Plane	124
9.4	Summary	128
Chapter 10	<b>Mathematical Induction</b>	129
10.1	The Principle of Mathematical Induction	130
10.2	Notation for Sums and Products	133
10.3	Summary	139
Chapter 11	<b>Interpretations of a Non-Associative Product</b>	140
11.1	A Recursion Relation	141
11.2	The Development of an Explicit Formula	143
11.3	Proof of the Conjecture	148
11.4	A Formula for $F(n)$	150
11.5	Summary	152
	Miscellaneous Problems	153
	Answers and Solutions	160
	Bibliography	199
	Index	201
